ECONOMY

Economy—overview: Madagascar is a mostly unregulated economy with many untapped natural resources, but no capital markets, a weak judicial system, poorly enforced contracts, and rampant government corruption. The country faces challenges to improve education, healthcare, and the environment to boost long-term economic growth. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for more than one-fourth of GDP and employing roughly 80% of the population. Deforestation and erosion, aggravated by bushfires, slash-and-burn clearing techniques, and the use of firewood as the primary source of fuel, are serious concerns to the agriculture dependent economy.

After discarding socialist economic policies in the mid-1990s, Madagascar followed a World Bank- and IMF-led policy of privatization and liberalization until the onset of a political crisis, which lasted from 2009 to 2013. The strategy had placed the country on a slow and steady growth path from an extremely low starting point. Exports of apparel boomed after gaining duty-free access to the US in 2000; however, Madagascar's failure to comply with the requirements of the African Growth and Opportunity Act (AGOA) led to the termination of the country's duty-free access in January 2010, a sharp fall in textile production, and a loss of more than 100,000 jobs.

Madagascar regained AGOA access in January 2015 following the democratic election of a new president the previous year. Madagascar produces around 80% of the world's vanilla supply; although supply was constrained by hurricane-related damage in

2017, international demand drove prices to record highs, increasing export earnings for Malagasy vanilla. Madagascar's financial sector remains weak, limiting the use of monetary policy to control inflation, but an ongoing IMF program aims to strengthen financial and investment management capacity.

MALAWI

INTRODUCTION

Background: Established in 1891, the British protectorate of

Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule under President Hastings Kamuzu BANDA, the country held multiparty presidential and parliamentary elections in 1994, under a provisional constitution that came into full effect the following year. President Bingu wa MUTHARIKA, elected in 2004 after a failed attempt by the previous president to amend the constitution to permit another term, struggled to assert his authority against his predecessor and subsequently started his own party, the Democratic Progressive Party in 2005. MUTHARIKA was reelected to a second term in 2009. He oversaw some economic improvement in his first term, but was accused of economic mismanagement and poor governance in his second term. He died abruptly in 2012 and was succeeded by vice president, Joyce BANDA, who had earlier started her own party, the People's Party. MUTHARIKA's brother, Peter MUTHARIKA, defeated BANDA in the 2014 election. Population growth, increasing pressure on agricultural lands, corruption, and the scourge of HIV/AIDS pose major problems for Malawi.

Demographic profile: Malawi has made great improvements in maternal and child health, but has made less progress in reducing its high fertility rate. In both rural and urban areas, very high proportions of mothers are receiving prenatal care and skilled birth assistance, and most children are being vaccinated. Malawi's fertility rate, however, has only declined slowly, decreasing from more than 7 children per woman in the 1980s to about 5.5 today. Nonetheless, Malawians prefer smaller families than in the past, and women are increasingly using contraceptives to prevent or space pregnancies. Rapid population growth and high population density is putting pressure on Malawi's land, water, and forest resources. Reduced plot sizes and increasing vulnerability to climate change, further threaten the sustainability of Malawi's agriculturally based economy and will worsen food shortages. About 80% of the population is employed in agriculture.

Historically, Malawians migrated abroad in search of work, primarily to South Africa and present-day Zimbabwe, but international migration became uncommon after the 1970s, and most migration in recent years has been internal. During the colonial period, Malawians regularly migrated to southern Africa as contract farm laborers, miners, and domestic servants. In the decade and a half after independence in 1964, the Malawian Government sought to transform its economy from one dependent on small-scale farms to one based on estate agriculture. The resulting demand for wage labor induced more than 300,000 Malawians to return home

between the mid-1960s and the mid-1970s. In recent times, internal migration has generally been local, motivated more by marriage than economic reasons.

ECONOMY

Economy—overview: Landlocked Malawi ranks among the world’s most densely populated and least developed countries. The country’s economic performance has historically been constrained by policy inconsistency, macroeconomic instability, poor infrastructure, rampant corruption, high population growth, and poor health and education outcomes that limit labor productivity. The economy is predominately agricultural with about 80% of the population living in rural areas. Agriculture accounts for about one-third of GDP and 80% of export revenues. The performance of the tobacco sector is key to short-term growth as tobacco accounts for more than half of exports, although Malawi is looking to diversify away from tobacco to other cash crops.

The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. Donors halted aid from 2013 to 2016 because of concerns about corruption and fiscal carelessness, but the World Bank resumed budget support in May 2017. In 2006, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program but recent increases in domestic borrowing mean that debt servicing in 2016 exceeded the levels prior to HIPC debt relief.

Heavily dependent on rain-fed agriculture, with corn being the staple crop, Malawi’s economy was hit hard by the El Nino-driven drought in 2015 and 2016, and now faces threat from the fall armyworm. The drought also slowed economic activity, led to two consecutive years of declining economic growth, and contributed to high inflation rates. Because of concerns about subsequent droughts, the government banned maize exports from 2016 to late 2017, causing a market glut and depressing local prices.

MALAYSIA

INTRODUCTION

Background: During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula except Singapore formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore, as well as Sabah and Sarawak on the northern coast of Borneo, joined the Federation. The first several years of the country's independence were marred by a communist insurgency, Indonesian confrontation with Malaysia, Philippine claims to Sabah, and Singapore's withdrawal in 1965. During the 22-year term of Prime Minister MAHATHIR bin Mohamad (1981-2003), Malaysia was successful in diversifying its economy from dependence on exports of raw materials to the development of manufacturing, services, and tourism. Prime Minister Mohamed NAJIB bin Abdul Razak (in office since April 2009) has continued these pro-business policies.

ECONOMY

Economy—overview: Malaysia, an upper middle-income country, has transformed itself since the 1970s from a producer of raw materials into a multi-sector economy. Under current Prime Minister NAJIB, Malaysia is attempting to achieve high-income status by 2020 and to move further up the value-added production chain by attracting investments in high technology, knowledge-based industries and services. NAJIB's Economic Transformation Program is a series of projects and policy measures intended to accelerate the country's economic growth. The government has also taken steps to liberalize some services sub-sectors. Malaysia is vulnerable to a fall in world commodity prices or a general slowdown in global economic activity.

The NAJIB administration is continuing efforts to boost domestic demand and reduce the economy's dependence on exports. Domestic demand continues to anchor economic growth, supported mainly by private consumption, which accounts for 53% of GDP. Nevertheless, exports—particularly of electronics, oil and gas, and palm oil—remain a significant driver of the economy. In 2015, gross exports of goods and services were equivalent to 73% of GDP. The oil and gas sector supplied about 22% of government revenue in 2015, down significantly from prior years amid a decline in commodity prices and diversification of government revenues. Malaysia has embarked on a fiscal reform program aimed at achieving a balanced budget by 2020, including rationalization of subsidies and the 2015 introduction of a 6% value added tax. Sustained low commodity prices throughout the period not only strained government finances, but also shrunk Malaysia's current account surplus and weighed heavily on the Malaysian ringgit, which was among the region's worst performing currencies during 2013-17. The ringgit hit new lows following the US presidential election amid a broader selloff of emerging market assets.

Bank Negara Malaysia (the central bank) maintains adequate foreign exchange reserves; a well-developed regulatory regime has limited Malaysia's exposure to riskier financial instruments, although it remains vulnerable to volatile global capital flows. In order to increase Malaysia's competitiveness, Prime Minister NAJIB raised possible revisions to the special economic and social

preferences accorded to ethnic Malays under the New Economic Policy of 1970, but retreated in 2013 after he encountered significant opposition from Malay nationalists and other vested interests. In September 2013 NAJIB launched the new Bumiputra Economic Empowerment Program, policies that favor and advance the economic condition of ethnic Malays.

Malaysia signed the 12-nation Trans-Pacific Partnership (TPP) free trade agreement in February 2016, although the future of the TPP remains unclear following the US withdrawal from the agreement. Along with nine other ASEAN members, Malaysia established the ASEAN Economic Community in 2015, which aims to advance regional economic integration.

Maritime threats: the International Maritime Bureau reports that the territorial and offshore waters in the Strait of Malacca and South China Sea remain high risk for piracy and armed robbery against ships; in the past, commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargo diverted to ports in East Asia; crews have been murdered or cast adrift; seven attacks were reported in 2016 including five ships boarded, two hijacked, and 47 crew taken hostage, this is down from 13 attacks in 2015; during the first half of 2017, three attacks were reported including two ships that were

boarded and one that was hijacked

TERRORISM

Terrorist groups—foreign based: *Jemaah Islamiya (JI)*: *aim(s)*: enhance networks in Malaysia and, ultimately, overthrow the secular Malaysian Government and establish a pan-Islamic state across Southeast Asia

area(s) of operation: maintains a recruitment and operational presence, primarily in major cities; authorities have foiled several plots targeting densely populated sites for attack, including Kuala Lumpur City Centre, embassies, government buildings, and popular tourist attractions; prior to the government exerting intensive counterterrorism measures, JI was based in Malaysia until moving its headquarters to Indonesia in 1993; has established ties to the Malaysian Militant Movement (Kumpulan Mujahidin Malaysia, KMM), a home-grown Islamist extremist group; JI recruiters continue to target youths for fighting

Liberation Tigers of Tamil Eelam (LTTE): *aim(s)*: enhance networks in Malaysia and, ultimately, revive the movement to establish a Tamil homeland

area(s) of operation: maintains safe havens, transit routes, human trafficking, and an operational presence in an effort to revive the movement and conduct attacks; authorities continue in 2017 to pursue leaders, operatives, and supporters for arrest

TRANSNATIONAL ISSUES

Disputes—international: while the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions over the Spratly Islands, it is not the legally binding “code of conduct” sought by some parties; Malaysia was not party to the March 2005 joint accord among the national oil companies of China, the Philippines, and Vietnam on conducting marine seismic activities in the Spratly Islands; disputes continue over deliveries of fresh water to Singapore, Singapore’s land reclamation, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; land and maritime negotiations with Indonesia are

ongoing, and disputed areas include the controversial Tanjung Datu and Camar Wulan border area in Borneo and the maritime boundary in the Ambalat oil block in the Celebes Sea; separatist violence in Thailand's predominantly Muslim southern provinces prompts measures to close and monitor border with Malaysia to stem terrorist activities; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo; per Letters of Exchange signed in 2009, Malaysia in 2010 ceded two hydrocarbon concession blocks to Brunei in exchange for Brunei's sultan dropping claims to the Limbang corridor, which divides Brunei; piracy remains a problem in the Malacca Strait

Refugees and internally displaced persons: refugees (country of origin): 87,036 (Burma) (2016)

stateless persons: 10,931 (2016); note—Malaysia's stateless population consists of Rohingya refugees from Burma, ethnic Indians, and the children of Filipino and Indonesian illegal migrants; Burma stripped the Rohingya of their nationality in 1982; Filipino and Indonesian children who have not been registered for birth certificates by their parents or who received birth certificates stamped "foreigner" are not eligible to attend government schools; these children are vulnerable to statelessness should they not be able to apply to their parents' country of origin for passports

Trafficking in persons: current situation: Malaysia is a destination and, to a lesser extent, a source and transit country for men, women, and children subjected to forced labor and women and children subjected to sex trafficking; Malaysia is mainly a destination country for foreign workers who migrate willingly from countries, including Indonesia, Bangladesh, the Philippines, Nepal, Burma, and other Southeast Asian countries, but subsequently encounter forced labor or debt bondage in agriculture, construction, factories, and domestic service at the hands of employers, employment agents, and labor recruiters; women from Southeast Asia and, to a much lesser extent, Africa, are recruited for legal work in restaurants, hotels, and salons but are forced into prostitution; refugees, including Rohingya adults and children, are not legally permitted to work and are vulnerable to trafficking; a small number of Malaysians are trafficked internally and subjected to sex trafficking abroad

tier rating: Tier 2 Watch list—Malaysia does not fully comply with

the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, amendments to strengthen existing anti-trafficking laws, including enabling victims to move freely and to work and for NGOs to run protective facilities, were drafted by the government and are pending approval from Parliament; authorities more than doubled investigations and prosecutions but convicted only three traffickers for forced labor and none for sex trafficking, a decline from 2013 and a disproportionately small number compared to the scale of the country's trafficking problem; NGOs provided the majority of victim rehabilitation and counseling services with no financial support from the government (2015)

Illicit drugs: drug trafficking prosecuted vigorously, including enforcement of the death penalty; heroin still primary drug of abuse, but synthetic drug demand remains strong; continued ecstasy and methamphetamine producer for domestic users and, to a lesser extent, the regional drug market

MALDIVES

INTRODUCTION

Background: A sultanate since the 12th century, the Maldives became a British protectorate in 1887. It became a republic in 1968, three years after independence. President Maumoon Abdul GAYOOM dominated the islands' political scene for 30 years, elected to six successive terms by single-party referendums. Following political demonstrations in the capital Male in August 2003, GAYOOM and his government pledged to embark upon a process of liberalization and democratic reforms, including a more representative political system and expanded political freedoms. Political parties were legalized in 2005.

In June 2008, a constituent assembly—termed the “Special Majlis”—finalized a new constitution ratified by GAYOOM in August 2008. The first-ever presidential elections under a multi-candidate, multi-party system were held in October 2008. GAYOOM was defeated in a runoff poll by Mohamed NASHEED, a political activist who had been jailed several years earlier by the GAYOOM regime. NASHEED faced a number of challenges including strengthening democracy and combating poverty and drug abuse. In early February 2012, after several weeks of street protests in response to his ordering the arrest of a top judge, NASHEED resigned the presidency and handed over power to Vice President Mohammed WAHEED Hassan Maniku. In mid-2012, a Commission of National Inquiry was established by the government to probe events leading up to NASHEED's resignation. Though the commission found no evidence of a coup, the report recommended strengthening the country's democratic institutions to avert similar events in the future, and to investigate alleged police misconduct during the crisis. NASHEED, WAHEED, and Abdulla YAMEEN ran in the 2013 elections with YAMEEN ultimately winning the presidency after three rounds of voting. As president, YAMEEN has sought to weaken democratic institutions, jail his political opponents, restrict the press, and exert control over the judiciary to strengthen his hold on power and limit dissent. Maldivian officials have played a prominent role in international climate change discussions (due to the islands' vulnerability to rising sea-level).

ECONOMY

Economy—overview: Maldives has quickly become a middle-income country, driven by the rapid growth of its tourism and fisheries sectors, but the country still contends with a large and growing fiscal deficit. Economic growth slowed to 2.8% in 2015, mainly because of a decline in tourists from China and Russia. Despite lower growth, tourism-related tax receipts increased by 13% in 2015 because of higher tax rates. This increase in tax receipts led to higher usable foreign exchange reserves that helped partially fund increases in construction related imports.

In 2015, Maldives’ Parliament passed a constitutional amendment legalizing foreign ownership of land; foreign land-buyers must reclaim at least 70% of the desired land from the ocean and invest at least \$1 billion in a construction project approved by Parliament.

Diversifying the economy beyond tourism and fishing, reforming public finance, increasing employment opportunities, and combating corruption, cronyism, and a growing drug problem are near-term challenges facing the government. Over the longer term, Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is 1 meter or less above sea level.

MILITARY AND SECURITY

Military branches: Maldives National Defense Force (MNDF): Marine Corps, Security Protection Group, Coast Guard (2010)

Military service age and obligation: 18-28 years of age for voluntary service; no conscription; 10th grade or equivalent education required; must not be a member of a political party (2012)

Military—note: the Maldives National Defense Force (MNDF), with its small size and with little serviceable equipment, is inadequate to prevent external aggression and is primarily tasked to reinforce the Maldives Police Service (MPS) and ensure security in the exclusive economic zone (2008)

TRANSNATIONAL ISSUES

Disputes—international: none

Trafficking in persons: current situation: Maldives is a destination country for men, women, and children subjected to forced labor and sex trafficking and a source country for women and children subjected to labor and sex trafficking; primarily Bangladeshi and Indian migrants working both legally and illegally in the construction and service sectors face conditions of forced labor, including fraudulent recruitment, confiscation of identity and travel documents, nonpayment and withholding of wages, and debt bondage; a small number of women from Asia, Eastern Europe, and former Soviet states are trafficked to Maldives for sexual exploitation; Maldivian women may be subjected to sex trafficking domestically or in Sri Lanka; some Maldivian children are transported to the capital for domestic service, where they may also be victims of sexual abuse and forced labor

tier rating: Tier 2 Watch List—Maldives does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government adopted a national action plan for 2015-19 and is continuing to develop victim identification, protection, and referral procedures, but overall its anti-trafficking efforts did not increase; only five trafficking investigations were conducted, no new prosecutions were initiated for the second consecutive year, and no convictions

were made, down from one in 2013; some officials warned businesses in advance of planned raids for suspected trafficking offenses; victim protection deteriorated when the state-run shelter for female victims barred access to victims shortly after opening in January 2014, in part because of bureaucratic disputes, which dissuaded victims from pursuing charges against perpetrators; the government did not prosecute or hold accountable any employers or government officials for withholding passports (2015)

MALI

INTRODUCTION

Background: The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, what formerly made up the Sudanese Republic was renamed Mali. Rule by dictatorship was brought to a close in 1991 by a military coup that ushered in a period of democratic rule. President Alpha KONARE won Mali's first two democratic presidential elections in 1992 and 1997. In keeping

with Mali's two-term constitutional limit, he stepped down in 2002 and was succeeded by Amadou Toumani TOURE, who was elected to a second term in a 2007 election that was widely judged to be free and fair. Malian returnees from Libya in 2011 exacerbated tensions in northern Mali, and Tuareg ethnic militias rebelled in January 2012. Low- and mid-level soldiers, frustrated with the poor handling of the rebellion, overthrew TOURE on 22 March. Intensive mediation efforts led by the Economic Community of West African States (ECOWAS) returned power to a civilian administration in April with the appointment of Interim President Dioncounda TRAORE. The post-coup chaos led to rebels expelling the Malian military from the country's three northern regions and allowed Islamic militants to set up strongholds. Hundreds of thousands of northern Malians fled the violence to southern Mali and neighboring countries, exacerbating regional food shortages in host communities. An international military intervention to retake the three northern regions began in January 2013 and within a month most of the north had been retaken. In a democratic presidential election conducted in July and August of 2013, Ibrahim Boubacar KEITA was elected president. The Malian Government and northern armed groups signed an internationally-mediated peace accord in June 2015.

Demographic profile: Mali's total population is expected to double by 2035; its capital Bamako is one of the fastest-growing cities in Africa. A young age structure, a declining mortality rate, and a sustained high total fertility rate of 6 children per woman—the third highest in the world—ensure continued rapid population growth for the foreseeable future. Significant outmigration only marginally tempers this growth. Despite decreases, Mali's infant, child, and maternal mortality rates remain among the highest in sub-Saharan Africa because of limited access to and adoption of family planning, early childbearing, short birth intervals, the prevalence of female genital cutting, infrequent use of skilled birth attendants, and a lack of emergency obstetrical and neonatal care.

Mali's high total fertility rate has been virtually unchanged for decades, as a result of the ongoing preference for large families, early childbearing, the lack of female education and empowerment, poverty, and extremely low contraceptive use. Slowing Mali's population growth by lowering its birth rate will be essential for poverty reduction, improving food security, and developing human capital and the economy.

Mali has a long history of seasonal migration and emigration driven by poverty, conflict, demographic pressure, unemployment,

food insecurity, and droughts. Many Malians from rural areas migrate during the dry period to nearby villages and towns to do odd jobs or to adjoining countries to work in agriculture or mining. Pastoralists and nomads move seasonally to southern Mali or nearby coastal states. Others migrate long term to Mali's urban areas, Cote d'Ivoire, other neighboring countries, and in smaller numbers to France, Mali's former colonial ruler. Since the early 1990s, Mali's role has grown as a transit country for regional migration flows and illegal migration to Europe. Human smugglers and traffickers exploit the same regional routes used for moving contraband drugs, arms, and cigarettes.

Between early 2012 and 2013, renewed fighting in northern Mali between government forces and Tuareg secessionists and their Islamist allies, a French-led international military intervention, as well as chronic food shortages, caused the displacement of hundreds of thousands of Malians. Most of those displaced domestically sought shelter in urban areas of southern Mali, except for pastoralist and nomadic groups, who abandoned their traditional routes, gave away or sold their livestock, and dispersed into the deserts of northern Mali or crossed into neighboring countries. Almost all Malians who took refuge abroad (mostly Tuareg and Maure pastoralists) stayed in the region, largely in Mauritania, Niger, and Burkina Faso.

ECONOMY

Economy—overview: Among the 25 poorest countries in the world, landlocked Mali depends on gold mining and agricultural exports for revenue. The country’s fiscal status fluctuates with gold and agricultural commodity prices and the harvest; cotton and gold exports make up around 80% of export earnings. Mali remains dependent on foreign aid.

Economic activity is largely confined to the riverine area irrigated by the Niger River; about 65% of Mali’s land area is desert or semidesert. About 10% of the population is nomadic and about 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. The government subsidizes the production of cereals to decrease the country’s dependence on imported foodstuffs and to reduce its vulnerability to food price shocks.

Mali is developing its iron ore extraction industry to diversify foreign exchange earnings away from gold, but the pace will depend on global price trends. Although the political coup in 2012 slowed Mali’s growth, the economy has since bounced back, with GDP growth above 5% in 2014-17, although physical insecurity, high population growth, corruption, weak infrastructure, and low levels of human capital continue to constrain economic development. Higher rainfall helped to boost cotton output in 2017, and the country’s 2017 budget increased spending more than 10%, much of which was devoted to infrastructure and agriculture. Corruption and political turmoil are strong downside risks in 2018 and beyond.

area(s) of operation: headquartered in the north; targets primarily international interests, especially Westerners and Western entities; responsible for multiple lethal attacks across the country in 2016, including kidnappings in Tombouctou and along the border with Burkina Faso; affiliated with the Islamic State of Iraq and the Levant (ISIL); elements based in Mali are part of Jama'at Nusrat al-Islam wal-Muslimin (Group for the Support of Islam and Muslims, JNIM), an alliance umbrella of al-Qa'ida linked groups in Mali that announced its presence on 2 March 2017; JNIM is responsible for several attacks carried out in central Mali

Ansar al-Dine (AAD): aim(s): install Sharia throughout Mali; the Macina Liberation Front branch seeks to rebuild historic Islamic

empires, primarily the Macina Empire

area(s) of operation: headquartered in the north, with its Macina Liberation Front branch based in Mopti in Central Mali increasing its operations in the south; launches attacks against Malian military and security forces, French troops, UN Multidimensional Integrated Stabilization Mission in Mali (MINUSMA), and other Westerners; AAD is a member group in Jama'at Nusrat al-Islam wal-Muslimin (Group for the support of Islam and Muslims, JNIM), an alliance umbrella of al-Qa'ida linked groups in Mali that announced its presence on 2 March 2017; AAD's overall leader and founder Iyad Ag GHALI leads JNIM, which is responsible for several attacks carried out in central Mali

Terrorist groups—foreign based: *al-Qa'ida (AQ): aim(s):* overthrow the Malian Government and, ultimately, establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation of Sharia

area(s) of operation: maintains an operational presence and established networks, especially through its branch, Jama'at Nusrat al-Islam wal-Muslimin (Group for the Support of Islam and Muslims, JNIM), an alliance umbrella of al-Qa'ida linked groups in Mali that announced its presence on 2 March 2017; JNIM is responsible for several attacks carried out in central Mali

al-Qaida in the Islamic Maghreb (AQIM): aim(s): replace the Malian Government with Sharia and, ultimately, create a regional Islamic caliphate across all of North and West Africa

area(s) of operation: maintains a heavy operational presence, especially in the northern half of the country; conducts attacks against foreigners and Malian, French Government, and UN forces and facilities; responsible for multiple attacks across the country in recent years; has engaged in numerous kidnappings for ransom in Tombouctou and along the border with Burkina Faso; on 20 November 2015, AQIM and al-Mulathamun Battalion operatives killed 20 foreigners at the Radisson Blu Hotel in Mali's capital, Bamako, when they stormed the hotel while shooting and lobbing handgrenades; AQIM's Sahara branch is a member group in Jama'ah Nusrat al-Islam wal-Muslimin (Group for the support of Islam and Muslims, JNIM), an alliance umbrella of al-Qa'ida linked groups in Mali that announced its presence on 2 March 2017; JNIM is responsible for several attacks carried out in central Mali

IDPs: 38,172 (Tuareg rebellion since 2012) (2017)

Trafficking in persons: current situation: Mali is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; internal trafficking is more prevalent than transnational trafficking, but foreign women and girls are forced into domestic servitude, agricultural labor, and support roles in gold mines, as well as subjected to sex trafficking; Malian boys are forced to work in agricultural settings, gold mines, the informal commercial sector and to beg within Mali and neighboring countries; Malians and other Africans who travel through Mali to Mauritania, Algeria, or Libya in hopes of reaching Europe are particularly at risk of becoming victims of human trafficking; men and boys, primarily of Songhai ethnicity, are subjected to debt bondage in the salt mines of Taoudenni in northern Mali; some members of Mali's Tamachek community are subjected to hereditary slavery-related practices; Malian women and girls are victims of sex trafficking in Gabon, Libya, Lebanon, and Tunisia; the recruitment of child soldiers by armed groups in northern Mali decreased

tier rating: Tier 2 Watch List—Mali does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Mali was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; officials failed to distribute the 2012 anti-trafficking law to judicial and law enforcement personnel, perpetuating a lack of understanding and awareness of the legislation; anti-trafficking law enforcement efforts decreased in 2014, with only one case investigated and no prosecutions or convictions; fewer victims were identified, and the government did not support the privately funded NGOs and international organizations it relied upon to provide victims with services; the government did not conduct any awareness-raising campaigns, workshops, or training sessions

Flag description: two equal vertical bands of white (hoist side) and red; in the upper hoist-side corner is a representation of the George Cross, edged in red; according to legend, the colors are taken from the red and white checkered banner of Count Roger of Sicily who removed a bi-colored corner and granted it to Malta in 1091; an uncontested explanation is that the colors are those of the Knights of Saint John who ruled Malta from 1530 to 1798; in 1942, King George VI of the UK awarded the George Cross to the islanders for their exceptional bravery and gallantry in World War II; since independence in 1964, the George Cross bordered in red has appeared directly on the white field

National symbol(s): Maltese eight-pointed cross; national colors: red, white

National anthem: name: "L-Innu Malti" (The Maltese Anthem)

lyrics/music: Dun Karm PSAILA/Robert SAMMUT

note: adopted 1945; written in the form of a prayer

ECONOMY

Economy—overview: Malta's free market economy—the smallest economy in the euro-zone—relies heavily on trade in both goods and services, principally with Europe. Malta produces less than a quarter of its food needs, has limited fresh water supplies, and has few domestic energy sources. Malta's economy is dependent on foreign trade, manufacturing, and tourism. Malta joined the EU in 2004 and adopted the euro on 1 January 2008.

Malta has weathered the euro-zone crisis better than most EU member states due to a low debt-to-GDP ratio and financially sound banking sector. It maintains one of the lowest unemployment rates in Europe, and growth has fully recovered since the 2009 recession.

In 2014 through 2016, Malta led the euro zone in growth, expanding more than 4.5% per year.

Malta's services sector continues to grow, with sustained growth in the financial services and online gaming sectors. Advantageous tax schemes remained attractive to foreign investors, though EU discussions of anti-tax avoidance measures have raised concerns among Malta's financial services and insurance providers, as the measures could have a significant impact on those sectors. The tourism sector also continued to grow, with 2016 showing record-breaking numbers of both air and cruise passenger arrivals.

Malta's GDP growth remains strong and is supported by a strong labor market. The government has implemented new programs, including free childcare, to encourage increased labor participation. The high cost of borrowing and small labor market remain potential constraints to future economic growth. Increasingly, other EU and European migrants are relocating to Malta for employment, though wages have remained low compared to other European countries. Inflation remains low.

MARSHALL ISLANDS

INTRODUCTION

Background: After almost four decades under US administration as the easternmost part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands hosts the US Army Kwajalein Atoll Reagan Missile Test Site, a key installation in the US missile defense network. Kwajalein also hosts one of four dedicated ground antennas (the others are on Ascension (Saint Helena, Ascension, and Tristan da Cunha), Diego Garcia (British Indian Ocean Territory), and at Cape Canaveral, Florida (US)) that assist in the operation of the Global Positioning System (GPS) navigation system.

GEOGRAPHY

Location: Oceania, two archipelagic island chains of 29 atolls, each made up of many small islets, and five single islands in the North Pacific Ocean, about halfway between Hawaii and Australia

Geographic coordinates: 9 00 N, 168 00 E

Map references: Oceania

Area: *total:* 181 sq km

land: 181 sq km

water: 0 sq km

note: the archipelago includes 11,673 sq km of lagoon waters and encompasses the atolls of Bikini, Enewetak, Kwajalein, Majuro, Rongelap, and Utirik

country comparison to the world: 217

Area—comparative: about the size of Washington, DC

Land boundaries: 0 km

Coastline: 370.4 km

Maritime claims: *territorial sea:* 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

Climate: tropical; hot and humid; wet season May to November; islands border typhoon belt

Terrain: low coral limestone and sand islands

Elevation: *mean elevation:* 2 m

elevation extremes: *lowest point:* Pacific Ocean 0 m

highest point: East-central Airik Island, Maloelap Atoll 14 m

Natural resources: coconut products, marine products, deep seabed minerals

Irrigated land: 0 sq km (2012)

Population—distribution: most people live in urban clusters found on many of the country's islands; more than two-thirds of the population lives on the atolls of Majuro and Ebeye

Natural hazards: infrequent typhoons

Environment—current issues: inadequate supplies of potable water; pollution of Majuro lagoon from household waste and discharges from fishing vessels

Environment—international agreements: *party to:* Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Ozone Layer Protection, Ship Pollution, Wetlands, Whaling

signed, but not ratified: none of the selected agreements

Geography—note: the islands of Bikini and Enewetak are former US nuclear test sites; Kwajalein atoll, famous as a World War II battleground, surrounds the world's largest lagoon and is used as a US missile test range; the island city of Ebeye is the second largest settlement in the Marshall Islands, after the capital of Majuro, and one of the most densely populated locations in the Pacific

ECONOMY

Economy—overview: US assistance and lease payments for the use of Kwajalein Atoll as a US military base are the mainstay of this small island country. Agricultural production, primarily subsistence, is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Industry is limited to handicrafts, tuna processing, and copra. Tourism holds some potential. The islands and atolls have few natural resources, and imports exceed exports.

The Marshall Islands received roughly \$1 billion in aid from the US during the period 1986-2001 under the original Compact of Free Association (Compact). In 2002 and 2003, the US and the Marshall Islands renegotiated the Compact’s financial package for a 20-year period, 2004 to 2024. Under the amended Compact, the Marshall Islands will receive roughly \$1.5 billion in direct US assistance. Under the amended Compact, the US and Marshall Islands are also jointly funding a Trust Fund for the people of the Marshall Islands that will provide an income stream beyond 2024, when direct Compact aid ends.

TRANSNATIONAL ISSUES

Disputes—international: claims US territory of Wake Island

Trafficking in persons: current situation: The Marshall Islands is a source and destination country for Marshallese women and girls and women from East Asia subjected to sex trafficking; Marshallese and foreign women are forced into prostitution in businesses frequented by crew members of fishing and transshipping vessels that dock in Majuro; some Chinese women are recruited to the Marshall Islands with promises of legitimate work and are subsequently forced into prostitution

tier rating: Tier 3—The Marshall Islands do not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government made no anti-trafficking law enforcement efforts, including developing a written plan to combat trafficking; no new trafficking investigations were opened in 2014, and no prosecutions or convictions were made for the fourth consecutive year; no efforts were made to identify trafficking victims, especially among women in prostitution or men working on foreign fishing vessels in Marshallese waters, and no attempt was made to ensure their access to protective services; limited awareness-raising events were conducted by an international organization (2015)

MAURITANIA

INTRODUCTION

Background: Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976 but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA seized power in a coup in 1984 and ruled Mauritania with a heavy hand for more than two decades. A series of presidential elections that he held were widely seen as flawed. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council that oversaw a transition to democratic rule. Independent candidate Sidi Ould Cheikh ABDALLAHI was inaugurated in April 2007 as Mauritania's first freely and fairly elected president. His term ended prematurely in August 2008 when a military junta led by General Mohamed Ould Abdel AZIZ deposed him and installed a military council government. AZIZ was subsequently elected president in July 2009 and sworn in the following month. AZIZ sustained injuries from an accidental shooting by his own troops in October 2012 but has

continued to maintain his authority. He was reelected in 2014 to a second and final term as president (according to the present constitution). The country continues to experience ethnic tensions among three major groups: Arabic-speaking descendants of slaves (Haratines), Arabic-speaking “White Moors” (Bidhan), and members of Sub-Saharan ethnic groups mostly originating in the Senegal River valley (Halpulaar, Soninke, and Wolof). Mauritania confronts a terrorism threat by al-Qa’ida in the Islamic Maghreb, which launched successful attacks between 2005 and 2011.

The activities of Al-Qaeda in the Islamic Maghreb (AQIM), and similar groups, pose a severe security threat to Mauritians and foreign visitors. AQIM launched a series of attacks in Mauritania between 2005 and 2011, murdering American and foreign tourists and aid workers, attacking diplomatic and government facilities, and ambushing Mauritanian soldiers and gendarmes. A successful strategy against terrorism that combines dialogue with the terrorists and military actions has prevented the country from further terrorist attacks since 2011.

PEOPLE AND SOCIETY

Population: 3,758,571 (July 2017 est.)

country comparison to the world: 129

Nationality: *noun:* Mauritanian(s)

adjective: Mauritanian

Ethnic groups: black Moors (Haratines—Arab-speaking slaves, former slaves, and their descendants of African origin, enslaved by white Moors) 40%, white Moors (of Arab-Berber descent, known as Bidhan) 30%, Sub-Saharan Mauritanians (non-Arabic speaking, Halpulaar, Soninke, Wolof, and Bamara ethnic groups) 30%

Languages: Arabic (official and national), Pular, Soninke, Wolof (all national languages), French

note: the spoken Arabic in Mauritania differs considerably from the modern standard Arabic used for official written purposes or in the media; the Mauritanian dialect, which incorporates many Berber words, is referred to as Hassaniya

Religions: Muslim (official) 100%

Demographic profile: With a sustained total fertility rate of about 4 children per woman and almost 60% of the population under the age of 25, Mauritania's population is likely to continue growing for the foreseeable future. Mauritania's large youth cohort is vital to its development prospects, but available schooling does not adequately prepare students for the workplace. Girls continue to be underrepresented in the classroom, educational quality remains poor, and the dropout rate is high. The literacy rate is only about 50%, even though access to primary education has improved since the mid-2000s. Women's restricted access to education and discriminatory laws maintain gender inequality—worsened by early and forced marriages and female genital cutting.

The denial of education to black Moors also helps to perpetuate slavery. Although Mauritania abolished slavery in 1981 (the last country in the world to do so) and made it a criminal offense in 2007, the millenniums-old practice persists largely because anti-slavery laws are rarely enforced and the custom is so ingrained. Up to 20% of Mauritania's population is estimated to be enslaved, the highest rate worldwide.

Drought, poverty, and unemployment have driven outmigration from Mauritania since the 1970s. Early flows were directed toward

other West African countries, including Senegal, Mali, Cote d'Ivoire, and Gambia. The 1989 Mauritania-Senegal conflict forced thousands of black Mauritians to take refuge in Senegal and pushed labor migrants toward the Gulf, Libya, and Europe in the late 1980s and early 1990s. Mauritania has accepted migrants from neighboring countries to fill labor shortages since its independence in 1960 and more recently has received refugees escaping civil wars, including tens of thousands of Tuaregs who fled Mali in 2012.

Mauritania was an important transit point for sub-Saharan migrants moving illegally to North Africa and Europe. In the mid-2000s, as border patrols increased in the Strait of Gibraltar, security increased around Spain's North African enclaves (Ceuta and Melilla), and Moroccan border controls intensified, illegal migration flows shifted from the Western Mediterranean to Spain's Canary Islands. In 2006, departure points moved southward along the West African coast from Morocco and Western Sahara to Mauritania's two key ports (Nouadhibou and the capital Nouakchott), and illegal migration to the Canaries peaked at almost 32,000. The numbers fell dramatically in the following years because of joint patrolling off the West African coast by Frontex (the EU's border protection agency), Spain, Mauritania, and Senegal; the expansion of Spain's border surveillance system; and the 2008 European economic downturn.

ECONOMY

Economy—overview: Mauritania’s economy is dominated by extractive industries (oil and mines), fisheries and agriculture. Half the population still depends on farming and raising livestock, even though many nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s, 1980s and 2000s. Recently, GDP growth has been driven largely by foreign investment in the mining and oil sectors.

Mauritania’s extensive mineral resources include iron ore, gold, copper, gypsum, and phosphate rock, and exploration is ongoing for tantalum, uranium, crude oil, and natural gas. Extractive

commodities make up about three-quarters of Mauritania's total exports, subjecting the economy to price swings in world commodity markets. Mining is also a growing source of government revenue, rising from 13% to 30% of total revenue from 2006 to 2016. The nation's coastal waters are among the richest fishing areas in the world, and fishing accounts for about 20% of budget revenues, 45% of foreign currency earnings. Mauritania processes a total of 1,800,000 tons of fish per year, but overexploitation by foreign and national fleets threaten the sustainability of this key source of revenue.

The economy is highly sensitive to international food and extractive commodity prices. Other risks to Mauritania's economy include its recurring droughts, dependence on foreign aid and investment, and insecurity in neighboring Mali, as well as significant shortages of infrastructure, institutional capacity, and human capital. Mauritania has sought additional IMF support by focusing efforts on poverty reduction. Investment in agriculture and infrastructure are the largest components of the country's public expenditures.

Trafficking in persons: current situation: Mauritania is a source and destination country for men, women, and children subjected to forced labor and sex trafficking; adults and children from traditional slave castes are subjected to slavery-related practices rooted in ancestral master-slave relationships; Mauritanian boy students called talibes are trafficked within the country by religious teachers for forced begging; Mauritanian girls, as well as girls from Mali, Senegal, The Gambia, and other West African countries, are forced into domestic servitude; Mauritanian women and girls are forced into prostitution domestically or transported to countries in the Middle East for the same purpose, sometimes through forced marriages

tier rating: Tier 3—Mauritania does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; anti-trafficking law enforcement efforts were negligible; one slavery case identified by an NGO was investigated, but no prosecutions or convictions were made, including among the 4,000 child labor cases NGOs referred to the police; the 2007 anti-slavery law remains ineffective because it requires slaves, most of whom are illiterate, to file their own legal

complaint, and the government agency that can submit claims on them did not file any in 2014; authorities arrested, prosecuted, and convicted several anti-slavery activists; NGOs continued to provide the majority of protective services to trafficking victims without support from the government; some steps were taken to raise public awareness about human trafficking (2015)

MAURITIUS

INTRODUCTION

Background: Although known to Arab and Malay sailors as early as the 10th century, Mauritius was first explored by the Portuguese in the 16th century and subsequently settled by the Dutch—who named it in honor of Prince Maurits van NASSAU—in the 17th century. The French assumed control in 1715, developing the island into an important naval base overseeing Indian Ocean trade, and establishing a plantation economy of sugar cane. The British captured the island in 1810, during the Napoleonic Wars. Mauritius remained a strategically important British naval base, and later an

air station, playing an important role during World War II for anti-submarine and convoy operations, as well as the collection of signals intelligence. Independence from the UK was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has one of Africa's highest per capita incomes.

Religions: Hindu 48.5%, Roman Catholic 26.3%, Muslim 17.3%, other Christian 6.4%, other 0.6%, none 0.7%, unspecified 0.1% (2011 est.)

Demographic profile: Mauritius has transitioned from a country of high fertility and high mortality rates in the 1950s and mid-1960s to one with among the lowest population growth rates in the developing world today. After World War II, Mauritius' population began to expand quickly due to increased fertility and a dramatic drop in mortality rates as a result of improved health care and the eradication of malaria. This period of heightened population growth—reaching about 3% a year—was followed by one of the world's most rapid birth rate declines.

The total fertility rate fell from 6.2 children per women in 1963 to 3.2 in 1972—largely the result of improved educational attainment, especially among young women, accompanied by later marriage and the adoption of family planning methods. The family planning programs' success was due to support from the government and eventually the traditionally pronatalist religious communities, which both recognized that controlling population growth was necessary because of Mauritius' small size and limited resources. Mauritius' fertility rate has consistently been below replacement level since the late 1990s, a rate that is substantially lower than nearby countries in southern Africa.

With no indigenous population, Mauritius' ethnic mix is a product of more than two centuries of European colonialism and continued international labor migration. Sugar production relied on slave labor mainly from Madagascar, Mozambique, and East Africa from the early 18th century until its abolition in 1835, when slaves were replaced with indentured Indians. Most of the influx of indentured labor—peaking between the late 1830s and early 1860—settled permanently creating massive population growth of more than 7% a year and reshaping the island's social and cultural composition. While Indians represented about 12% of Mauritius' population in 1837, they and their descendants accounted for roughly two-thirds by the end of the 19th century. Most were Hindus, but the majority

of the free Indian traders were Muslims.

Mauritius again turned to overseas labor when its success in clothing and textile exports led to a labor shortage in the mid-1980s. Clothing manufacturers brought in contract workers (increasingly women) from China, India, and, to a lesser extent Bangladesh and Madagascar, who worked longer hours for lower wages under poor conditions and were viewed as more productive than locals. Downturns in the sugar and textile industries in the mid-2000s and a lack of highly qualified domestic workers for Mauritius' growing services sector led to the emigration of low-skilled workers and a reliance on skilled foreign labor. Since 2007, Mauritius has pursued a circular migration program to enable citizens to acquire new skills and savings abroad and then return home to start businesses and to invest in the country's development.

ECONOMY

Economy—overview: Since independence in 1968, Mauritius has undergone a remarkable economic transformation from a low-income, agriculturally based economy to a diversified, upper middle-income economy with growing industrial, financial, and tourist sectors. Mauritius has achieved steady growth over the last several decades, resulting in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure.

The economy currently depends on sugar, tourism, textiles and apparel, and financial services, but is expanding into fish processing, information and communications technology, and hospitality and property development. Sugarcane is grown on about 90% of the cultivated land area and accounts for 15% of export

earnings. The government's development strategy centers on creating vertical and horizontal clusters of development in these sectors. Mauritius has attracted more than 32,000 offshore entities, many aimed at commerce in India, South Africa, and China. Investment in the banking sector alone has reached over \$1 billion. Mauritius' textile sector has taken advantage of the Africa Growth and Opportunity Act, a preferential trade program that allows duty free access to the US market, with Mauritian exports to the US growing by 40% from 2000 to 2014.

Mauritius' sound economic policies and prudent banking practices helped mitigate negative effects of the global financial crisis in 2008-09. GDP grew in the 3-4% per year range in 2010-16, and the country continues to expand its trade and investment outreach around the globe. Growth in the US and Europe fostered goods and services exports, including tourism, while lower oil prices kept inflation low in 2016. Mauritius continues to rank first in sub-Saharan Africa on the World Bank's Doing Business Report.

TRANSNATIONAL ISSUES

Disputes—international: Mauritius and Seychelles claim the Chagos Islands; claims French-administered Tromelin Island

Trafficking in persons: current situation: Mauritius is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; Mauritian girls are induced or sold into prostitution, often by peers, family members, or businessmen offering other forms of employment; Mauritian adults have been identified as labor trafficking victims in the UK, Belgium, and Canada, while Mauritian women from Rodrigues Island are also subject to domestic servitude in Mauritius; Malagasy women transit Mauritius en route to the Middle East for jobs as domestic servants and subsequently are subjected to forced labor; Cambodian men are victims of forced labor on foreign fishing vessels in Mauritius' territorial waters; other migrant workers from East and South Asia and Madagascar are also subject to forced labor in Mauritius' manufacturing and construction sectors

tier rating: Tier 2 Watch List—Mauritius does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, the government made modest efforts to address child sex trafficking but none related to adult forced labor; law enforcement lacks an understanding of trafficking crimes outside of child sex trafficking, despite increasing evidence of other forms of human trafficking; authorities made no trafficking prosecutions or convictions and made modest efforts to assist a couple of child sex trafficking victims; officials sustained an extensive public awareness campaign to prevent child sex trafficking, but no efforts were made to raise awareness or reduce demand for forced adult or child labor (2015)

Illicit drugs: consumer and transshipment point for heroin from South Asia; small amounts of cannabis produced and consumed

locally; significant offshore financial industry creates potential for money laundering, but corruption levels are relatively low and the government appears generally to be committed to regulating its banking industry

MEXICO

INTRODUCTION

Background: The site of several advanced Amerindian civilizations—including the Olmec, Toltec, Teotihuacan, Zapotec, Maya, and Aztec—Mexico was conquered and colonized by Spain in the early 16th century. Administered as the Viceroyalty of New Spain for three centuries, it achieved independence early in the 19th century. Elections held in 2000 marked the first time since the 1910 Mexican Revolution that an opposition candidate—Vicente FOX of the National Action Party (PAN)—defeated the party in government, the Institutional Revolutionary Party (PRI). He was succeeded in 2006 by another PAN candidate Felipe CALDERON, but Enrique PENA NIETO regained the presidency for the PRI in 2012, and will serve as president until December 2018. The global financial crisis in late 2008 caused a massive economic downturn in Mexico the following year, although growth returned quickly in 2010. Ongoing economic and social concerns include low real wages, high underemployment, inequitable income distribution, and few advancement opportunities for the largely indigenous population in

the impoverished southern states. Since 2007, Mexico's powerful drug-trafficking organizations have engaged in bloody feuding, resulting in tens of thousands of drug-related homicides.

Flag description: three equal vertical bands of green (hoist side), white, and red; Mexico's coat of arms (an eagle with a snake in its beak perched on a cactus) is centered in the white band; green signifies hope, joy, and love; white represents peace and honesty; red stands for hardiness, bravery, strength, and valor; the coat of

arms is derived from a legend that the wandering Aztec people were to settle at a location where they would see an eagle on a cactus eating a snake; the city they founded, Tenochtitlan, is now Mexico City

note: similar to the flag of Italy, which is shorter, uses lighter shades of red and green, and does not display anything in its white band

National symbol(s): golden eagle; national colors: green, white, red

National anthem: name: “Himno Nacional Mexicano” (National Anthem of Mexico)

lyrics/music: Francisco Gonzalez BOCANEGRA/Jaime Nuno ROCA

note: adopted 1943, in use since 1854; also known as “Mexicanos, al grito de Guerra” (Mexicans, to the War Cry); according to tradition, Francisco Gonzalez BOCANEGRA, an accomplished poet, was uninterested in submitting lyrics to a national anthem contest; his fiancée locked him in a room and refused to release him until the lyrics were completed

ECONOMY

Economy—overview: Mexico’s \$2.2 trillion economy has become increasingly oriented toward manufacturing since the North American Free Trade Agreement (NAFTA) entered into force in 1994. Per capita income is roughly one-third that of the US; income distribution remains highly unequal.

Mexico has become the US’ second-largest export market and third-largest source of imports. In 2016, two-way trade in goods and services exceeded \$579 billion. Mexico has free trade agreements with 46 countries, putting more than 90% of trade under free trade agreements. In 2012, Mexico formed the Pacific Alliance with Peru, Colombia, and Chile.

Mexico’s current government, led by President Enrique PENA NIETO, has emphasized economic reforms, passing and implementing sweeping energy, financial, fiscal, and telecommunications reform legislation, among others, with the long-term aim to improve competitiveness and economic growth across the Mexican economy. Mexico began holding public auctions of exploration and development rights to select oil and gas resources in 2015 as a part of reforms that allow for private investment in the oil, gas, and electricity sectors. Mexico held its fourth auction in December 2016 and allocated 8 of 10 deepwater

fields, demonstrating Mexico's capacity to attract investment amid low oil prices. The government allocated additional fields in 2017.

Since 2013, Mexico's economic growth has averaged 2% annually, falling short of private-sector expectations that President PENA NIETO's sweeping reforms would bolster economic prospects. Growth is predicted to remain below potential given falling oil production, weak oil prices, structural issues such as low productivity, high inequality, a large informal sector employing over half of the workforce, weak rule of law, and corruption. Over the medium-term, the economy is vulnerable to global economic pressures, such as lower external demand, rising interest rates, and low oil prices—approximately 10% of government revenue comes from the state-owned oil company, PEMEX.

a potential production of 475 metric tons of raw opium; government conducts the largest independent illicit-crop eradication program in the world; continues as the primary transshipment country for US-bound cocaine from South America, with an estimated 95% of annual cocaine movements toward the US stopping in Mexico; major drug syndicates control the majority of drug trafficking throughout the country; producer and distributor of ecstasy; significant money-laundering center; major supplier of heroin and largest foreign supplier of marijuana and methamphetamine to the US market

MICRONESIA, FEDERATED STATES OF

INTRODUCTION

Background: The Caroline Islands are a widely scattered archipelago in the western Pacific Ocean; they became part of a UN Trust Territory under US administration following World War II. The eastern four island groups adopted a constitution in 1979 and chose to become the Federated States of Micronesia. (The westernmost island group became Palau.) Independence came in 1986 under a Compact of Free Association with the US, which was amended and renewed in 2004. Present concerns include large-scale unemployment, overfishing, overdependence on US foreign aid, and state perception of inequitable allocation of US aid.

ECONOMY

Economy—overview: Economic activity consists largely of subsistence farming and fishing, and government, which employs two-thirds of the adult working population and receives funding largely—58% in 2013—from Compact of Free Association assistance provided by the US. The islands have few commercially valuable mineral deposits. The potential for tourism is limited by isolation, lack of adequate facilities, and limited internal air and water transportation.

Under the terms of the original Compact, the US provided \$1.3

billion in grants and aid from 1986 to 2001. The US and the Federated States of Micronesia (FSM) negotiated a second (amended) Compact agreement in 2002-03 that took effect in 2004. The amended Compact runs for a 20-year period to 2023; during which the US will provide roughly \$2.1 billion to the FSM. The amended Compact also develops a trust fund for the FSM that will provide a comparable income stream beyond 2024 when Compact grants end.

The country's medium-term economic outlook appears fragile because of dependence on US assistance and lackluster performance of its small and stagnant private sector.

MONACO

INTRODUCTION

Background: The Genoese built a fortress on the site of present day Monaco in 1215. The current ruling GRIMALDI family first seized control in 1297 but was not able to permanently secure its holding until 1419. Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

ECONOMY

Economy—overview: Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The principality also is a banking center and has successfully sought to diversify into services and

small, high-value-added, nonpolluting industries. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas.

The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. Monaco, however, is not a tax-free shelter; it charges nearly 20% value-added tax, collects stamp duties, and companies face a 33% tax on profits unless they can show that three-quarters of profits are generated within the principality. Monaco was formally removed from the OECD's "grey list" of uncooperative tax jurisdictions in late 2009, but continues to face international pressure to abandon its banking secrecy laws and help combat tax evasion. In October 2014, Monaco officially became the 84th jurisdiction participating in the OECD's Multilateral Convention on Mutual Administrative Assistance in Tax Matters, an effort to combat offshore tax avoidance and evasion.

Monaco's reliance on tourism and banking for its economic growth has left it vulnerable to downturns in France and other European economies which are the principality's main trade partners. In 2009, Monaco's GDP fell by 11.5% as the euro-zone crisis precipitated a sharp drop in tourism and retail activity and home sales. A modest recovery ensued in 2010 and intensified in 2013, with GDP growth of more than 9%, but Monaco's economic prospects remain uncertain.

MONGOLIA

INTRODUCTION

Background: The Mongols gained fame in the 13th century when under Chinggis KHAAN they established a huge Eurasian empire through conquest. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and in the late 17th century came under Chinese rule. Mongolia declared its independence from the Manchu-led Qing Empire in 1911 and achieved limited autonomy until 1919, when it again came under Chinese control. The Mongolian Revolution of 1921 ended Chinese dominance, and a communist regime, the Mongolian People's Republic, took power in 1924.

The modern country of Mongolia, however, represents only part of the Mongols' historical homeland; today, more ethnic Mongolians live in the Inner Mongolia Autonomous Region in the People's Republic of China than in Mongolia. Since the country's peaceful democratic revolution in 1990, the ex-communist Mongolian People's Revolutionary Party (MPRP)—which took the name Mongolian People's Party (MPP) in 2010—has competed for political power with the Democratic Party (DP) and several other smaller parties, including a new party formed by former President ENKHBAYAR, which confusingly adopted for itself the MPRP name. In the country's most recent parliamentary elections in June 2016, Mongolians handed the MPP overwhelming control of Parliament, largely pushing out the DP, which had overseen a sharp decline in Mongolia's economy during its control of Parliament in the preceding years. Mongolians elected a DP member, Khaltmaa

BATTULGA, as president in 2017.

ECONOMY

Economy—overview: Foreign direct investment in Mongolia's extractive industries—which are based on extensive deposits of copper, gold, coal, molybdenum, fluorspar, uranium, tin, and tungsten—has transformed Mongolia's landlocked economy from its traditional dependence on herding and agriculture. Exports now account for more than 40% of GDP. Mongolia depends on China for more than 60% of its external trade—China receives some 90% of Mongolia's exports and supplies Mongolia with more than one-third of its imports. Mongolia also relies on Russia for 90% of its energy supplies, leaving it vulnerable to price increases. Remittances from Mongolians working abroad, particularly in South Korea, are significant.

Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession, because of political inaction, and natural disasters, as well as strong economic growth, because of market reforms and extensive privatization of the formerly state-run economy. The country opened a fledgling stock exchange in 1991. Mongolia joined the WTO in 1997 and seeks to expand its participation in regional economic and trade regimes.

Growth averaged nearly 9% per year in 2004-08 largely because of high copper prices globally and new gold production. By late 2008, Mongolia was hit by the global financial crisis and Mongolia's real economy contracted 1.3% in 2009. In early 2009, the IMF reached a \$236 million Stand-by Arrangement with Mongolia and it emerged from the crisis with a stronger banking sector and better fiscal management. In October 2009, Mongolia passed long-awaited legislation on an investment agreement to develop the Oyu Tolgoi (OT) mine, among the world's largest untapped copper-gold deposits. However, a dispute with foreign investors developing OT called into question the attractiveness of Mongolia as a destination for foreign investment. This caused a severe drop in FDI, and a slowing economy, leading to the dismissal of Prime Minister ALTANKHUYAG in November 2014. The economy had grown more than 10% per year between 2011 and 2013—largely on the strength

of commodity exports and high government spending—before slowing to 7.8% in 2014, and falling to the 2% level in 2015. Growth rebounded from a brief 1.6% contraction in the third quarter of 2016 to 5.8% during the first three quarters of 2017, largely due to rising commodity prices.

The May 2015 agreement with Rio Tinto to restart the OT mine and the subsequent \$4.4 billion finance package signing in December 2015 stemmed the loss of investor confidence. The current government has made restoring investor trust and reviving the economy its top priority, but has failed to invigorate the economy in the face of the large drop-off in foreign direct investment, mounting external debt, and a sizeable budget deficit. Mongolia secured a \$5.5 billion financial assistance package from the IMF and a host of international creditors in May 2017, which is expected to improve Mongolia's long-term fiscal and economic stability as long as Ulaanbaatar can advance the agreement's difficult contingent reforms, such as consolidating the government's off-balance sheet liabilities and rehabilitating the Mongolian banking sector.

MONTENEGRO

INTRODUCTION

Background: The use of the name Crna Gora or Black Mountain (Montenegro) began in the 13th century in reference to a highland region in the Serbian province of Zeta. The later medieval state of Zeta maintained its existence until 1496 when Montenegro finally fell under Ottoman rule. Over subsequent centuries, Montenegro managed to maintain a level of autonomy within the Ottoman Empire. From the 16th to 19th centuries, Montenegro was a theocracy ruled by a series of bishop princes; in 1852, it transformed into a secular principality. Montenegro was recognized as an independent sovereign principality at the Congress of Berlin in 1878. After World War I, during which Montenegro fought on the side of the Allies, Montenegro was absorbed by the Kingdom of Serbs, Croats, and Slovenes, which became the Kingdom of Yugoslavia in 1929. At the conclusion of World War II, it became a constituent republic of the Socialist Federal Republic of Yugoslavia. When the latter dissolved in 1992, Montenegro federated with Serbia, creating the Federal Republic of Yugoslavia and, after 2003, shifting to a looser State Union of Serbia and Montenegro. In May 2006, Montenegro invoked its right under the Constitutional

Charter of Serbia and Montenegro to hold a referendum on independence from the state union. The vote for severing ties with Serbia barely exceeded 55%—the threshold set by the EU—allowing Montenegro to formally restore its independence on 3 June 2006. Montenegro is an EU candidate country, having officially applied to join in December 2008.

Flag description: a red field bordered by a narrow golden-yellow stripe with the Montenegrin coat of arms centered; the arms consist of a double-headed golden eagle—symbolizing the unity of church and state—surmounted by a crown; the eagle holds a golden scepter in its right claw and a blue orb in its left; the breast shield over the eagle shows a golden lion passant on a green field in front of a blue sky; the lion is a symbol of episcopal authority and harkens back to the three and a half centuries when Montenegro was ruled as a theocracy

National symbol(s): double-headed eagle; national colors: red, gold

National anthem: name: “Oj, svijetla majska zoro” (Oh, Bright

Dawn of May)

lyrics/music: Sekula DRLJEVIC/unknown, arranged by Zarko MIKOVIC

note: adopted 2004; music based on a Montenegrin folk song

ECONOMY

Economy—overview: Montenegro's economy is transitioning to a market system. As of 2015, around 90% of Montenegrin state-owned companies have been privatized, including 100% of banking, telecommunications, and oil distribution. Tourism, which accounts for roughly 20% of Montenegro's GDP, brings in three times as many visitors as Montenegro's total population every year. Several new luxury tourism complexes are in various stages of development along the coast, and a number are being offered in connection with nearby boating and yachting facilities. In addition to tourism, energy and agriculture are considered two distinct pillars of the economy. Only 20% of Montenegro's hydropower potential is utilized. Montenegro plans to become a net energy exporter, and the construction of an underwater cable to Italy, which will be completed by 2018, will help meet its goal.

Montenegro uses the euro as its domestic currency, though it is not an official member of the euro zone. In January 2007, Montenegro joined the World Bank and IMF, and in December 2011, the WTO. Montenegro began negotiations to join the EU in 2012, having met the conditions set down by the European Council, which called on Montenegro to take steps to fight corruption and organized crime.

The government recognizes the need to remove impediments in order to remain competitive and open the economy to foreign investors. The biggest foreign investors in Montenegro are Russia, Italy, Cyprus, Denmark, Hungary and Serbia. Net foreign direct investment in 2016 reached \$755 million and investment per capita is one of the highest in Europe, due to a low corporate tax rate.

Montenegro is currently planning major overhauls of its road and rail networks, and possible expansions of its air transportation system. In 2014, the Government of Montenegro selected two Chinese companies to construct a 41 km-long section of the country's highway system. Montenegro has recently explored further economic cooperation with China. Cheaper borrowing costs have stimulated Montenegro's growing debt, which currently sits at

71.3% of GDP. Montenegro first instituted a value-added tax (VAT) in April 2003, and introduced differentiated VAT rates of 17% and 7% (for tourism) in January 2006. The Montenegrin Government recently said it would increase the non-tourism rate to 21% as of January 2018, with the goal of reducing its public debt.

MONTSERRAT

INTRODUCTION

Background: English and Irish colonists from St. Kitts first settled on Montserrat in 1632; the first African slaves arrived three decades later. The British and French fought for possession of the island for most of the 18th century, but it finally was confirmed as a British possession in 1783. The island's sugar plantation economy was converted to small farm landholdings in the mid-19th century. Much of this island was devastated and two-thirds of the population fled abroad because of the eruption of the Soufriere Hills Volcano that began on 18 July 1995. Montserrat has endured volcanic activity since, with the last eruption occurring in 2013.

ECONOMY

Economy—overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airport and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998 but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops.

Prospects for the economy depend largely on developments in relation to the volcanic activity and on public sector construction activity. Half of the island remains uninhabitable. In January 2013, the EU announced the disbursement of a \$55.2 million aid package to Montserrat in order to boost the country's economic recovery,

with a specific focus on public finance management, public sector reform, and prudent economic management.

MOROCCO

INTRODUCTION

Background: In 788, about a century after the Arab conquest of North Africa, a series of Moroccan Muslim dynasties began to rule in Morocco. In the 16th century, the Sa'adi monarchy, particularly under Ahmad al-MANSUR (1578-1603), repelled foreign invaders and inaugurated a golden age. The Alaouite Dynasty, to which the current Moroccan royal family belongs, dates from the 17th century. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily erode; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new country that same year. Sultan MOHAMMED V, the current monarch's grandfather, organized the new state as a constitutional monarchy and in 1957 assumed the title of king. Since Spain's 1976 withdrawal from what is today called Western Sahara, Morocco has extended its de facto administrative control to roughly 80% of this

territory; however, the UN does not recognize Morocco as the administering power for Western Sahara. The UN since 1991 has monitored a cease-fire between Morocco and the Polisario Front—Western Sahara’s liberation movement—and leads ongoing negotiations over the status of the territory.

King MOHAMMED VI in early 2011 responded to the spread of pro-democracy protests in the region by implementing a reform program that included a new constitution, passed by popular referendum in July 2011, under which some new powers were extended to parliament and the prime minister but ultimate authority remains in the hands of the monarch. In November 2011, the Justice and Development Party (PJD)—a moderate Islamist party—won the largest number of seats in parliamentary elections, becoming the first Islamist party to lead the Moroccan Government. In September 2015, Morocco held its first ever direct elections for regional councils, one of the reforms included in the 2011 constitution. The PJD again won the largest number of seats in nationwide parliamentary elections in October 2016.

PEOPLE AND SOCIETY

Population: 33,986,655 (July 2017 est.)

country comparison to the world: 40

Nationality: *noun:* Moroccan(s)

adjective: Moroccan

Ethnic groups: Arab-Berber 99%, other 1%

Languages: Arabic (official), Berber languages (Tamazight (official), Tachelhit, Tarifit), French (often the language of business, government, and diplomacy)

Religions: Muslim 99% (official; virtually all Sunni, <0.1% Shia), other 1% (includes Christian, Jewish, and Baha'i); note—Jewish about 6,000 (2010 est.)

Demographic profile: Morocco is undergoing a demographic transition. Its population is growing but at a declining rate, as people live longer and women have fewer children. Infant, child, and maternal mortality rates have been reduced through better health care, nutrition, hygiene, and vaccination coverage, although disparities between urban and rural and rich and poor households persist. Morocco's shrinking child cohort reflects the decline of its total fertility rate from 5 in mid-1980s to 2.2 in 2010, which is a result of increased female educational attainment, higher contraceptive use, delayed marriage, and the desire for smaller families. Young adults (persons aged 15-29) make up almost 26% of the total population and represent a potential economic asset if they can be gainfully employed. Currently, however, many youths are unemployed because Morocco's job creation rate has not kept pace with the growth of its working-age population. Most youths who have jobs work in the informal sector with little security or benefits.

During the second half of the 20th century, Morocco became one of the world's top emigration countries, creating large, widely dispersed migrant communities in Western Europe. The Moroccan Government has encouraged emigration since its independence in 1956, both to secure remittances for funding national development and as an outlet to prevent unrest in rebellious (often Berber) areas. Although Moroccan labor migrants earlier targeted Algeria and

France, the flood of Moroccan “guest workers” from the mid-1960s to the early 1970s spread widely across northwestern Europe to fill unskilled jobs in the booming manufacturing, mining, construction, and agriculture industries. Host societies and most Moroccan migrants expected this migration to be temporary, but deteriorating economic conditions in Morocco related to the 1973 oil crisis and tighter European immigration policies resulted in these stays becoming permanent.

A wave of family migration followed in the 1970s and 1980s, with a growing number of second generation Moroccans opting to become naturalized citizens of their host countries. Spain and Italy emerged as new destination countries in the mid-1980s, but their introduction of visa restrictions in the early 1990s pushed Moroccans increasingly to migrate either legally by marrying Moroccans already in Europe or illegally to work in the underground economy. Women began to make up a growing share of these labor migrants. At the same time, some higher-skilled Moroccans went to the US and Quebec, Canada.

In the mid-1990s, Morocco developed into a transit country for asylum seekers from sub-Saharan Africa and illegal labor migrants from sub-Saharan Africa and South Asia trying to reach Europe via southern Spain, Spain’s Canary Islands, or Spain’s North African enclaves, Ceuta and Melilla. Forcible expulsions by Moroccan and Spanish security forces have not deterred these illegal migrants or calmed Europe’s security concerns. Rabat remains unlikely to adopt an EU agreement to take back third-country nationals who have entered the EU illegally via Morocco. Thousands of other illegal migrants have chosen to stay in Morocco until they earn enough money for further travel or permanently as a “second-best” option. The launching of a regularization program in 2014 legalized the status of some migrants and granted them equal access to education, health care, and work, but xenophobia and racism remain obstacles.

ECONOMY

Economy—overview: Morocco has capitalized on its proximity to Europe and relatively low labor costs to work towards building a diverse, open, market-oriented economy. Key sectors of the economy include agriculture, tourism, aerospace, automotive, phosphates, textiles, apparel, and subcomponents. Morocco has increased investment in its port, transportation, and industrial infrastructure to position itself as a center and broker for business throughout Africa. Industrial development strategies and infrastructure improvements—most visibly illustrated by a new port and free trade zone near Tangier—are improving Morocco’s competitiveness.

In the 1980s, Morocco was a heavily indebted country before pursuing austerity measures and pro-market reforms, overseen by the IMF. Since taking the throne in 1999, King MOHAMMED VI has presided over a stable economy marked by steady growth, low inflation, and gradually falling unemployment, although poor harvests and economic difficulties in Europe contributed to an economic slowdown. To boost exports, Morocco entered into a bilateral Free Trade Agreement with the US in 2006 and an Advanced Status agreement with the EU in 2008. In late 2014, Morocco eliminated subsidies for gasoline, diesel, and fuel oil, dramatically reducing outlays that weighted on the country’s budget and current account. Subsidies on butane gas and certain food products remain in place. Morocco also seeks to expand its renewable energy capacity with a goal of making renewable more than 50% of installed electricity generation capacity by 2030.

Despite Morocco’s economic progress, the country suffers from

high unemployment, poverty, and illiteracy, particularly in rural areas. Key economic challenges for Morocco include reforming the education system and the judiciary.

TERRORISM

Terrorist groups—foreign based: *al-Qa'ida (AQ)*: *aim(s)*: drive Westerners and Western influences from Morocco and, ultimately, establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation of Sharia

area(s) of operation: maintains a limited money laundering presence; al-Qa'ida attacks over the years galvanized the populace to protest against group; authorities continue to pursue members and supporters for arrest; on 16 May 2003, a team of 12 suicide bombers attacked five targets in Casablanca, killing 43 civilians and

injuring at least 100; they attacked a Spanish restaurant, a Jewish community, a Jewish cemetery, a hotel, and the Belgian Consulate

Islamic State of Iraq and the Levant (ISIL): *aim(s)*: enhance its recruitment network and, ultimately, replace the Moroccan Government with an Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: maintains an operational and recruitment presence across the country, where authorities have taken members into custody in most of Morocco's major cities; authorities have seized weapons and bombmaking materials since 2014, foiling several ISIL attacks and plots to assassinate military and security officers; hundreds of ISIL's fighters in Syria were recruited in Morocco

TRANSNATIONAL ISSUES

Disputes—international: claims and administers Western Sahara whose sovereignty remains unresolved; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); discussions have not progressed on a comprehensive maritime delimitation, setting limits on resource exploration and refugee interdiction, since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; the National Liberation Front's assertions of a claim to Chirac Pastures in southeastern Morocco is a dormant dispute

Illicit drugs: the world's largest producer and exporter of cannabis; total production for 2015-2016 growing season estimated to be 700 metric tons; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe; significant consumer of cannabis

MOZAMBIQUE

INTRODUCTION

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid-1990s. The ruling Front for the Liberation of Mozambique (FRELIMO) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between FRELIMO and rebel Mozambique National Resistance (RENAMO) forces ended the fighting in 1992. In 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando GUEBUZA, served two terms and then passed executive power to Filipe NYUSI in 2014. RENAMO's residual armed forces have intermittently engaged in a low-level insurgency since 2012, although a late December 2016 ceasefire held throughout 2017.

Demographic profile: Mozambique is a poor, sparsely populated country with high fertility and mortality rates and a rapidly growing youthful population—45% of the population is younger than 15. Mozambique's high poverty rate is sustained by natural disasters, disease, high population growth, low agricultural productivity, and the unequal distribution of wealth. The country's birth rate is among the world's highest, averaging around more than 5 children per woman (and higher in rural areas) for at least the last three decades. The sustained high level of fertility reflects gender inequality, low contraceptive use, early marriages and childbearing, and a lack of education, particularly among women. The high population growth rate is somewhat restrained by the country's high HIV/AIDS and overall mortality rates. Mozambique ranks among the worst in the world for HIV/AIDS prevalence, HIV/AIDS deaths, and life expectancy at birth.

Mozambique is predominantly a country of emigration, but internal, rural-urban migration has begun to grow. Mozambicans, primarily from the country's southern region, have been migrating to South Africa for work for more than a century. Additionally, approximately 1.7 million Mozambicans fled to Malawi, South Africa, and other neighboring countries between 1979 and 1992 to escape from civil war. Labor migrants have usually been men from rural areas whose crops have failed or who are unemployed and

have headed to South Africa to work as miners; multiple generations of the same family often become miners. Since the abolition of apartheid in South Africa in 1991, other job opportunities have opened to Mozambicans, including in the informal and manufacturing sectors, but mining remains their main source of employment.

ECONOMY

Economy—overview: At independence in 1975, Mozambique was one of the world's poorest countries. Socialist policies, economic mismanagement, and a brutal civil war from 1977 to 1992 further impoverished the country. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, propelled the country's GDP from \$4 billion in 1993, following the war, to about \$37 billion in 2017. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities.

In spite of these gains, more than half the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force. Citizens rioted in September 2010 after fuel, water, electricity, and bread price increases were announced. In an attempt to lessen the negative impact on the population, the government implemented subsidies,

decreased taxes and tariffs, and instituted other fiscal measures.

A substantial trade imbalance persists, although aluminum production from the Mozal Aluminum Smelter has significantly boosted export earnings in recent years. In 2012, the Mozambican Government took over Portugal's last remaining share in the Cahora Bassa Hydroelectricity Company, a significant contributor to the Southern African Power Pool. The government has plans to expand the Cahora Bassa Dam and build additional dams to increase its electricity exports and fulfill the needs of its burgeoning domestic industries.

Mozambique's once substantial foreign debt was reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives. However, in 2016, information surfaced revealing that the Mozambican Government was responsible for over \$2 billion in government-backed loans originally secured between 2012-14 by state-owned defense and security companies without parliamentary approval or national budget inclusion, which prompted the IMF and international donors to halt direct budget support to the Government of Mozambique. Mozambique grew at an average annual rate of 6%-8% in the decade leading up to 2015, one of Africa's strongest performances, but growth slowed in 2016. The sizable external debt burden, donor withdrawal, elevated inflation, and currency depreciation contributed to slower growth in 2016-17.

Two major international consortiums are seeking approval to develop massive natural gas deposits off the coast of Cabo Delgado province, in what has the potential to become the largest infrastructure project in Africa. The government predicts sales of liquefied natural gas from these projects could generate several billion dollars in revenues annually sometime after 2022.

NAMIBIA

INTRODUCTION

Background: South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966, the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that became Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia has been governed by SWAPO since the country won independence in 1990, though the party has dropped much of its Marxist ideology. Prime Minister Hage GEINGOB was elected president in 2014 in a landslide victory, replacing Hifikepunye POHAMBA who stepped down after serving two terms. SWAPO

retained its parliamentary super majority in the 2014 elections and established a system of gender parity in parliamentary positions.

Languages: Oshivambo languages 48.9%, Nama/Damara 11.3%, Afrikaans 10.4% (common language of most of the population and about 60% of the white population), Otjiherero languages 8.6%,

Kavango languages 8.5%, Caprivi languages 4.8%, English (official) 3.4%, other African languages 2.3%, other 1.7%

note: Namibia has 13 recognized national languages, including 10 indigenous African languages and 3 Indo-European languages (2011 est.)

Religions: Christian 80% to 90% (at least 50% Lutheran), indigenous beliefs 10% to 20%

Demographic profile: Planning officials view Namibia's reduced population growth rate as sustainable based on the country's economic growth over the past decade. Prior to independence in 1990, Namibia's relatively small population grew at about 3% annually, but declining fertility and the impact of HIV/AIDS slowed this growth to 1.4% by 2011, rebounding to close to 2% by 2016. Namibia's fertility rate has fallen over the last two decades—from about 4.5 children per woman in 1996 to 3.4 in 2016—due to increased contraceptive use, higher educational attainment among women, and greater female participation in the labor force. The average age at first birth has stayed fairly constant, but the age at first marriage continues to increase, indicating a rising incidence of premarital childbearing.

The majority of Namibians are rural dwellers (about 55%) and live in the better-watered north and northeast parts of the country. Migration, historically male-dominated, generally flows from northern communal areas—non-agricultural lands where blacks were sequestered under the apartheid system—to agricultural, mining, and manufacturing centers in the center and south. After independence from South Africa, restrictions on internal movement eased, and rural-urban migration increased, bolstering urban growth.

Some Namibians—usually persons who are better-educated, more affluent, and from urban areas—continue to legally migrate to South Africa temporarily to visit family and friends and, much less frequently, to pursue tertiary education or better economic opportunities. Namibians concentrated along the country's other borders make unauthorized visits to Angola, Zambia, Zimbabwe, or Botswana, to visit family and to trade agricultural goods. Few Namibians express interest in permanently settling in other countries; they prefer the safety of their homeland, have a strong national identity, and enjoy a well-supplied retail sector. Although

Namibia is receptive to foreign investment and cross-border trade, intolerance toward non-citizens is widespread.

ECONOMY

Economy—overview: Namibia's economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 11.5% of GDP, but provides more than 50% of foreign exchange earnings. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Marine diamond mining is increasingly important as the terrestrial diamond supply has dwindled. The rising cost of mining diamonds, especially from the sea, combined with increased diamond production in Russia and China, has reduced profit margins. Namibian authorities have emphasized the need to add value to raw materials, do more in-country manufacturing, and exploit the services market, especially in the logistics and transportation sectors.

Namibia is the world's fifth-largest producer of uranium. The Chinese-owned Husab uranium mine is expected to start producing uranium ore in 2017. Once the Husab mine reaches full production, Namibia is expected to become the world's second-largest producer of uranium. Namibia also produces large quantities of zinc and is a

smaller producer of gold and copper. Namibia's economy remains vulnerable to world commodity price fluctuations and drought.

Namibia normally imports about 50% of its cereal requirements; in drought years, food shortages are problematic in rural areas. A high per capita GDP, relative to the region, obscures one of the world's most unequal income distributions. A priority of the current government is poverty eradication. Despite a drought, real GDP growth remained strong in 2015 because of construction in the mining and housing sectors, coupled with an expansionary fiscal policy. GDP growth in 2017 slowed to about 1%, however, due to contractions in both the construction and mining sectors, as well as the ongoing drought. Growth is expected to recover modestly in 2018.

A five-year Millennium Challenge Corporation compact ended in September 2014. As an upper middle income country, Namibia is ineligible for a second compact. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged one-to-one to the South African rand. Namibia receives 30%-40% of its revenues from the Southern African Customs Union (SACU); volatility in the size of Namibia's annual SACU allotment and global mineral prices complicates budget planning.

TRANSNATIONAL ISSUES

Disputes—international: concerns from international experts and local populations over the Okavango Delta ecology in Botswana and human displacement scuttled Namibian plans to construct a hydroelectric dam on Popa Falls along the Angola-Namibia border; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River; Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Trafficking in persons: current situation: Namibia is a country of origin and destination for children and, to a lesser extent, women subjected to forced labor and sex trafficking; victims, lured by promises of legitimate jobs, are forced to work in urban centers and on commercial farms; traffickers exploit Namibian children, as well as children from Angola, Zambia, and Zimbabwe, for forced labor in

agriculture, cattle herding, domestic service, fishing, and street vending; children are also forced into prostitution, often catering to tourists from southern Africa and Europe; San and Zemba children are particularly vulnerable; foreign adults and Namibian adults and children are reportedly subjected to forced labor in Chinese-owned retail, construction, and fishing operations

tier rating: Tier 2 Watch List—Namibia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; Namibia was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; in 2015, the Child Care and Protection Bill passed, criminalizing child trafficking; the government's first sex trafficking prosecution remained pending; no new prosecutions were initiated and no trafficking offenders have ever been convicted; accusations of forced labor at Chinese construction and mining companies continue to go uninvestigated; authorities failed to fully implement victim identification and referral processes, which led to the deportation of possible victims (2015)

NAVASSA ISLAND

INTRODUCTION

Background: This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the US Coast Guard to the Department of the Interior, Office of Insular Affairs. A 1998 scientific expedition to the island described it as a “unique preserve of Caribbean biodiversity.” The following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

NEPAL

INTRODUCTION

Background: During the late 18th-early 19th centuries, the principality of Gorkha united many of the other principalities and states of the sub-Himalayan region into a Nepalese Kingdom. Nepal retained its independence following the Anglo-Nepalese War of 1814-16 and the subsequent peace treaty laid the foundations for two centuries of amicable relations between Britain and Nepal. (The Brigade of Gurkhas continues to serve in the British Army to the present day.) In 1951, the Nepali monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system that brought political parties into the government. That arrangement lasted until 1960, when political parties were again banned, but was reinstated in 1990 with the establishment of a multiparty democracy within the framework of a constitutional monarchy.

An insurgency led by Maoists broke out in 1996. The ensuing 10-year civil war between Maoist and government forces witnessed the dissolution of the cabinet and parliament and the re-assumption of absolute power by the king in 2002. A peace accord in 2006 led to the promulgation of an interim constitution in 2007. Following a nationwide Constituent Assembly (CA) election in 2008, the newly formed CA declared Nepal a federal democratic republic, abolished the monarchy, and elected the country's first president. After the CA failed to draft a constitution by a May 2012 deadline set by the Supreme Court, then-Prime Minister Baburam BHATTARAI dissolved the CA. Months of negotiations ensued until March 2013

when the major political parties agreed to create an interim government headed by then-Chief Justice Khil Raj REGMI with a mandate to hold elections for a new CA. Elections were held in November 2013, in which the Nepali Congress won the largest share of seats in the CA and in February 2014 formed a coalition government with the second place Communist Party of Nepal—Unified Marxist-Leninist and with Nepali Congress President Sushil KOIRALA as prime minister. Nepal’s new constitution came into effect in September 2015, at which point the CA became the Parliament. Khagda Prasad Sharma OLI served as the first post-constitution prime minister from October 2015–August 2016, when a new coalition led by Maoist leader Pushpa Kamal DAHAL (aka “Prachanda”) took over the premiership. The constitution provided for a transitional period during which three sets of elections—local, provincial, and national—needed to take place. The first local elections in 20 years occurred in three phases between May and September 2017, while state and federal elections proceeded in two phases in November and December 2017.

Flag description: crimson red with a blue border around the unique shape of two overlapping right triangles; the smaller, upper triangle bears a white stylized moon and the larger, lower triangle displays a white 12-pointed sun; the color red represents the rhododendron (Nepal's national flower) and is a sign of victory and bravery, the blue border signifies peace and harmony; the two right triangles are a combination of two single pennons (pennants) that originally symbolized the Himalaya Mountains while their charges represented the families of the king (upper) and the prime minister, but today they are understood to denote Hinduism and Buddhism, the country's two main religions; the moon represents the serenity of the Nepalese people and the shade and cool weather in the

Himalayas, while the sun depicts the heat and higher temperatures of the lower parts of Nepal; the moon and the sun are also said to express the hope that the nation will endure as long as these heavenly bodies

note: Nepal is the only country in the world whose flag is not rectangular or square

National symbol(s): rhododendron blossom; national color: red

National anthem: name: “Sayaun Thunga Phool Ka” (Hundreds of Flowers)

lyrics/music: Pradeep Kumar RAI/Ambar GURUNG

note: adopted 2007; after the abolition of the monarchy in 2006, a new anthem was required because of the previous anthem’s praise for the king

ECONOMY

Economy—overview: Nepal is among the least developed countries in the world, with about one-quarter of its population living below the poverty line. Nepal is heavily dependent on remittances, which amount to as much as 30% of GDP. Agriculture is the mainstay of the economy, providing a livelihood for almost two-thirds of the population but accounting for only one-third of GDP. Industrial activity mainly involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain.

Nepal has considerable scope for exploiting its potential in hydropower, with an estimated 42,000 MW of commercially feasible capacity. Nepal and India signed trade and investment agreements in 2014 that increase Nepal’s hydropower potential, but political uncertainty and a difficult business climate have hampered foreign investment.

Nepal was hit by massive earthquakes in early 2015, which damaged or destroyed infrastructure and homes and set back economic development. Political gridlock in the past several years and recent public protests, predominantly in the southern Tarai region, have hindered post-earthquake recovery and prevented much-needed economic reform. Additional challenges to Nepal’s growth include its landlocked geographic location, persistent power shortages, and underdeveloped transportation infrastructure.

NETHERLANDS

INTRODUCTION

Background: The Dutch United Provinces declared their independence from Spain in 1579; during the 17th century, they became a leading seafaring and commercial power, with settlements and colonies around the world. After a 20-year French occupation, a Kingdom of the Netherlands was formed in 1815. In 1830, Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered German invasion and occupation in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU) and participated in the introduction of the euro in 1999. In October 2010, the former Netherlands Antilles was dissolved and the three smallest islands—Bonaire, Sint Eustatius, and Saba—became special municipalities in the Netherlands administrative structure. The larger islands of Sint Maarten and Curacao joined the Netherlands and Aruba as constituent countries forming the Kingdom of the Netherlands.

In February 2018, the Sint Eustatius island council (governing body) was dissolved and replaced by a government commissioner to restore order on the island. Dutch Government neglect had brought on lawlessness and financial mismanagement necessitating the intervention, which was described as being as “short as possible and as long as needed.”

GOVERNMENT

Country name: *conventional long form*: Kingdom of the Netherlands

conventional short form: Netherlands

local long form: Koninkrijk der Nederlanden

local short form: Nederland

etymology: the country name literally means “the lowlands” and refers to the geographic features of the land being both flat and down river from higher areas (i.e., at the estuaries of the Scheldt, Meuse, and Rhine Rivers; only about half of the Netherlands is more than 1 meter above sea level)

Government type: parliamentary constitutional monarchy; part of the Kingdom of the Netherlands

Capital: *name*: Amsterdam; note—The Hague is the seat of government

geographic coordinates: 52 21 N, 4 55 E

time difference: UTC + 1 (6 hours ahead of Washington, DC, during Standard Time)

daylight saving time: + 1hr, begins last Sunday in March; ends last Sunday in October

note: time descriptions apply to the continental Netherlands only, not to the constituent countries in the Caribbean

Administrative divisions: 12 provinces (provincies, singular—provincie); Drenthe, Flevoland, Fryslan (Friesland), Gelderland, Groningen, Limburg, Noord-Brabant (North Brabant), Noord-Holland (North Holland), Overijssel, Utrecht, Zeeland (Zealand), Zuid-Holland (South Holland)

note 1: the Netherlands is one of four constituent countries of the Kingdom of the Netherlands; the other three, Aruba, Curacao, and Sint Maarten, are all islands in the Caribbean; while all four parts are considered equal partners, in practice, most of the Kingdom's affairs are administered by the Netherlands, which makes up about 98% of the Kingdom's total land area and population

note 2: three other Caribbean islands, Bonaire, Saint Eustatius, and Saba, are considered to be special municipalities of the Netherlands proper

Dependent areas: Aruba, Curacao, Sint Maarten

Independence: 23 January 1579 (the northern provinces of the Low Countries conclude the Union of Utrecht breaking with Spain; on 26 July 1581 they formally declared their independence with an Act of Abjuration; however, it was not until 30 January 1648 and the Peace of Westphalia that Spain recognized this independence)

National holiday: King's Day (birthday of King WILLEM-ALEXANDER), 27 April (1967); note—King's or Queen's Day are observed on the ruling monarch's birthday; celebrated on 26 April if 27 April is a Sunday

Constitution: history: previous 1597, 1798; latest adopted 24 August 1815 (substantially revised in 1848)

amendments: proposed as an "Act of Parliament" by or on behalf of the king or by the Second Chamber of the States General; the Second Chamber is dissolved after its first reading of the "Act"; passage requires a second reading by both the First Chamber and newly elected Second Chamber, followed by at least two-thirds majority vote of both chambers, and ratification by the king;

amended many times, last in 2010 (2016)

Legal system: civil law system based on the French system; constitution does not permit judicial review of acts of the States General

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICCt jurisdiction

Citizenship: *citizenship by birth:* no

citizenship by descent only: at least one parent must be a citizen of the Netherlands

dual citizenship recognized: no

residency requirement for naturalization: 5 years

Suffrage: 18 years of age; universal

Executive branch: *chief of state:* King WILLEM-ALEXANDER (since 30 April 2013); Heir Apparent Princess Catharina-Amalia (since 30 April 2013)

cabinet: Council of Ministers appointed by the monarch

elections/appointments: the monarchy is hereditary; following Second Chamber elections, the leader of the majority party or majority coalition usually appointed prime minister by the monarch; deputy prime ministers appointed by the monarch

Legislative branch: *description:* bicameral States General or Staten Generaal consists of the First Chamber or Eerste Kamer (75 seats; members indirectly elected by the country's 12 provincial council members by proportional representation vote; members serve 4-year terms) and the Second Chamber or Tweede Kamer (150 seats; members directly elected in multi-seat constituencies by proportional representation vote to serve up to 4-year terms)

elections: First Chamber—last held on 26 May 2015 (next to be held in May 2019); Second Chamber—last held on 15 March 2017 (next to be held 15 March 2021)

election results: First Chamber—percent of vote by party—NA; seats by party—VVD 13, CDA 12, D66 10, PVV 9, SP 9, PvdA 8, GL 4, CU 3, other 7; Second Chamber—percent of vote by party—VVD

Flag description: three equal horizontal bands of red (bright vermilion; top), white, and blue (cobalt); similar to the flag of Luxembourg, which uses a lighter blue and is longer; the colors were derived from those of WILLIAM I, Prince of Orange, who led the Dutch Revolt against Spanish sovereignty in the latter half of the 16th century; originally the upper band was orange, but because its dye tended to turn red over time, the red shade was eventually made the permanent color; the banner is perhaps the oldest tricolor in continuous use

National symbol(s): lion, tulip; national color: orange

National anthem: name: “Het Wilhelmus” (The William)

lyrics/music: Philips VAN MARNIX van Sint Aldegonde (presumed)/ unknown

note: adopted 1932, in use since the 17th century, making it the oldest national anthem in the world; also known as “Wilhelmus van Nassouwe” (William of Nassau), it is in the form of an acrostic, where the first letter of each stanza spells the name of the leader of the Dutch Revolt

ECONOMY

Economy—overview: The Netherlands, the sixth-largest economy in the European Union, plays an important role as a European transportation hub, with a consistently high trade surplus, stable industrial relations, and low unemployment. Industry focuses on food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs only 2% of the labor force but provides large surpluses for food-processing and underpins the country’s status as the world’s second largest agricultural exporter.

The Netherlands is part of the euro zone, and as such, its monetary policy is controlled by the European Central Bank. The Dutch financial sector is highly concentrated, with four commercial banks possessing over 80% of banking assets, and is four times the size of Dutch GDP.

In 2008, during the financial crisis, the government budget deficit hit 5.3% of GDP. Following a protracted recession from 2009 to 2013, during which unemployment doubled to 7.4% and household consumption contracted for four consecutive years, economic growth began inching forward in 2014. Since 2010, Prime Minister Mark RUTTE’s government has implemented significant austerity measures to improve public finances and has instituted broad structural reforms in key policy areas, including the labor market, the housing sector, the energy market, and the pension system. In 2017, the government budget returned to a surplus of 0.7% of GDP, with economic growth of 3.2%, and GDP per capita finally surpassed pre-crisis levels. The fiscal policy announced by the new government in the 2018-2021 coalition plans for increases in government consumption and public investment, fueling domestic demand and household consumption and investment. The new government’s policy also plans to increase demand for workers in

the public and private sector, forecasting a further decline in the unemployment rate, which hit 4.8% in 2017.

NEW CALEDONIA

INTRODUCTION

Background: Settled by both Britain and France during the first half of the 19th century, the island became a French possession in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s ended in the 1998 Noumea Accord, which over the past 20 years has transferred an increasing amount of governing responsibility from France to New Caledonia. The agreement also commits France to conduct a referendum by November 2018 for residents to decide whether New Caledonia should assume full sovereignty and independence.

Flag description: New Caledonia has two official flags; alongside the flag of France, the Kanak (indigenous Melanesian) flag has equal status; the latter consists of three equal horizontal bands of blue (top), red, and green; a large yellow disk—diameter two-thirds the height of the flag—shifted slightly to the hoist side is edged in black and displays a black fleche faitiere symbol, a native rooftop adornment

National symbol(s): fleche faitiere (native rooftop adornment), kagu bird; national colors: blue, red, green, yellow, black

National anthem: name: “Soyons unis, devenons freres” (Let Us Be United, Let Us Become Brothers)

lyrics/music: Chorale Melodia (a local choir)

note: adopted 2008; contains a mixture of lyrics in both French and Nengone (an indigenous language); as a self-governing territory of France, in addition to the local anthem, “La Marseillaise” is official (see France)

ECONOMY

Economy—overview: New Caledonia has 11% of the world’s nickel reserves, representing the second largest reserves on the planet. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France—equal to more than 15% of GDP—and tourism are keys to the health of the economy.

During 2009-10, France sent more development assistance to New Caledonia than to any of its other overseas territories. In October 2014, French Prime Minister Manuel VALLS confirmed financial support to New Caledonia totaling \$500 million for the period 2016-20. The new government, which inherited a \$112 million deficit in 2013, is expected to focus on bringing the territory’s budget back into balance.

With the gradual increase in the production of two new nickel plants in 2015, average production of metallurgical goods stood at a record level of 94 thousand tons. However, the sector is exposed to the high volatility of nickel prices. In April 2016, PM VALLS committed \$180 million to support New Caledonia’s main nickel company, Societe Le Nickel.

NEW ZEALAND

INTRODUCTION

Background: The Polynesian Maori reached New Zealand in about

A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. That same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both world wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

National anthem: name: “God Defend New Zealand”

lyrics/music: Thomas BRACKEN [English], Thomas Henry SMITH [Maori]/John Joseph WOODS

note: adopted 1940 as national song, adopted 1977 as co-national anthem; New Zealand has two national anthems with equal status; as a commonwealth realm, in addition to “God Defend New Zealand,” “God Save the Queen” serves as a national anthem (see United Kingdom); “God Save the Queen” normally played only when a member of the royal family or the governor-general is present; in all other cases, “God Defend New Zealand” is played

ECONOMY

Economy—overview: Over the past 40 years, the government has transformed New Zealand from an agrarian economy, dependent on concessionary British market access, to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes, but left behind some at the bottom of the ladder and broadened and deepened the technological capabilities of the industrial sector.

Per capita income rose for 10 consecutive years until 2007 in purchasing power parity terms, but fell in 2008-09. Debt-driven consumer spending drove robust growth in the first half of the decade, fueling a large balance of payments deficit that posed a challenge for policymakers. Inflationary pressures caused the central bank to raise its key rate steadily from January 2004 until it was among the highest in the OECD in 2007 and 2008. The higher rate attracted international capital inflows, which strengthened the

currency and housing market while aggravating the current account deficit. Rising house prices, especially in Auckland, have become a political issue in recent years, as well as a policy challenge in 2016 and 2017, as the ability to afford housing has declined for many.

Expanding New Zealand's network of free trade agreements remains a top foreign policy priority. New Zealand was an early promoter of the Trans-Pacific Partnership (TPP) and was the second country to ratify the agreement in May 2017. Following the United States' withdrawal from the TPP in January 2017, on 10 November 2017 the remaining 11 countries agreed on the core elements of a modified agreement, which they renamed the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP). In November 2016, New Zealand opened negotiations to upgrade its FTA with China; China is one of New Zealand's most important trading partners.

NICARAGUA

INTRODUCTION

Background: The Pacific coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas led by Daniel ORTEGA Saavedra to power in 1979. Nicaraguan aid to leftist rebels in El Salvador prompted the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. After losing free and fair elections in 1990, 1996, and 2001, former Sandinista President Daniel ORTEGA was elected president in 2006, 2011, and most recently in 2016. Municipal, regional, and national-level elections since 2008 have been marred by widespread irregularities. Nicaragua's infrastructure and economy—hard hit by the earlier civil war and by Hurricane Mitch in 1998—are being rebuilt, but democratic institutions have weakened under the ORTEGA

administration as the president has garnered full control over all four branches of government: the presidency, the judicial, the National Assembly, and the Supreme Electoral Council.

note: English and indigenous languages found on the Caribbean coast (2005 est.)

Religions: Roman Catholic 51.6%, Evangelical 33.9%, other 1.5%, unspecified 12.9%, none 0.2% (2016 est.)

Demographic profile: Despite being one of the poorest countries in Latin America, Nicaragua has improved its access to potable water and sanitation and has ameliorated its life expectancy, infant and child mortality, and immunization rates. However, income distribution is very uneven, and the poor, agriculturalists, and indigenous people continue to have less access to healthcare services. Nicaragua's total fertility rate has fallen from around 6 children per woman in 1980 to below replacement level today, but the high birth rate among adolescents perpetuates a cycle of poverty and low educational attainment.

Nicaraguans emigrate primarily to Costa Rica and to a lesser extent the United States. Nicaraguan men have been migrating seasonally to Costa Rica to harvest bananas and coffee since the early 20th century. Political turmoil, civil war, and natural disasters from the 1970s through the 1990s dramatically increased the flow of refugees and permanent migrants seeking jobs, higher wages, and better social and healthcare benefits. Since 2000, Nicaraguan emigration to Costa Rica has slowed and stabilized. Today roughly 300,000 Nicaraguans are permanent residents of Costa Rica—about

75% of the foreign population—and thousands more migrate seasonally for work, many illegally.

Flag description: three equal horizontal bands of blue (top), white, and blue with the national coat of arms centered in the white band; the coat of arms features a triangle encircled by the words REPUBLICA DE NICARAGUA on the top and AMERICA CENTRAL on the bottom; the banner is based on the former blue-white-blue flag of the Federal Republic of Central America; the blue bands symbolize the Pacific Ocean and the Caribbean Sea, while the white band represents the land between the two bodies of water

note: similar to the flag of El Salvador, which features a round emblem encircled by the words REPUBLICA DE EL SALVADOR EN LA AMERICA CENTRAL centered in the white band; also similar to the flag of Honduras, which has five blue stars arranged in an X pattern centered in the white band

National symbol(s): turquoise-browed motmot (bird); national colors: blue, white

National anthem: name: “Salve a ti, Nicaragua” (Hail to Thee, Nicaragua)

lyrics/music: Salomon Ibarra MAYORGA/traditional, arranged by Luis Abraham DELGADILLO

note: although only officially adopted in 1971, the music was approved in 1918 and the lyrics in 1939; the tune, originally from Spain, was used as an anthem for Nicaragua from the 1830s until 1876

ECONOMY

Economy—overview: Nicaragua, the poorest country in Central America and the second poorest in the Western Hemisphere, has widespread underemployment and poverty. GDP growth of 4.5% in 2017 was insufficient to make a significant difference. Textiles and agriculture combined account for nearly 50% of Nicaragua’s exports. Beef, coffee, and gold are Nicaragua’s top three export commodities.

The Dominican Republic-Central America-United States Free Trade Agreement has been in effect since April 2006 and has expanded export opportunities for many Nicaraguan agricultural and manufactured goods.

In 2013, the government granted a 50-year concession with the option for an additional 50 years to a newly formed Chinese-run company to finance and build an inter-oceanic canal and related projects, at an estimated cost of \$50 billion. The canal construction has not started.

Nicaragua to the ICJ over offshore oil concessions in the disputed region; Nicaragua filed a case against Colombia in 2013 over the delimitation of the Continental shelf beyond the 200 nautical miles from the Nicaraguan coast, as well as over the alleged violation by Colombia of Nicaraguan maritime space in the Caribbean Sea

NIGER

INTRODUCTION

Background: Niger became independent from France in 1960 and experienced single-party and military rule until 1991, when Gen. Ali SAIBOU was forced by public pressure to allow multiparty elections, which resulted in a democratic government in 1993. Political infighting brought the government to a standstill and in 1996 led to a coup by Col. Ibrahim BARE. In 1999, BARE was killed in a counter coup by military officers who restored democratic rule

and held elections that brought Mamadou TANDJA to power in December of that year. TANDJA was reelected in 2004 and in 2009 spearheaded a constitutional amendment allowing him to extend his term as president. In February 2010, military officers led a coup that deposed TANDJA and suspended the constitution. ISSOUFOU Mahamadou was elected in April 2011 following the coup and reelected to a second term in early 2016. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel region of Africa. A Tuareg rebellion emerged in 2007 and ended in 2009. Niger is facing increased security concerns on its borders from various external threats including insecurity in Libya, spillover from the conflict in Mali, and violent extremism in northeastern Nigeria.

Nationality: *noun:* Nigerien(s)

adjective: Nigerien

Ethnic groups: Hausa 53.1%, Zarma/Songhai 21.2%, Tuareg 11%, Fulani (Peul) 6.5%, Kanuri 5.9%, Gurma 0.8%, Arab 0.4%, Tubu 0.4%, other/unavailable 0.9% (2006 est.)

Languages: French (official), Hausa, Djerma

Religions: Muslim 80%, other (includes indigenous beliefs and Christian) 20%

Demographic profile: Niger has the highest total fertility rate (TFR) of any country in the world, averaging close to 7 children per woman in 2016. A slight decline in fertility over the last few decades has stalled. This leveling off of the high fertility rate is in large part a product of the continued desire for large families. In Niger, the TFR is lower than the desired fertility rate, which makes it unlikely that contraceptive use will increase. The high TFR sustains rapid population growth and a large youth population—almost 70% of the populace is under the age of 25. Gender inequality, including a lack of educational opportunities for women and early marriage and childbirth, also contributes to high population growth.

Because of large family sizes, children are inheriting smaller and smaller parcels of land. The dependence of most Nigeriens on subsistence farming on increasingly small landholdings, coupled with declining rainfall and the resultant shrinkage of arable land, are all preventing food production from keeping up with population growth.

For more than half a century, Niger's lack of economic development has led to steady net outmigration. In the 1960s, Nigeriens mainly migrated to coastal West African countries to work on a seasonal basis. Some headed to Libya and Algeria in the 1970s to work in the booming oil industry until its decline in the 1980s. Since the 1990s, the principal destinations for Nigerien labor migrants have been West African countries, especially Burkina Faso and Cote d'Ivoire, while emigration to Europe and North America has remained modest. During the same period, Niger's desert trade route town Agadez became a hub for West African and other sub-Saharan migrants crossing the Sahara to North Africa and sometimes onward to Europe.

More than 60,000 Malian refugees have fled to Niger since violence between Malian government troops and armed rebels began in early 2012. Ongoing attacks by the Boko Haram Islamist insurgency, dating to 2013 in northern Nigeria and February 2015 in southeastern Niger, have pushed tens of thousands of Nigerian refugees and Nigerien returnees across the border to Niger and to displace thousands of locals in Niger's already impoverished Diffa region.

ECONOMY

Economy—overview: Niger is a landlocked, sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world’s largest uranium deposits. Agriculture contributes approximately 25% of GDP and provides livelihood for 87% of the

population. The UN ranked Niger as the second least developed country in the world in 2016 due to multiple factors such as food insecurity, lack of industry, high population growth, a weak educational sector, and few prospects for work outside of subsistence farming and herding.

Since 2011 public debt has increased due to efforts to scale-up public investment, particularly that related to infrastructure, as well as due to increased security spending. The government relies on foreign donor resources for a large portion of its fiscal budget. The economy in recent years has been hurt by terrorist activity and kidnappings near its uranium mines and by instability in Mali and in the Diffa region of the country; concerns about security have resulted in increased support from regional and international partners on defense. Low uranium prices, demographics, and security expenditures may continue to put pressure on the government's finances.

Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources. Although Niger has sizable reserves of oil, the prolonged drop in oil prices has reduced profitability. Food insecurity and drought remain perennial problems for Niger, and the government plans to invest more in irrigation. Niger's three-year \$131 million IMF Extended Credit Facility (ECF) agreement for the years 2012-15 was extended until the end of 2016. In February 2017, the IMF approved a new 3-year \$134 million ECF. A \$437 million Millennium Challenge Account compact for Niger, commencing in FY17, will focus on large-scale irrigation infrastructure development and community-based, climate-resilient agriculture, while promoting sustainable increases in agricultural productivity and sales.

Formal private sector investment needed for economic diversification and growth remains a challenge, given the country's limited domestic markets, access to credit, and competitiveness. Although President ISSOUFOU is courting foreign investors, including those from the US, as of April 2017, there were no US firms operating in Niger.

NIGERIA

INTRODUCTION

Background: British influence and control over what would become Nigeria and Africa's most populous country grew through the 19th century. A series of constitutions after World War II granted Nigeria greater autonomy. After independence in 1960, politics were marked by coups and mostly military rule, until the death of a military head of state in 1998 allowed for a political transition. In 1999, a new constitution was adopted and a peaceful transition to civilian government was completed. The government continues to face the daunting task of institutionalizing democracy and reforming a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement. In addition, Nigeria continues to experience longstanding ethnic and religious tensions. Although both the 2003 and 2007 presidential elections were marred by significant irregularities and violence, Nigeria is currently experiencing its longest period of civilian rule since independence. The general elections of April 2007 marked the first civilian-to-civilian transfer of power in the country's history and the elections of 2011 were generally regarded as credible. The 2015 election is considered the most well run in Nigeria since the return

to civilian rule, with the umbrella opposition party, the All Progressives Congress, defeating the long-ruling People's Democratic Party that had governed since 1999.

Nationality: *noun:* Nigerian(s)

adjective: Nigerian

Ethnic groups: Nigeria, Africa's most populous country, is composed of more than 250 ethnic groups; the most populous and politically influential are: Hausa and the Fulani 29%, Yoruba 21%, Igbo (Ibo) 18%, Ijaw 10%, Kanuri 4%, Ibibio 3.5%, Tiv 2.5%

Languages: English (official), Hausa, Yoruba, Igbo (Ibo), Fulani, over 500 additional indigenous languages

Religions: Muslim 50%, Christian 40%, indigenous beliefs 10%

Demographic profile: Nigeria's population is projected to grow from more than 186 million people in 2016 to 392 million in 2050, becoming the world's fourth most populous country. Nigeria's sustained high population growth rate will continue for the foreseeable future because of population momentum and its high birth rate. Abuja has not successfully implemented family planning programs to reduce and space births because of a lack of political will, government financing, and the availability and affordability of services and products, as well as a cultural preference for large families. Increased educational attainment, especially among women, and improvements in health care are needed to encourage and to better enable parents to opt for smaller families.

Nigeria needs to harness the potential of its burgeoning youth population in order to boost economic development, reduce widespread poverty, and channel large numbers of unemployed youth into productive activities and away from ongoing religious and ethnic violence. While most movement of Nigerians is internal, significant emigration regionally and to the West provides an outlet for Nigerians looking for economic opportunities, seeking asylum, and increasingly pursuing higher education. Immigration largely of West Africans continues to be insufficient to offset emigration and the loss of highly skilled workers. Nigeria also is a major source, transit, and destination country for forced labor and sex trafficking.

ECONOMY

Economy—overview: Nigeria is one of Sub Saharan Africa’s largest economies and relies heavily on oil as its main source of foreign exchange earnings and government revenues. Following the 2008-09 global financial crises, the banking sector was effectively recapitalized and regulation enhanced. Since then, Nigeria’s economic growth has been driven by growth in agriculture, telecommunications, and services. Economic diversification and strong growth have not translated into a significant decline in poverty levels; however, over 62% of Nigeria’s 170 million people still live in extreme poverty.

Despite its strong fundamentals, oil-rich Nigeria has been hobbled by inadequate power supply, lack of infrastructure, delays in the passage of legislative reforms, an inefficient property registration system, restrictive trade policies, an inconsistent regulatory environment, a slow and ineffective judicial system, unreliable dispute resolution mechanisms, insecurity, and pervasive corruption. Regulatory constraints and security risks have limited new investment in oil and natural gas, and Nigeria’s oil production had been contracting every year since 2012 until a slight rebound in 2017.

President BUHARI, elected in March 2015, has established a cabinet of economic ministers that includes several technocrats, and he has announced plans to increase transparency, diversify the economy away from oil, and improve fiscal management, but his reliance on the Central Bank governor has led to overwhelmingly protectionist policies aimed at defending the naira from further devaluation. President BUHARI ran on an anti-corruption platform,

and has made some headway in alleviating corruption, such as an implementation of a Treasury Single Account that allows the government to better manage its resources. The government also is working to develop stronger public-private partnerships for roads, agriculture, and power.

Partly because of lower oil prices, Nigeria entered a recession in 2016. However, GDP growth turned positive, with oil prices recovering and output stabilizing in 2017.

extended the range of their attacks to as far away as Cote d'Ivoire and as far as 100 nm offshore

TERRORISM

Terrorist groups—home based: *Ansaru:* *aim(s):* establish an Islamic state in Nigeria

area(s) of operation: headquartered in the north; formed in 2012 as a breakaway faction of Boko Haram; has a history of attacking Nigerian Government officials and facilities and kidnapping and killing Westerners; activities have waned in recent years, especially since founder Khalid al-BARNAWI was arrested in Lokoja, Kogi State, in central Nigeria in April 2016; authorities arrested several commanders and fighters in Kogi State in mid-2016; kidnappings for ransom remain the group's primary revenue source; membership was assessed in 2017 to be much smaller than Boko Haram's estimated manpower strength of the low thousands

Boko Haram: *aim(s):* replace the Nigerian Government with an Islamic state under strict Sharia and, ultimately, establish an Islamic caliphate across Africa; avenge military offenses against the group and destroy any political or social activity associated with Western society, including voting, attending secular schools, and wearing shirts and trousers

area(s) of operation: headquartered in the northeast, where the group was founded under the late Muslim cleric Mohammed YUSUF; since 2011, fighters have killed over 26,000 Nigerians during hundreds of attacks and disrupted trade and farming in the northeast, causing a calamitous famine and internally displacing an estimated 2.6 million people; continues to carry out suicide bombings in heavily populated areas, especially in the north and northeast, and to deepen food insecurity; remains the country's largest jihadist group; Nigeria continues to participate in the Joint Multinational Force's military offensives combating Boko Haram; one of the group's deadliest attacks began on 3 January 2015, when fighters used petrol bombs and other explosives and burned buildings in a series of mass killings in the northeast in Borno State in Baga and several surrounding villages that ended on 7 January 2015, with approximately 2,000 deaths and thousands of displaced civilians; lost its total control over the northeast in 2015, when the Nigerian military routed out cells from many of the group's

longtime strongholds; conducted the largest recorded single kidnapping incident of women and children in Nigeria's history, when operatives abducted approximately 276 teenage female students in Chibok, Borno State, in April 2014; manpower strength was estimated in 2017 to be in the low thousands

Terrorist groups—foreign based: *Islamic State of Iraq and the Levant (ISIL): aim(s):* replace the Nigerian Government with an Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: based in the north along the border with Niger, with its heaviest presence in the northeast; targets primarily regional military installations; in areas under its influence, members enforce its strict interpretation of Sharia, direct religious education, and collect taxes imposed on companies and individuals; operates under Abu Mus'ab al-BARNAWI, the branch's leader since July 2016; ISIL has referred to Nigeria since circa March 2015 as its Wilayat Gharb Afriqiya, which translates to West Africa; as an official branch of core ISIL, it is also known as Islamic State of Iraq and the Levant—West Africa (ISIL-WA), Islamic State of Iraq and ash-Sham—West Africa (ISIS-WA), and Islamic State West Africa; assessed in 2016 to have a fighter strength in the low thousands

TRANSNATIONAL ISSUES

Disputes—international: Joint Border Commission with Cameroon reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately cedes sovereignty of the Bakassi Peninsula to Cameroon with a phaseout of Nigerian control within two years while resolving patriation issues; the ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but imprecisely defined coordinates in the ICJ decision and a sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River all contribute to the delay in implementation; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty which also includes the Chad-Niger and Niger-Nigeria boundaries; location of Benin-Niger-Nigeria tripoint is unresolved

Refugees and internally displaced persons: IDPs: 1,782,940 (northeast Nigeria; Boko Haram attacks and counterinsurgency efforts in

northern Nigeria; communal violence between Christians and Muslims in the middle belt region, political violence; flooding; forced evictions; cattle rustling; competition for resources) (2017)

Illicit drugs: a transit point for heroin and cocaine intended for European, East Asian, and North American markets; consumer of amphetamines; safe haven for Nigerian narcotraffickers operating worldwide; major money-laundering center; massive corruption and criminal activity; Nigeria has improved some anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in June 2006; Nigeria's anti-money-laundering regime continues to be monitored by FATF

NIUE

INTRODUCTION

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the

adjacent Cook Islands, has caused it to be separately administered by New Zealand. The population of the island continues to drop (from a peak of 5,200 in 1966 to 1,618 in 2017) with substantial emigration to New Zealand 2,400 km to the southwest.

ECONOMY

Economy—overview: The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories for processing passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue.

Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Economic aid allocation from New Zealand in FY13/14 was US\$10.1 million. Niue has cut government expenditures by reducing the public service by almost half.

The island in recent years has suffered a serious loss of population because of emigration to New Zealand. Efforts to increase GDP include the promotion of tourism and financial services, although the International Banking Repeal Act of 2002 resulted in the termination of all offshore banking licenses.

NORFOLK ISLAND

INTRODUCTION

Background: Two British attempts at establishing the island as a penal colony (1788-1814 and 1825-55) were ultimately abandoned. In 1856, the island was resettled by Pitcairn Islanders, descendants of the Bounty mutineers and their Tahitian companions.

Flag description: three vertical bands of green (hoist side), white, and green with a large green Norfolk Island pine tree centered in the slightly wider white band; green stands for the rich vegetation on the island, and the pine tree—endemic to the island—is a symbol of Norfolk Island

note: somewhat reminiscent of the flag of Canada with its use of only two colors and depiction of a prominent local floral symbol in the central white band; also resembles the green and white triband of Nigeria

National symbol(s): Norfolk Island pine

National anthem: name: "Come Ye Blessed"

lyrics/music: New Testament/John Prindle SCOTT

note: the local anthem, whose lyrics consist of the words from Matthew 25:34-36, 40, is also known as "The Pitcairn Anthem;" as a territory of Australia, "God Save the Queen" is official (see Australia); however, the island does not recognize "Advance Australia Fair"

NORWAY

INTRODUCTION

Background: Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994; conversion of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that lasted more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping. Norway proclaimed its neutrality at the outset of World War II, but was nonetheless occupied for five years by Nazi Germany (1940-45). In 1949, Norway abandoned neutrality and became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. In referenda held in 1972 and 1994, Norway rejected joining the EU. Key domestic issues include immigration and integration of ethnic minorities, maintaining the country's extensive social safety net with an aging population, and preserving economic competitiveness.

ECONOMY

Economy—overview: Norway has a stable economy with a vibrant private sector, a large state sector, and an extensive social safety net. Norway opted out of the EU during a referendum in November 1994; nonetheless, as a member of the European Economic Area, it contributes sizably to the EU budget.

The country is richly endowed with natural resources in addition to oil and gas, including hydropower, fish, forests, and minerals. Norway is a leading producer and the world’s second largest exporter of seafood, after China. The government manages the country’s petroleum resources through extensive regulation. The petroleum sector provides about 9% of jobs, 12% of GDP, 13% of the state’s revenue, and 37% of exports, according to official

national estimates. Norway is one of the world's leading petroleum exporters, though oil production in 2016 was close to 50% below its peak in 2000; annual gas production, conversely, more than doubled over the same time period. After a continual decline from 2001 to 2013, oil production rose in 2016 for the third year running, due to the higher production of existing oil fields and to new fields coming on stream.

In anticipation of eventual declines in oil and gas production, Norway saves state revenue from petroleum sector activities in the world's largest sovereign wealth fund, valued at almost \$900 billion as of early 2017. To help balance the federal budget each year, the government follows a "fiscal rule," which states that spending of revenues from petroleum and fund investments shall correspond to the expected real rate of return on the fund, an amount it estimates is sustainable over time. In February 2017, the government revised the expected rate of return for the fund downward from 4% to 3%.

After solid GDP growth in the 2004-07 period, the economy slowed in 2008, and contracted in 2009, before returning to modest, positive growth from 2010 to 2017. Lower oil prices in 2015 and 2016 caused growth to slow, increased unemployment, and weakened the Norwegian krone. The latter trend has mitigated the negative impact of lower oil and gas prices by making Norwegian exports cheaper for foreign buyers. The government has expressed willingness to increase public spending from the sovereign wealth fund to help prevent a recession.

OMAN

INTRODUCTION

Background: The inhabitants of the area of Oman have long prospered from Indian Ocean trade. In the late 18th century, the nascent sultanate in Muscat signed the first in a series of friendship treaties with Britain. Over time, Oman's dependence on British political and military advisors increased, although the Sultanate never became a British colony. In 1970, QABOOS bin Said Al-Said overthrew his father, and has since ruled as sultan, but he has not designated a successor. His extensive modernization program has opened the country to the outside world, while preserving the longstanding close ties with the UK and US. Oman's moderate, independent foreign policy has sought to maintain good relations with its neighbors and to avoid external entanglements. Inspired by

the popular uprisings that swept the Middle East and North Africa beginning in January 2011, some Omanis staged demonstrations, calling for more jobs and economic benefits and an end to corruption. In response to those protester demands, QABOOS in 2011 pledged to implement economic and political reforms, such as granting legislative and regulatory powers to the Majlis al-Shura and increasing unemployment benefits. Additionally, in August 2012, the Sultan announced a royal directive mandating the speedy implementation of a national job creation plan for thousands of public and private sector Omani jobs. As part of the government's efforts to decentralize authority and allow greater citizen participation in local governance, Oman successfully conducted its first municipal council elections in December 2012. Announced by the Sultan in 2011, the municipal councils have the power to advise the Royal Court on the needs of local districts across Oman's 11 governorates. The Sultan returned to Oman in March 2015 after eight months in Germany, where he received medical treatment. He has since appeared publicly on a few occasions.

ECONOMY

Economy—overview: Oman is heavily dependent on its dwindling

oil resources, which generate 84% of government revenue. In 2016, low global oil prices drove Oman's budget deficit to \$11.5 billion, or approximately 19% of GDP, but the budget deficit was reduced to 13% of GDP in 2017 as Oman reduced government subsidies. Oman has limited foreign assets and is issuing debt to cover its deficit.

Oman is using enhanced oil recovery techniques to boost production, but has simultaneously pursued a development plan that focuses on diversification, industrialization, and privatization, with the objective of reducing the oil sector's contribution to GDP from 46% at present to 9% by 2020 in accordance with Oman's ninth five-year development plan. Tourism and gas-based industries are key components of the government's diversification strategy.

Muscat also has notably focused on creating more Omani jobs to employ the rising number of nationals entering the workforce. However, high social welfare benefits — that had increased in the wake of the 2011 Arab Spring — have challenged the government's ability to effectively balance its budget in light of low export oil prices. In response, Omani officials imposed austerity measures to its gasoline and diesel subsidies in 2016, with further subsidy cuts planned for electricity and liquid petroleum gas. The spending cuts have faced some public opposition, which in 2017 prompted the Omani Government to announce a cap on fuel prices and a plan to provide 25,000 public-sector jobs for Omanis.

PACIFIC OCEAN

INTRODUCTION

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

GEOGRAPHY

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: Political Map of the World

Area: *total:* 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area—comparative: about 15 times the size of the US; covers about 28% of the global surface; almost equal to the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal—a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface dominated by two large gyres (broad, circular systems of currents), one in the northern Pacific and another in the southern Pacific; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest at 10,924 m

major surface currents: clockwise North Pacific Gyre formed by the warm Kuroshio Current in the west, the North Pacific Current in the north, the cold California Current in the east, and the North Equatorial Current in the south; the counterclockwise South Pacific Gyre composed of the warm East Australian Current in the west, the South Pacific Current in the south, the cold Peru (Humbolt) Current in the east, and the South Equatorial Current in the north

Elevation: mean depth: -3,970 m

elevation extremes: *lowest point:* Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources: oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the “Pacific Ring of Fire”; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment—current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography—note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

GOVERNMENT

Country name: etymology: named by Portuguese explorer Ferdinand MAGELLAN during the Spanish circumnavigation of the world in 1521; encountering favorable winds upon reaching the ocean, he called it “Mar Pacifico,” which means “peaceful sea” in both Portuguese and Spanish

ECONOMY

Economy—overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In

1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

TRANSPORTATION

Ports and terminals: *major seaport(s):* Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

MILITARY AND SECURITY

Maritime threats: the Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state); although the International Maritime Bureau reports the territorial waters of littoral states and offshore waters in the South China Sea as high risk for piracy and armed robbery against ships reports of attacks have generally declined from 2015 to 2016; an emerging threat area lies in the Celebes and Sulu Seas between the Philippines and Malaysia where 12 crew were kidnapped in three incidents during the last quarter of 2016; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crew and passengers are often held for ransom, murdered, or cast adrift

TRANSNATIONAL ISSUES

Disputes—international: some maritime disputes (see littoral states)

PAKISTAN

INTRODUCTION

Background: The Indus Valley civilization, one of the oldest in the world and dating back at least 5,000 years, spread over much of what is presently Pakistan. During the second millennium B.C., remnants of this culture fused with the migrating Indo-Aryan peoples. The area underwent successive invasions in subsequent centuries from the Persians, Greeks, Scythians, Arabs (who brought Islam), Afghans, and Turks. The Mughal Empire flourished in the 16th and 17th centuries; the British came to dominate the region in the 18th century. The separation in 1947 of British India into the Muslim state of Pakistan (with West and East sections) and largely Hindu India was never satisfactorily resolved, and India and Pakistan fought two wars and a limited conflict—in 1947-48, 1965, and 1999 respectively—over the disputed Kashmir territory. A third war between these countries in 1971—in which India capitalized on Islamabad's marginalization of Bengalis in Pakistani politics—resulted in East Pakistan becoming the separate nation of Bangladesh.

In response to Indian nuclear weapons testing, Pakistan conducted its own tests in mid-1998. India-Pakistan relations

improved in the mid-2000s but have been rocky since the November 2008 Mumbai attacks and have been further strained by attacks in India by militants suspected of being based in Pakistan. Nawaz SHARIF took office as prime minister in 2013, marking the first time in Pakistani history that a democratically elected government completed a full term and transitioned to a successive democratically elected government. In July 2017, the Supreme Court disqualified SHARIF from public office, and Shahid Khaqan ABBASI replaced him as prime minister in August. Pakistan has been engaged in a decades-long armed conflict with militant groups that target government institutions and civilians, including the Tehrik-e-Taliban Pakistan (TTP) and other militant networks.

ECONOMY

Economy—overview: Decades of internal political disputes and low levels of foreign investment have led to underdevelopment in Pakistan. Pakistan has a large English-speaking population. A challenging security environment, electricity shortages, and a burdensome investment climate have deterred investors. Agriculture accounts for one-fifth of output and two-fifths of employment. Textiles and apparel account for more than half of Pakistan’s export earnings; Pakistan’s failure to diversify its exports has left the country vulnerable to shifts in world demand. Pakistan’s GDP growth has gradually increased since 2012. Official unemployment was 6% in 2017, but this fails to capture the true picture, because much of the economy is informal and underemployment remains high. Human development continues to lag behind most of the region.

In 2013, Pakistan embarked on a \$6.3 billion IMF Extended Fund Facility, which focused on reducing energy shortages, stabilizing public finances, increasing revenue collection, and improving its balance of payments position. The program concluded in September 2016. Although Pakistan missed several structural reform criteria, it restored macroeconomic stability, improved its credit rating, and boosted growth. The Pakistani rupee, after heavy depreciation in 2013, remained relatively stable against the US dollar in 2015-17. Balance of payments concerns have reemerged, however, as a result of increased imports and declining remittances.

Pakistan must continue to address several longstanding issues,

including expanding investment in education and healthcare, adapting to the effects of climate change and natural disasters, improving the country's business environment, reducing dependence on foreign donors, and widening the country's tax base. Given demographic challenges, Pakistan's leadership will be pressed to implement economic reforms, promote further development of the energy sector, and attract foreign investment to support sufficient economic growth necessary to employ its growing and rapidly urbanizing population, much of which is under the age of 25.

In an effort to boost development, Pakistan and China are implementing the "China-Pakistan Economic Corridor," with \$60 billion in investments targeted towards energy and other infrastructure projects. Pakistan believes CPEC investments will enable growth rates of over 6% of GDP by laying the groundwork for increased exports. CPEC-related obligations, however, have raised IMF concern that capital outflows that will begin to increase in 2020.

TERRORISM

Terrorist groups—home based: *al-Qa'ida (AQ): aim(s):* establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation of Sharia through ridding the Muslim world of Western influence, expelling non-Muslims from the Arabian Peninsula, overthrowing Muslim governments it deems to be apostate, and attacking “far enemy” (Western) interests and homelands with the intent to destabilize Western governments

area(s) of operation: headquartered in Pakistan, with its heaviest presence in the northwest and in northeastern Afghanistan near the Pakistan-Afghanistan border; maintains safehavens in North Waziristan Agency in Pakistan's Federally Administered Tribal Areas (FATA) region, a semi-autonomous region in the northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; confronted with counterterrorism operations throughout the country; operates a blend of limited and well-established networks in Pakistan and across the globe, especially its affiliate al-Qa'ida organizations in the Middle East, Africa, and South Asia

al-Qa'ida in the Indian Subcontinent (AQIS): aim(s): establish an Islamic caliphate in the Indian subcontinent

area(s) of operation: maintains a steady presence, where overall

leader Asim UMAR is based; Pakistan is known to have been AQIS's original headquarters; operates safe havens in North Waziristan Agency and South Waziristan Agency in the country's Federally Administered Tribal Areas (FATA) region; FATA is a semi-autonomous region in the northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; operational throughout the country, targeting military and security personnel and using machetes to attack university professors, bloggers, and others who oppose AQIS's ideology; responsible for numerous attacks in Karachi; stages attacks in Afghanistan, India, and Bangladesh, where the group is the most active; majority of members are Pakistanis; outlawed in Pakistan

Haqqani Network (HQN): *aim(s):* enhance its operational networks and capabilities for staging cross-border attacks in Afghanistan and, ultimately, replace the Afghan Government with a strict Salafi Muslim interpretation of Sharia

area(s) of operation: headquartered in the Federally Administered Tribal Areas (FATA) region in North Waziristan Agency (NWA); FATA is a semi-autonomous region in the northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; NWA is located across from Afghanistan's southeastern border; fighters have staged numerous cross-border operations into Afghanistan, targeting Afghan, US, and NATO forces and other Afghan Government personnel and Westerners for attack or kidnappings for ransom

Harakat ul-Jihad-i-Islami (HUJI): *aim(s):* overthrow the Pakistan Government and install Sharia throughout the country

area(s) of operation: headquartered in Pakistan, where the group operates several camps; remains heavily active in the southern area of Pakistan-controlled Azad Kashmir

Harakat ul-Mujahidin (HUM): *aim(s):* annex Kashmi into Pakistan and establish an Islamic state in Kashmir

area(s) of operation: headquartered in Islamabad, with a heavy operational presence in Muzaffarabad in Pakistan-administered Azad Kashmir, where operatives stage attacks against India; maintains training and paramilitary camps in the country's

Federally Administered Tribal Areas (FATA) region; FATA is a semi-autonomous region in the northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; outlawed in Pakistan since November 2003

Islamic Jihad Union (IJU): *aim(s):* secure its base in Pakistan's Federally Administered Tribal Areas (FATA) and, ultimately, overthrow the Government of Uzbekistan

area(s) of operation: headquartered in FATA, where fighters attack Pakistani security forces and stage attacks inside Afghanistan; FATA is a semi-autonomous region in the northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; operates primarily against international and Afghan forces in Afghanistan, in collaboration with other armed groups; members are scattered throughout Central Asia and Europe; on 29 July 2004, an operative blew himself up next to a vehicle in Fateh Jhang, Attock District, Punjab Province, carrying Pakistan's then prime minister-designate, Shaukat AZIZ, killing at least nine people and injuring more than 25; membership was assessed in 2016 to be in the low hundreds

Islamic Movement of Uzbekistan (IMU): *aim(s):* enhance its networks and secure its territory in Pakistan to meet its historic goal of establishing an Islamic state in the Fergana Valley, a fertile valley spread across eastern Uzbekistan, southern Kyrgyzstan, and northern Tajikistan

area(s) of operation: leadership is based in Pakistan's Federally Administered Tribal Areas (FATA) region; FATA is a semi-autonomous region in country's northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; IMU moved to Pakistan after the US-led invasion of Afghanistan in 2001; active along the Pakistan-Afghanistan border across from northern Afghanistan, where on the Pakistan side as of 2017, the group operates considerably fewer paramilitary training camps than during its peak in the late 1990s leading up to 2001

Jaish-e-Mohammed (JEM): *aim(s):* unite Kashmir with Pakistan,

install Sharia in Pakistan, and drive foreign forces from Afghanistan
area(s) of operation: headquartered in Punjab Province; stages attacks against Indian forces, primarily in the Indian-administered state of Jammu and Kashmir; hundreds of members are active in the Kashmir Valley; outlawed in Pakistan

Jundallah: *aim(s):* seeks greater autonomy for Balochis in Pakistan and Iran

area(s) of operation: headquartered in Balochistan Province, where operatives stage attacks inside Iran against Shia Muslims, primarily Iranian soldiers and security personnel for murder or kidnapping; claimed responsibility for opening fire on a bus carrying Ismaili Shia Muslims on 13 May 2015 in Gulshan-e-Iqbal Park in Karachi, killing 43 passengers and wounding 30; outlawed in Pakistan since January 2017

Lashkar-e Tayyiba (LeT): *aim(s):* annex India's state of Jammu and Kashmir as part of Pakistan and, ultimately, install Islamic rule over parts of India and Pakistan

area(s) of operation: headquartered in Lahore, Punjab Province, with an operational presence throughout the country, especially in both the Pakistan-controlled and India-controlled Kashmir regions; stages attacks against Indian military and security forces; the Falah-e-Insaniyat Foundation charity organization in Lahore is a JuD and LeT fundraising subsidiary; LeT has been outlawed in Pakistan since 2002; LeT changed its name to Kashmir Tehrik Azadi in early 2017

Terrorist groups—foreign based: *Indian Mujahedeen (IM):* *aim(s):* enhance networks in Pakistan to maintain safe havens and carry out attacks inside India

area(s) of operation: cofounders and brothers Mohammed Riyaz BHATKAL and Iqbal BHATKAL are reportedly leading IM from Karachi

Islamic State of Iraq and the Levant-Khorasan (ISIL-K): *aim(s):* establish an Islamic caliphate in the Afghanistan-Pakistan region

area(s) of operation: maintains a limited operational and recruitment presence throughout the country, primarily along the Pakistan-Afghanistan border to stage attacks inside Afghanistan; conducts small-scale shooting and bombing attacks against Pakistani Shia Muslims, military installations, and government buildings; claimed responsibility for the 13 May 2015 shooting of Shia Muslim bus passengers in Karachi, killing 45 people and injuring 13; assessed in

early 2017 to have a few hundred fighters based in Pakistan; core ISIL refers to Pakistan and Afghanistan as its Wilayat al-Khorasan

Lashkar i Jhangvi (LJ): *aim(s):* exterminate Shia Muslims, rid the region of Western influence and, ultimately, establish an Islamic state under Sharia in Pakistan

area(s) of operation: has a growing presence in Karachi, the capital of Sindh Province; loosely coordinated cells are spread across the country, primarily in Punjab and Balochistan provinces, Karachi, and in the Federally Administered Tribal Areas (FATA) region; FATA is a semi-autonomous region in the northwest consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; majority of attacks are against local and foreign Shia Muslims and government personnel and facilities; LJ attacks in recent years have killed hundreds of Pakistanis, including the 21 January 2017 bombing at a vegetable market in the Shia Muslim section of Parachinar, Kurram Valley Agency, FATA, that killed at least 25 people and injured over 50; recruits travel to Afghanistan across from Pakistan's central FATA borders to attend paramilitary training in LJ camps; assessed in late 2015 to have a few hundred members; outlawed in Pakistan

Tehrik-e-Taliban Pakistan (TTP): *aim(s):* remove Pakistani forces from the Federally Administered Tribal Areas (FATA) and, ultimately, overthrow the Pakistan Government to install TTP's strict interpretation of Sharia throughout the country

area(s) of operation: maintains a large presence in Karachi, the capital of Sindh Province; trains and deploys fighters in the tribal belt in the Pashtun areas along the Pakistan-Afghanistan border, especially in Kunar Province where TTP has established sanctuaries; operationally active in the North Waziristan and Balochistan regions; targets Pakistan Government officials and military, security, and police personnel and Westerners, progovernment tribal elders, Shia Muslims, and education figures and advocates; formerly headquartered in Bajaur Agency in northern FATA, a semi-autonomous region in the northwestern consisting of seven tribal agencies (districts) and six frontier regions directly governed by Pakistan's federal government through a special set of laws called the Frontier Crimes Regulations; has carried out and claimed responsibility for numerous attacks against Pakistani and US

interests throughout most of the country; killed approximately 543 people in Pakistan in 2014, including on 16 December 2014, when TTP gunmen entered the Army Public School in Khyber Pakhtunkhwa, Peshawar, and opened fire and detonated bombs, killing 157 and injuring 131 in the deadliest terrorist attack ever to occur in Pakistan; shot education rights activist Malala YOUSAFZAI in a failed assassination attempt on 9 October 2012; TTP has suspected involvement in the 2007 assassination of former Pakistani Prime Minister Benazir BHUTTO; outlawed in Pakistan

TRANSNATIONAL ISSUES

Disputes—international: various talks and confidence-building measures cautiously have begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); UN Military Observer Group in India and Pakistan has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; India and Pakistan have maintained their 2004 cease-fire in Kashmir and initiated discussions on defusing the armed standoff in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show the Junagadh claim in India's Gujarat State; since 2002, with UN assistance, Pakistan has repatriated 3.8 million Afghan refugees, leaving about 2.6 million; Pakistan has sent troops across and built fences along some remote tribal areas of its treaty-defined Durand Line border with Afghanistan, which serve as bases for foreign terrorists and other illegal activities; Afghan, Coalition, and Pakistan military meet periodically to clarify the alignment of the boundary on the ground and on maps

Refugees and internally displaced persons: refugees (country of

origin): 2—2.4 million (1.4 million registered, 600,000—1.0 million undocumented) (Afghanistan) (2017)

IDPs: 464,000 (primarily those who remain displaced by counter-terrorism and counter-insurgency operations and violent conflict between armed non-state groups in the Federally Administered Tribal Areas and Khyber-Paktunkwa Province; more than 1 million displaced in northern Waziristan in 2014; individuals also have been displaced by repeated monsoon floods) (2016)

Trafficking in persons: current situation: Pakistan is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; the largest human trafficking problem is bonded labor in agriculture, brickmaking and, to a lesser extent, fishing, mining and carpet-making; children are bought, sold, rented, and placed in forced begging rings, domestic service, small shops, brick-making factories, or prostitution; militant groups also force children to spy, fight, or die as suicide bombers, kidnapping the children or getting them from poor parents through sale or coercion; women and girls are forced into prostitution or marriages; Pakistani adults migrate to the Gulf States and African and European states for low-skilled jobs and sometimes become victims of forced labor, debt bondage, or prostitution; foreign adults and children, particularly from Afghanistan, Bangladesh, and Sri Lanka, may be subject to forced labor, and foreign women may be sex trafficked in Pakistan, with refugees and ethnic minorities being most vulnerable

tier rating: Tier 2 Watch List – Pakistan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government lacks political will and capacity to fully address human trafficking, as evidenced by ineffective law enforcement efforts, official complicity, penalization of victims, and the continued conflation of migrant smuggling and human trafficking by many officials; not all forms of trafficking are prohibited; an anti-trafficking bill drafted in 2013 to address gaps in existing legislation remains pending, and a national action plan drafted in 2014 is not finalized; feudal landlords and brick kiln owners use their political influence to protect their involvement in bonded labor, while some police personnel have taken bribes to ignore prostitution that may have included sex trafficking; authorities began to use standard

procedures for the identification and referral of trafficking victims, but it is not clear how widely these methods were practiced; in other instances, police were reluctant to assist NGOs with rescues and even punished victims for crimes committed as a direct result of being trafficked (2015)

Illicit drugs: significant transit area for Afghan drugs, including heroin, opium, morphine, and hashish, bound for Iran, Western markets, the Gulf States, Africa, and Asia; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems; opium poppy cultivation estimated to be 930 hectares in 2015; federal and provincial authorities continue to conduct anti-poppy campaigns that utilizes forced eradication, fines, and arrests

PALAU

INTRODUCTION

Background: After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independence in 1978 rather than

join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986 but not ratified until 1993. It entered into force the following year when the islands gained independence.

ECONOMY

Economy—overview: The economy is dominated by tourism,

fishing, and subsistence agriculture. Government is a major employer of the work force relying on financial assistance from the US under the Compact of Free Association (Compact) with the US that took effect after the end of the UN trusteeship on 1 October 1994. The US provided Palau with roughly \$700 million in aid for the first 15 years following commencement of the Compact in 1994 in return for unrestricted access to its land and waterways for strategic purposes. The population enjoys a per capita income roughly double that of the Philippines and much of Micronesia.

Business and leisure tourist arrivals reached a record 167,966 in 2015, a 14.4% increase over the previous year, but fell to 138,408 in 2016. Long-run prospects for tourism have been bolstered by the expansion of air travel in the Pacific, the rising prosperity of industrial East Asia, and the willingness of foreigners to finance infrastructure development. Proximity to Guam, the region's major destination for tourists from East Asia, and a regionally competitive tourist infrastructure enhance Palau's advantage as a destination.

PANAMA

INTRODUCTION

Background: Explored and settled by the Spanish in the 16th century, Panama broke with Spain in 1821 and joined a union of Colombia, Ecuador, and Venezuela—named the Republic of Gran Colombia. When the latter dissolved in 1830, Panama remained part of Colombia. With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. In 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of the century. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the subsequent decades. With US help, dictator Manuel NORIEGA was deposed in 1989. The

entire Panama Canal, the area supporting the Canal, and remaining US military bases were transferred to Panama by the end of 1999. An ambitious expansion project to more than double the Canal's capacity—by allowing for more Canal transits and larger ships—was carried out between 2007 and 2016.

Demographic profile: Panama is a country of demographic and economic contrasts. It is in the midst of a demographic transition, characterized by steadily declining rates of fertility, mortality, and population growth, but disparities persist based on wealth, geography, and ethnicity. Panama has one of the fastest growing economies in Latin America and dedicates substantial funding to social programs, yet poverty and inequality remain prevalent. The indigenous population accounts for a growing share of Panama's poor and extreme poor, while the non-indigenous rural poor have been more successful at rising out of poverty through rural-to-urban labor migration. The government's large expenditures on untargeted, indirect subsidies for water, electricity, and fuel have been ineffective, but its conditional cash transfer program has shown some promise in helping to decrease extreme poverty among the indigenous population.

Panama has expanded access to education and clean water, but the availability of sanitation and, to a lesser extent, electricity remains poor. The increase in secondary schooling—led by female enrollment—is spreading to rural and indigenous areas, which probably will help to alleviate poverty if educational quality and the availability of skilled jobs improve. Inadequate access to sanitation contributes to a high incidence of diarrhea in Panama's children, which is one of the main causes of Panama's elevated chronic malnutrition rate, especially among indigenous communities.

ECONOMY

Economy—overview: Panama’s dollar-based economy rests primarily on a well-developed services sector that accounts for more than three-quarters of GDP. Services include operating the Panama Canal, logistics, banking, the Colon Free Trade Zone, insurance, container ports, flagship registry, and tourism and Panama is a center for offshore banking. Panama’s transportation and logistics services sectors, along with infrastructure development projects, have boosted economic growth; however, public debt surpassed \$37 billion in 2016 because of excessive government spending and public works projects. The US-Panama Trade Promotion Agreement was approved by Congress and signed into law in October 2011, and entered into force in October 2012.

Future growth will be bolstered by the Panama Canal expansion project that began in 2007 and was completed in 2016 at a cost of \$5.3 billion—about 10-15% of current GDP. The expansion project more than doubled the Canal’s capacity, enabling it to accommodate high-capacity vessels such as tankers and neopanamax vessels that are too large to traverse the existing canal. The US and China are the top users of the Canal.

Strong economic performance has not translated into broadly shared prosperity, as Panama has the second worst income distribution in Latin America. About one-fourth of the population lives in poverty; however, from 2006 to 2012 poverty was reduced by 10 percentage points.

INTRODUCTION

Background: The eastern half of the island of New Guinea—second largest in the world—was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence

in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives. Since 2001, Bougainville has experienced autonomy. Under the terms of a peace accord, 2015 is the year that a five-year window opens for a referendum on the question of independence.

GEOGRAPHY

Location: Oceania, group of islands including the eastern half of the island of New Guinea between the Coral Sea and the South Pacific Ocean, east of Indonesia

Geographic coordinates: 6 00 S, 147 00 E

Map references: Oceania

Area: *total:* 462,840 sq km

land: 452,860 sq km

water: 9,980 sq km

country comparison to the world: 56

Area—comparative: slightly larger than California

Land boundaries: *total:* 824 km

border countries (1): Indonesia 824 km

Coastline: 5,152 km

Maritime claims: measured from claimed archipelagic baselines

territorial sea: 12 nm

continental shelf: 200-m depth or to the depth of exploitation

exclusive fishing zone: 200 nm

Climate: tropical; northwest monsoon (December to March), southeast monsoon (May to October); slight seasonal temperature variation

Terrain: mostly mountains with coastal lowlands and rolling foothills

Elevation: *mean elevation:* 667 m

elevation extremes: *lowest point:* Pacific Ocean 0 m

highest point: Mount Wilhelm 4,509 m

Natural resources: gold, copper, silver, natural gas, timber, oil, fisheries

Land use: *agricultural land:* 2.6%

arable land: 0.7%;

permanent crops: 1.5%;
permanent pasture: 0.4%
forest: 63.1%
other: 34.3% (2011 est.)
Irrigated land: 0 sq km (2012)

Population—distribution: population concentrated in the highlands and eastern coastal areas on the island of New Guinea; predominantly a rural distribution with only about one-fifth of the population residing in urban areas

Natural hazards: active volcanism; situated along the Pacific “Ring of Fire”; the country is subject to frequent and sometimes severe earthquakes; mud slides; tsunamis

volcanism: severe volcanic activity; Ulawun (2,334 m), one of Papua New Guinea’s potentially most dangerous volcanoes, has been deemed a Decade Volcano by the International Association of Volcanology and Chemistry of the Earth’s Interior, worthy of study due to its explosive history and close proximity to human populations; Rabaul (688 m) destroyed the city of Rabaul in 1937 and 1994; Lamington erupted in 1951 killing 3,000 people; Manam’s 2004 eruption forced the island’s abandonment; other historically active volcanoes include Bam, Bagana, Garbuna, Karkar, Langila, Lolobau, Long Island, Pago, St. Andrew Strait, Victory, and Waiowa

Environment—current issues: rain forest subject to deforestation as a result of growing commercial demand for tropical timber; pollution from mining projects; severe drought

Environment—international agreements: *party to:* Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands

signed, but not ratified: none of the selected agreements

Geography—note: shares island of New Guinea with Indonesia; generally east-west trending highlands break up New Guinea into diverse ecoregions; one of world’s largest swamps along southwest coast

Population: 6,909,701 (July 2017 est.)

country comparison to the world: 105

Nationality: *noun:* Papua New Guinean(s)

adjective: Papua New Guinean

Ethnic groups: Melanesian, Papuan, Negrito, Micronesian, Polynesian

Languages: Tok Pisin (official), English (official), Hiri Motu (official), some 839 indigenous languages spoken (about 12% of the world's total); many languages have fewer than 1,000 speakers

ECONOMY

Economy—overview: Papua New Guinea (PNG) is richly endowed with natural resources, but exploitation has been hampered by rugged terrain, land tenure issues, and the high cost of developing infrastructure. The economy has a small formal sector, focused mainly on the export of those natural resources, and an informal sector, employing the majority of the population. Agriculture provides a subsistence livelihood for 85% of the people. The global financial crisis had little impact because of continued foreign demand for PNG's commodities.

Mineral deposits, including copper, gold, and oil, account for nearly two-thirds of export earnings. Natural gas reserves amount to an estimated 155 billion cubic meters. Following construction of a \$19 billion liquefied natural gas (LNG) project, PNG LNG, a consortium led by ExxonMobil, began exporting liquefied natural gas to Asian markets in May 2014. The project was delivered on time and only slightly above budget. The success of the project has encouraged other companies to look at similar LNG projects. French supermajor Total is expected to begin construction on the Papua LNG project by 2020. Due to lower global commodity prices, resource revenues of all types have fallen dramatically. PNG's government has recently been forced to adjust spending levels downward.

Numerous challenges still face the government of Peter O'NEILL, including providing physical security for foreign investors, regaining investor confidence, restoring integrity to state institutions, promoting economic efficiency by privatizing moribund state institutions, and maintaining good relations with Australia, its former colonial ruler. Other socio-cultural challenges could upend the economy including chronic law and order and land tenure issues.

Military service age and obligation: 16 years of age for voluntary military service (with parental consent); no conscription; graduation from grade 12 required (2013)

TRANSNATIONAL ISSUES

Disputes—international: relies on assistance from Australia to keep out illegal cross-border activities from primarily Indonesia, including goods smuggling, illegal narcotics trafficking, and squatters and secessionists

Refugees and internally displaced persons: refugees (country of origin): 9,368 (Indonesia) (2016)

IDPs: 8,400 (natural disasters, tribal conflict, inter-communal violence, development projects) (2016)

Trafficking in persons: current situation: Papua New Guinea is a source and destination country for men, women, and children subjected to sex trafficking and forced labor; foreign and Papua New Guinean women and children are subjected to sex trafficking, domestic servitude, forced begging, and street vending; parents may sell girls into forced marriages to settle debts or as peace offerings or trade them to another tribe to forge a political alliance, leaving them vulnerable to forced domestic service, or, in urban areas, they may prostitute their children for income or to pay school fees; Chinese, Malaysian, and local men are forced to labor in logging and mining camps through debt bondage schemes; migrant women from Indonesia, Malaysia, Thailand, China, and the Philippines are subjected to sex trafficking and domestic servitude at logging and mining camps, fisheries, and entertainment sites

tier rating: Tier 2 Watch List—Papua New Guinea does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the Criminal Code Amendment of 2013, which prohibits all forms of trafficking was brought into force in 2014; the government also formed an anti-trafficking committee, which drafted a national action plan; despite corruption problems, trafficking-related crimes were prosecuted in village courts rather than criminal courts, resulting in restitution to the victim but no prison time for offenders; the government did not investigate, prosecute, or convict any officials or law enforcement personnel complicit in trafficking offenses; the government made no efforts to proactively identify trafficking victims, has no formal victim identification and referral mechanism, and does not provide care facilities to victims or funding to shelters run by NGOs or international organizations (2015)

Illicit drugs: major consumer of cannabis

PARACEL ISLANDS

INTRODUCTION

Background: The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied all the Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. China built a military installation on Woody Island with an airfield and artificial harbor. The islands also are claimed by Taiwan and Vietnam.

GEOGRAPHY

Location: Southeastern Asia, group of small islands and reefs in the South China Sea, about one-third of the way from central Vietnam to the northern Philippines

Population—distribution: a population of over 1,000 Chinese resides on Woody Island, the largest of the Paracels; there are scattered Chinese garrisons on some other islands

Natural hazards: typhoons

Environment—current issues: China's use of dredged sand and coral to build artificial islands harms reef systems; ongoing human activities, including military operations, infrastructure construction, and tourism endangers local ecosystem including birds, fish, marine mammals, and marine reptiles

Geography—note: composed of 130 small coral islands and reefs divided into the northeast Amphitrite Group and the western Crescent Group

Population: 1,440

note: Chinese activity has increased in recent years, particularly on Woody Island, where the population exceeds 1,000; there are scattered Chinese garrisons on some other islands (2014 est.)

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Paracel Islands

etymology: Portuguese navigators began to refer to the “Ilhas do Pracel” in the 16th century as a designation of low lying islets, sandbanks, and reefs scattered over a wide area; over time the name changed to “parcel” and then “paracel”

ECONOMY

Economy—overview: The islands have the potential for oil and gas development. Waters around the islands support commercial fishing, but the islands themselves are not populated on a permanent basis.

PERU

INTRODUCTION

Background: Ancient Peru was the seat of several prominent Andean civilizations, most notably that of the Incas whose empire was captured by Spanish conquistadors in 1533. Peru declared its independence in 1821, and remaining Spanish forces were defeated in 1824. After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic slump in the late 1990s generated mounting dissatisfaction with his regime, which led to his resignation in 2000. A caretaker government oversaw a new election in the spring of 2001, which installed Alejandro TOLEDO Manrique as the new head of government—Peru's first democratically elected president of indigenous ethnicity. The presidential election of 2006 saw the return of Alan GARCIA

Perez who, after a disappointing presidential term from 1985 to 1990, oversaw a robust economic rebound. Former army officer Ollanta HUMALA Tasso was elected president in June 2011, and carried on the sound, market-oriented economic policies of the three preceding administrations. Poverty and unemployment levels have fallen dramatically in the last decade, and today Peru boasts one of the best performing economies in Latin America. Pedro Pablo KUCZYNSKI Godard won a very narrow presidential runoff election in June 2016.

Irrigated land: 25,800 sq km (2012)

Population—distribution: approximately one-third of the population resides along the desert coastal belt in the west, with a strong focus on the capital city of Lima; the Andean highlands, or sierra, which is strongly identified with the country's Amerindian population, contains roughly half of the overall population; the eastern slopes of the Andes, and adjoining rainforest, are sparsely populated

Natural hazards: earthquakes, tsunamis, flooding, landslides, mild volcanic activity

volcanism: volcanic activity in the Andes Mountains; Ubinas (5,672 m), which last erupted in 2009, is the country's most active volcano; other historically active volcanoes include El Misti, Huaynaputina, Sabancaya, and Yucamane

Environment—current issues: deforestation (some the result of illegal logging); overgrazing of the slopes of the costa and sierra leading to soil erosion; desertification; air pollution in Lima; pollution of rivers and coastal waters from municipal and mining wastes

Environment—international agreements: *party to:* Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: none of the selected agreements

Geography—note: shares control of Lago Titicaca, world's highest navigable lake, with Bolivia; a remote slope of Nevado Mismi, a 5,316 m peak, is the ultimate source of the Amazon River

Religions: Roman Catholic 81.3%, Evangelical 12.5%, other 3.3%, none 2.9% (2007 est.)

Demographic profile: Peru's urban and coastal communities have benefited much more from recent economic growth than rural, Afro-Peruvian, indigenous, and poor populations of the Amazon and mountain regions. The poverty rate has dropped substantially during the last decade but remains stubbornly high at about 30% (more than 55% in rural areas). After remaining almost static for about a decade, Peru's malnutrition rate began falling in 2005, when the government introduced a coordinated strategy focusing on hygiene, sanitation, and clean water. School enrollment has improved, but achievement scores reflect ongoing problems with educational quality. Many poor children temporarily or permanently drop out of school to help support their families. About a quarter to a third of Peruvian children aged 6 to 14 work, often putting in long hours at hazardous mining or construction sites.

Peru was a country of immigration in the 19th and early 20th centuries, but has become a country of emigration in the last few decades. Beginning in the 19th century, Peru brought in Asian contract laborers mainly to work on coastal plantations. Populations of Chinese and Japanese descent—among the largest in Latin America—are economically and culturally influential in Peru today. Peruvian emigration began rising in the 1980s due to an economic crisis and a violent internal conflict, but outflows have stabilized in the last few years as economic conditions have improved. Nonetheless, more than 2 million Peruvians have emigrated in the last decade, principally to the US, Spain, and Argentina.

ECONOMY

Economy—overview: Peru's economy reflects its varied topography—an arid lowland coastal region, the central high sierra of the Andes, and the dense forest of the Amazon. A wide range of important mineral resources are found in the mountainous and coastal areas, and Peru's coastal waters provide excellent fishing grounds. Peru is the world's second largest producer of silver and copper.

The Peruvian economy grew by an average of 5.6% per year from 2009-13 with a stable exchange rate and low inflation. This growth was due partly to high international prices for Peru's metals and minerals exports, which account for 55% of the country's total exports. Growth slipped from 2014 to 2017, due to weaker world prices for these resources. Despite Peru's strong macroeconomic performance, dependence on minerals and metals exports and imported foodstuffs makes the economy vulnerable to fluctuations in world prices.

Peru's rapid expansion coupled with cash transfers and other programs have helped to reduce the national poverty rate by over 35 percentage points since 2004, but inequality persists and continued to pose a challenge for the Ollanta HUMALA administration, which championed a policy of social inclusion and a more equitable distribution of income. Poor infrastructure hinders the spread of growth to Peru's non-coastal areas. The HUMALA administration passed several economic stimulus packages in 2014 to bolster growth, including reforms to environmental regulations in order to spur investment in Peru's lucrative mining sector, a move that was opposed by some environmental groups. However, in 2015, mining investment fell as global commodity prices remained low and social conflicts plagued the sector.

Peru's free trade policy continued under the HUMALA administration; since 2006, Peru has signed trade deals with the US, Canada, Singapore, China, Korea, Mexico, Japan, the EU, the European Free Trade Association, Chile, Thailand, Costa Rica, Panama, Venezuela, Honduras, concluded negotiations with Guatemala and the Trans-Pacific Partnership, and begun trade talks with El Salvador, India, and Turkey. Peru also has signed a trade pact with Chile, Colombia, and Mexico, called the Pacific Alliance,

that seeks integration of services, capital, investment and movement of people. Since the US-Peru Trade Promotion Agreement entered into force in February 2009, total trade between Peru and the US has doubled. President Pedro Pablo KUCZYNSKI succeeded HUMALA in July 2016 and is focusing on economic reforms and free market policies aimed at boosting investment in Peru. Mining output increased significantly in 2016-17, which helped Peru attain one of the highest GDP growth rates in Latin America, and Peru should maintain strong growth in 2018. However, economic performance was depressed by delays in infrastructure mega-projects and the start of a corruption scandal associated with a Brazilian firm. Massive flooding in early 2017 also was a drag on growth, offset somewhat by additional public spending aimed at recovery efforts.

Illicit drugs: until 1996 the world's largest coca leaf producer, Peru is now the world's second largest producer of coca leaf, though it lags far behind Colombia; cultivation of coca in Peru was estimated at 53,000 hectares in 2015, an increase of 14 per cent over 2014; second largest producer of cocaine, estimated at 380 metric tons of potential pure cocaine in 2015; finished cocaine is shipped out from Pacific ports to the international drug market; increasing amounts of base and finished cocaine, however, are being moved to Brazil, Chile, Argentina, and Bolivia for use in the Southern Cone or transshipment to Europe and Africa; increasing domestic drug consumption

PHILIPPINES

INTRODUCTION

Background: The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected president and was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during World War II, and US forces and Filipinos fought together during 1944-45 to regain control. On 4 July 1946 the Republic of the Philippines attained its independence. A 20-year rule by Ferdinand MARCOS ended in 1986, when a “people power” movement in Manila (“EDSA 1”) forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts that prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992. His administration was marked by increased stability and by progress on economic reforms. In 1992, the US closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998. He was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA’s stormy impeachment trial on corruption charges broke down and another “people power” movement (“EDSA 2”) demanded his resignation. MACAPAGAL-ARROYO was elected to a six-year term as president in May 2004. Her presidency was marred by several corruption allegations but the Philippine economy was one of the few to avoid contraction following the 2008 global financial crisis, expanding each year of her administration. Benigno AQUINO III was elected to a six-year term as president in May 2010 and was succeeded by Rodrigo DUTERTE in May 2016.

The Philippine Government faces threats from several groups, some of which are on the US Government’s Foreign Terrorist Organization list. Manila has waged a decades-long struggle against ethnic Moro insurgencies in the southern Philippines, which has led to a peace accord with the Moro National Liberation Front and ongoing peace talks with the Moro Islamic Liberation Front. The decades-long Maoist-inspired New People’s Army insurgency also operates through much of the country. In 2016, Philippine armed forces battled an ISIS-Philippines siege in Marawi City, driving DUTERTE to declare martial law in the region. The Philippines faces increased tension with China over disputed territorial and maritime claims in the South China Sea.

GEOGRAPHY

Flag description: two equal horizontal bands of blue (top) and red; a white equilateral triangle is based on the hoist side; the center of the triangle displays a yellow sun with eight primary rays; each corner of the triangle contains a small, yellow, five-pointed star; blue stands for peace and justice, red symbolizes courage, the white equal-sided triangle represents equality; the rays recall the first eight provinces that sought independence from Spain, while the stars represent the three major geographical divisions of the country: Luzon, Visayas, and Mindanao; the design of the flag dates to 1897

note: in wartime the flag is flown upside down with the red band at the top

National symbol(s): three stars and sun, Philippine eagle; national colors: red, white, blue, yellow

National anthem: name: “Lupang Hinirang” (Chosen Land)

lyrics/music: Jose PALMA (revised by Felipe PADILLA de Leon)/ Julian FELIPE

note: music adopted 1898, original Spanish lyrics adopted 1899, Filipino (Tagalog) lyrics adopted 1956; although the original lyrics were written in Spanish, later English and Filipino versions were created; today, only the Filipino version is used

ECONOMY

Economy—overview: The economy has been relatively resilient to global economic shocks due to less exposure to troubled international securities, lower dependence on exports, relatively resilient domestic consumption, large remittances from about 10 million overseas Filipino workers and migrants, and a rapidly expanding services industry. During 2017, the current account balance fell into the negative range, the first time since the 2008 global financial crisis, in part due to an ambitious new infrastructure spending program announced this year. However, international reserves remain at comfortable levels and the banking system is stable.

Efforts to improve tax administration and expenditures management have helped ease the Philippines’ debt burden and tight fiscal situation. The Philippines received investment-grade credit ratings on its sovereign debt under the former AQUINO administration and has had little difficulty financing its budget

deficits. However, weak absorptive capacity and implementation bottlenecks have prevented the government from maximizing its expenditure plans. Although it has improved, the low tax-to-GDP ratio remains a constraint to supporting increasingly higher spending levels and sustaining high and inclusive growth over the longer term.

Economic growth has accelerated, averaging over 6% per year from 2011 to 2017, compared with 4.5% under the MACAPAGAL-ARROYO government; and competitiveness rankings have improved. Although 2016 saw a record year for net foreign direct investment inflows, FDI to the Philippines has continued to lag regional peers, in part because the Philippine constitution and other laws limit foreign investment and restrict foreign ownership in important activities/sectors—such as land ownership and public utilities.

Although the economy grew at a rapid pace under the AQUINO government, challenges to achieving more inclusive growth remain. Wealth is concentrated in the hands of the rich. The unemployment rate declined from 7.3% to 5.5% between 2010 and 2016, but underemployment hovers at around 18% to 19% of the employed population. At least 40% of the employed work in the informal sector. Poverty afflicts more than a fifth of the total population but is as high as 75% in some areas of the southern Philippines. More than 60% of the poor reside in rural areas, where the incidence of poverty (about 30%) is more severe—a challenge to raising rural farm and non-farm incomes. Continued efforts are needed to improve governance, the judicial system, the regulatory environment, the infrastructure, and the overall ease of doing business.

2016 saw the election of President Rodrigo DUTERTE, who has pledged to make inclusive growth and poverty reduction his top priority. DUTERTE believes that illegal drug use, crime and corruption are key barriers to economic development. The administration wants to reduce the poverty rate to 17% and graduate the economy to upper-middle income status by the end of President DUTERTE's term in 2022. Key themes under the government's Ten-Point Socioeconomic Agenda include continuity of macroeconomic policy, tax reform, higher investments in infrastructure and human capital development, and improving competitiveness and the overall ease of doing business. The

administration sees infrastructure shortcomings as a key barrier to sustained economic growth and has pledged to spend \$165 billion on infrastructure by 2022. However, the need to finance rehabilitation and reconstruction efforts in the southern region of Mindanao following the 2017 Marawi City siege probably will inhibit other spending on infrastructure.

Terrorist groups—home based: *Abu Sayyaf Group (ASG): aim(s):* establish an Islamic State in the Philippines' Mindanao Island and, ultimately, an Islamic caliphate across Southeast Asia

area(s) of operation: headquartered in southern Philippines in Western Mindanao and active in Sulu, Basilan, and Tawi-Tawi provinces in the Sulu Archipelago; conducts bombings, shootings, beheadings, assassinations, and kidnappings; kills military and police personnel and bombs their facilities; as of mid-2017 supreme leader, Isnilon HAPILON, continued to lead ASG's and Maute Group's (a.k.a. Islamic State of Lanao) siege of Marawi that started on 23 May 2017, when government forces attempted to capture HAPILON in the Lanao de Sur Province's capital; the Maute Group is a fellow ISIL-affiliated organization; over 500 people had died in the conflict (89 security personnel and approximately 65 civilians and 353 militants) and over 471,224 others had been displaced by early July 2017; ASG engages heavily in kidnappings for ransom and kills hostages when ransoms are denied, such as beheading German hostage Jurgen KANTNER on 27 February 2017 and Canadian hostages Robert Hall on 13 June 2016 and John Ridsdel on 25 April 2016; reportedly, ASG was holding more than 20 foreign hostages as of February 2017; operatives bombed the 10,000-ton Superferry 14 on 27 February 2004 in the Philippines, killing 116 people; as of 2017, the ship's bombing remains the world's deadliest terrorist attack at sea; assessed in 2016 to have over 400 fighters, although several of them were reportedly killed in 2017 during clashes in Marawi

Communist Party of the Philippines/New People's Army (CPP/NPA): aim(s): destabilize the Philippines' economy to inspire the

populace to revolt against the government and, ultimately, overthrow the Philippine Government to install a communist regime

area(s) of operation: this decades-long Maoist-inspired armed group operates throughout most of the country, primarily in rural regions, with its strongest presence in the Sierra Madre Mountains, rural Luzon, Visayas, and parts of northern and eastern Mindanao; maintains cells in Manila, Davao City, and other metropolitan areas; before entering into formal peace talks with the Philippine Government on 19 January 2017—with the National Democratic Front representing the group—leaders deployed operatives to launch lethal attacks against Philippine military and security forces, government officials, government facilities, infrastructure (including power facilities, telecommunication towers, and bridges), foreign enterprises, and businesses that refused to pay extortion or “revolutionary taxes”; at least 30,000 people in the Philippines have been killed in its attacks since its inception in March 1969; killed four US military personnel in the Philippines during the 1980s and continues to oppose US military and commercial presence; estimated in late 2015 to have 4,000 male and female members, down from its peak strength of approximately 26,000 in the 1980s; in recent years, the Philippine Government has referred to the group as CNN, short for the Communist Party of the Philippines-New People’s Army-National Democratic Front (CPP-NPA-NDF)

Terrorist groups—foreign based: *Islamic State of Iraq and the Levant (ISIL): aim(s):* establish a branch in Lanao de Sur Province

area(s) of operation: as of mid-2017, ISIL-affiliates Abu Sayyaf Group (ASG) and the Maute Group (a.k.a. Islamic State of Lanao) continued to control Marawi, Lanao de Sur Province’s capitol; under ASG’s supreme leader, Isnilon HAPILON, the two groups attacked Marawi on 23 May 2017, when government forces attempted to capture HAPILON; over 500 people had died in the conflict (89 security personnel and approximately 65 civilians and 353 militants) and over 471,224 others had been displaced by early July 2017

Jemaah Islamiya (JI): aim(s): enhance its networks in the Philippines and, ultimately, overthrow the Philippine Government and establish a pan-Islamic state across Southeast Asia

area(s) of operation: maintains an operational and recruitment

presence, especially in the south; longstanding bases include JI's Camp Jabal Quba on Mount Cararao in Lanao del Sur Province in the Autonomous Region in Muslim Mindanao; 25 January 2015 members ambushed a police anti-terrorism squad conducting a raid in Maguindaneo Province's city of Mamasapano in the Philippines' southern island of Mindanao, killing 44 police officers and three civilians; incarcerated members radicalize and recruit fellow prisoners

TRANSNATIONAL ISSUES

Disputes—international: Philippines claims sovereignty over Scarborough Reef (also claimed by China together with Taiwan) and over certain of the Spratly Islands, known locally as the Kalayaan (Freedom) Islands, also claimed by China, Malaysia, Taiwan, and Vietnam; the 2002 “Declaration on the Conduct of Parties in the South China Sea,” has eased tensions in the Spratly Islands but falls short of a legally binding “code of conduct” desired by several of the disputants; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Philippines retains a dormant claim to Malaysia's Sabah State in northern Borneo based on the Sultanate of Sulu's granting the Philippines Government power of attorney to pursue a sovereignty claim on his behalf; maritime delimitation negotiations continue with Palau

Refugees and internally displaced persons: IDPs: 359,680 (government troops fighting the Moro Islamic Liberation Front, the Abu Sayyaf Group, and the New People's Army; clan feuds; natural disasters) (2017)

stateless persons: 4,636 (2016); note—stateless persons are descendants of Indonesian migrants

Illicit drugs: domestic methamphetamine production has been a growing problem in recent years despite government crackdowns; major consumer of amphetamines; longstanding marijuana producer mainly in rural areas where Manila's control is limited

PITCAIRN ISLANDS

INTRODUCTION

Background: Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

GEOGRAPHY

Location: Oceania, islands in the South Pacific Ocean, about midway between Peru and New Zealand

Geographic coordinates: 25 04 S, 130 06 W

ECONOMY

Economy—overview: The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

POLAND

INTRODUCTION

Background: Poland's history as a state began near the middle of the 10th century. By the mid-16th century, the Polish-Lithuanian Commonwealth ruled a vast tract of land in Central and Eastern

Europe. During the 18th century, internal disorders weakened the nation, and in a series of agreements between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland among themselves. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union “Solidarity” that over time became a political force with over 10 million members. Free elections in 1989 and 1990 won Solidarity control of the parliament and the presidency, bringing the communist era to a close. A “shock therapy” program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe. Poland joined NATO in 1999 and the EU in 2004. With its transformation to a democratic, market-oriented country largely completed and with large investments in defense, energy, and other infrastructure, Poland is an increasingly active member of Euro-Atlantic organizations.

Flag description: two equal horizontal bands of white (top) and red; colors derive from the Polish emblem—a white eagle on a red field

note: similar to the flags of Indonesia and Monaco which are red (top) and white

National symbol(s): white crowned eagle; national colors: white, red

National anthem: name: “Mazurek Dabrowskiego” (Dabrowski’s Mazurka)

lyrics/music: Jozef WYBICKI/traditional

note: adopted 1927; the anthem, commonly known as “Jeszcze Polska nie zginela” (Poland Has Not Yet Perished), was written in 1797; the lyrics resonate strongly with Poles because they reflect the numerous occasions in which the nation’s lands have been occupied

ECONOMY

Economy—overview: Poland has the sixth-largest economy in the EU and has long had a reputation as a business-friendly country with largely sound macroeconomic policies. Since 1990, Poland has pursued a policy of economic liberalization. During the 2008-09 economic slowdown Poland was the only EU country to avoid a recession, in part because of the government’s loose fiscal policy combined with a commitment to rein in spending in the medium-term Poland is the largest recipient of EU development funds and their cyclical allocation can significantly impact the rate of economic growth.

The Polish economy performed well during the 2014-17 period, with the real GDP growth rate generally exceeding 3%, in part because of increases in government social spending that have helped to accelerate consumer-driven growth. However, since 2015, Poland has implemented new business restrictions and taxes on foreign-dominated economic sectors, including banking and insurance, energy, and healthcare, that have dampened investor sentiment and has increased the government’s ownership of some firms. The government reduced the retirement age in 2016 and has had mixed success in introducing new taxes and boosting tax compliance to offset the increased costs of social spending programs

and relieve upward pressure on the budget deficit. Some credit ratings agencies estimate that Poland during the next few years is at risk of exceeding the EU's 3%-of-GDP limit on budget deficits, possibly impacting its access to future EU funds. Poland's economy is projected to perform well in the next few years in part because of an anticipated cyclical increase in the use of its EU development funds and continued, robust household spending.

Poland faces several systemic challenges, which include addressing some of the remaining deficiencies in its road and rail infrastructure, business environment, rigid labor code, commercial court system, government red tape, and burdensome tax system, especially for entrepreneurs. Additional long-term challenges include diversifying Poland's energy mix, strengthening investments in innovation, research, and development, as well as stemming the outflow of educated young Poles to other EU member states, especially in light of a coming demographic contraction due to emigration, persistently low fertility rates, and the aging of the Solidarity-era baby boom generation.

PORTUGAL

INTRODUCTION

Background: Following its heyday as a global maritime power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence of Brazil, its wealthiest colony, in 1822. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986.

ECONOMY

Economy—overview: Portugal has become a diversified and increasingly service-based economy since joining the European Community—the EU’s predecessor—in 1986. Over the following two decades, successive governments privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country joined

the Economic and Monetary Union in 1999 and began circulating the euro on 1 January 2002 along with 11 other EU members.

The economy grew by more than the EU average for much of the 1990s, but the rate of growth slowed in 2001-08. After the global financial crisis in 2008, Portugal's economy contracted in 2009 and fell into recession from 2011 to 2013, as the government implemented spending cuts and tax increases to comply with conditions of an EU-IMF financial rescue package, signed in May 2011. Portugal successfully exited its EU-IMF program in May 2014, and its economic recovery gained traction in 2015 because of strong exports and a rebound in private consumption. GDP growth accelerated in 2016, and probably reached 2.5 % in 2017. Unemployment remained high, at 9.7% in 2017, but has improved steadily since peaking at 18% in 2013.

The center-left minority Socialist government has unwound some unpopular austerity measures while managing to remain within most EU fiscal targets. The budget deficit fell from 11.2% of GDP in 2010 to 1.8% in 2017, the country's lowest since democracy was restored in 1974, and surpassing the EU and IMF projections of 3%. Portugal exited the EU's excessive deficit procedure in mid-2017.

PUERTO RICO

INTRODUCTION

Background: Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Christopher COLUMBUS' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self-government. In plebiscites held in 1967, 1993, and 1998, voters chose not to alter the existing political status with the US, but the results of a 2012 vote left open the possibility of American statehood. Economic recession on the island has led to a net population loss since about 2005, as large numbers of residents moved to the US mainland. The trend has accelerated since 2010; in 2014, Puerto Rico experienced a net population loss to the mainland of 64,000, more than double the net loss of 26,000 in 2010. Hurricane Maria struck the island on 20 September 2017 causing catastrophic damage, including destruction of the electrical grid that had been crippled by Hurricane Irma just two weeks before. It was the worst storm to hit the island in eight decades, and damage is estimated in the tens of billions of dollars.

GEOGRAPHY

Location: Caribbean, island between the Caribbean Sea and the North Atlantic Ocean, east of the Dominican Republic

Geographic coordinates: 18 15 N, 66 30 W

GOVERNMENT

Country name: *conventional long form:* Commonwealth of Puerto Rico

conventional short form: Puerto Rico

etymology: Christopher COLUMBUS named the island San Juan Bautista (Saint John the Baptist) and the capital city and main port Cuidad de Puerto Rico (Rich Port City); over time, however, the names were shortened and transposed and the island came to be called Puerto Rico and its capital San Juan

Dependency status: unincorporated, organized territory of the US with commonwealth status; policy relations between Puerto Rico and the US conducted under the jurisdiction of the Office of the President

Government type: presidential democracy; a self-governing commonwealth in political association with the US

Capital: *name:* San Juan

geographic coordinates: 18 28 N, 66 07 W

time difference: UTC-4 (1 hour ahead of Washington, DC, during Standard Time)

Administrative divisions: none (territory of the US with commonwealth status); there are no first-order administrative divisions as defined by the US Government, but there are 78 municipalities (municipios, singular—municipio) at the second order; Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arecibo, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Camuy, Canovanas, Carolina, Catano, Cayey, Ceiba, Ciales, Cidra, Coamo, Comerio, Corozal, Culebra, Dorado, Fajardo, Florida, Guanica, Guayama, Guayanilla, Guaynabo, Gurabo, Hatillo, Hormigueros, Humacao, Isabela, Jayuya, Juana Diaz, Juncos, Lajas, Lares, Las Marias, Las Piedras, Loiza, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Morovis, Naguabo, Naranjito, Orocovis, Patillas, Penuelas, Ponce, Quebradillas, Rincon, Rio Grande, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, San

Independence: none (territory of the US with commonwealth status)

National holiday: US Independence Day, 4 July (1776); Puerto Rico Constitution Day, 25 July (1952)

Constitution: previous 1900 (Organic Act, or Foraker Act); latest ratified 3 March 1952, approved 3 July 1952, effective 25 July 1952 (2016)

Legal system: civil law system based on the Spanish civil code and within the framework of the US federal system

Citizenship: see United States

Suffrage: 18 years of age; universal; note—*island residents are US citizens but do not vote in US presidential elections*

Executive branch: *chief of state:* President Donald J. TRUMP (since 20 January 2017); Vice President Michael R. PENCE (since 20 January 2017)

head of government: Governor Ricardo ROSSELLO (since 2 January 2017)

cabinet: Cabinet appointed by governor with the consent of the Legislative Assembly

elections/appointments: president and vice president indirectly elected on the same ballot by an Electoral College of ‘electors’ chosen from each state; president and vice president serve a 4-year term (eligible for a second term); under the US Constitution, residents of Puerto Rico do not vote in elections for US president and vice president; however, they may vote in Democratic and Republican party presidential primary elections; governor directly elected by simple majority popular vote for a 4-year term (no term limits); election last held on 8 November 2016 (next to be held in November 2020)

election results: Ricardo ROSSELLO elected governor; percent of vote —Ricardo ROSSELLO (PNP) 41.8%, David BERNIER (PPD) 38.9%, Alexandra LUGARO (independent) 11.1%, Manuel CIDRE (independent) 5.7%

Legislative branch: *description:* bicameral Legislative Assembly or Asamblea Legislativa consists of the Senate or Senado (27 seats; 16

members directly elected in multi-seat constituencies by simple majority vote and 11 at-large members directly elected by simple majority vote to serve 4-year terms); the House of Representatives or Camara de Representantes (51 seats; members directly elected in single-seat constituencies by simple majority vote to serve 4-year terms)

elections: Senate—last held on 8 November 2016 (next to be held on 3 November 2020); House of Representatives—last held on 8 November 2016 (next to be held on 3 November 2020)

election results: Senate—percent of vote by party—NA; seats by party—PNP 21, PPD 7, PIP 1, Independent 1; House of Representatives—percent of vote by party—NA; seats by party—PNP 34, PPD 16, PIP 1

note: Puerto Rico directly elects 1 member by simple majority vote to serve a 4-year term as a commissioner to the US House of Representatives; the commissioner can vote when serving on a committee and when the House meets as the Committee of the Whole House but not when legislation is submitted for a “full floor” House vote; election of commissioner last held on 8 November 2016 (next to be held on 6 November 2018)

Judicial branch: *highest court(s):* Supreme Court (consists of the chief justice and 8 associate justices)

judge selection and term of office: justices appointed by the governor and confirmed by majority Senate vote; judges serve until compulsory retirement at age 70

Diplomatic representation in the US: none (territory of the US)

Diplomatic representation from the US: none (territory of the US with commonwealth status)

Flag description: five equal horizontal bands of red (top, center, and bottom) alternating with white; a blue isosceles triangle based on the hoist side bears a large, white, five-pointed star in the center; the white star symbolizes Puerto Rico; the three sides of the triangle signify the executive, legislative and judicial parts of the government; blue stands for the sky and the coastal waters; red symbolizes the blood shed by warriors, while white represents liberty, victory, and peace

note: design initially influenced by the US flag, but similar to the Cuban flag, with the colors of the bands and triangle reversed

National symbol(s): Puerto Rican spindalis (bird), coqui (frog); national colors: red, white, blue

National anthem: name: “La Borinquena” (The Puerto Rican)

lyrics/music: Manuel Fernandez JUNCOS/Felix Astol ARTES

note: music adopted 1952, lyrics adopted 1977; the local anthem’s name is a reference to the indigenous name of the island, Borinquen; the music was originally composed as a dance in 1867 and gained popularity in the early 20th century; there is some evidence that the music was written by Francisco RAMIREZ; as a commonwealth of the US, “The Star-Spangled Banner” is official (see United States)

ECONOMY

Economy—overview: Puerto Rico had one of the most dynamic economies in the Caribbean region until 2006; however, growth has been negative for each of the last 11 years. The downturn coincided with the phaseout of tax preferences that had led US firms to invest heavily in the Commonwealth since the 1950s, and a steep rise in the price of oil, which generates most of the island’s electricity.

Diminished job opportunities prompted a sharp rise in outmigration, as many Puerto Ricans sought jobs on the US mainland. Unemployment reached 16% in 2011, but declined to

11.5% in December 2017. US minimum wage laws apply in Puerto Rico, hampering job expansion. Per capita income is about two-thirds that of the US mainland.

The industrial sector greatly exceeds agriculture as the locus of economic activity and income. Tourism has traditionally been an important source of income with estimated arrivals of more than 3.6 million tourists in 2008. Puerto Rico's merchandise trade surplus is exceptionally strong, with exports nearly 50% greater than imports, and its current account surplus about 10% of GDP.

Closing the budget deficit while restoring economic growth and employment remain the central concerns of the government. The gap between revenues and expenditures amounted to 0.6% of GDP in 2016, although analysts believe that not all expenditures have been accounted for in the budget and a better accounting of costs would yield an overall deficit of roughly 5% of GDP. Public debt remained steady at 92.5% of GDP in 2017, about \$17,000 per person, or nearly three times the per capita debt of the State of Connecticut, the highest in the US. Much of that debt was issued by state-run schools and public corporations, including water and electric utilities. In June 2015, Governor Alejandro GARCIA Padilla announced that the island could not pay back at least \$73 billion in debt and that it would seek a deal with its creditors.

Hurricane Maria hit Puerto Rico square on in September 2017, causing electrical power outages to 90% of the territory, as well as extensive loss of housing and infrastructure and contamination of potable water. Despite massive efforts, more than 40% of the territory remained without electricity as of yearend 2017. As a result of the destruction, many Puerto Ricans have emigrated to the US mainland.

QATAR

INTRODUCTION

Background: Ruled by the Al Thani family since the mid-1800s,

Qatar within the last 60 years transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. The continuous siphoning off of petroleum revenue through the mid-1990s by Qatari amirs permanently residing in Europe had stunted Qatar's economic growth. Former amir HAMAD bin Khalifa Al Thani, who overthrew his father in a bloodless coup in 1995, ushered in wide-sweeping political and media reforms, unprecedented economic investment, and a growing Qatari regional leadership role, in part through the creation of the pan-Arab satellite news network Al-Jazeera and Qatar's mediation of some regional conflicts. In the 2000s, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia and by 2007 had attained the highest per capita income in the world. Qatar did not experience domestic unrest or violence like that seen in other Near Eastern and North African countries in 2010-11, due in part to its immense wealth. In mid-2013, HAMAD peacefully abdicated, transferring power to his son, the current Amir TAMIM bin Hamad. TAMIM remains popular with the Qatari public, having prioritized improving the domestic welfare of Qataris, including establishing advanced healthcare and education systems and expanding the country's infrastructure in anticipation of Doha's hosting of the 2022 World Cup.

Recently, Qatar's relationships with its neighbors have been tense at times. Following the outbreak of regional unrest in 2011, Doha prided itself on its support for many popular revolutions, particularly in Libya and Syria. This stance was to the detriment of Qatar's relations with Bahrain, Saudi Arabia, and the United Arab Emirates (UAE), which temporarily recalled their respective ambassadors from Doha in March 2014. TAMIM later oversaw a warming of Qatar's relations with Bahrain, Saudi Arabia, and the UAE in November 2014 following Kuwaiti mediation and signing of the Riyadh Agreement. In June 2017, however, the Quartet—Bahrain, Egypt, Saudi Arabia, and the UAE—cut diplomatic and economic ties with Qatar in response to alleged violations of the agreement.

Flag description: maroon with a broad white serrated band (nine white points) on the hoist side; maroon represents the blood shed in Qatari wars, white stands for peace; the nine-pointed serrated edge signifies Qatar as the ninth member of the “reconciled emirates” in the wake of the Qatari-British treaty of 1916

note: the other eight emirates are the seven that compose the UAE and Bahrain; according to some sources, the dominant color was formerly red, but this darkened to maroon upon exposure to the sun and the new shade was eventually adopted

National symbol(s): a maroon field surmounted by a white serrated band with nine white points; national colors: maroon, white

National anthem: name: “Al-Salam Al-Amiri” (The Amiri Salute)

lyrics/music: Sheikh MUBARAK bin Saif al-Thani/Abdul Aziz Nasser OBAIDAN

note: adopted 1996; anthem first performed that year at a meeting of the Gulf Cooperative Council hosted by Qatar

ECONOMY

Economy—overview: Qatar’s oil and natural gas resources are the

country's main economic engine and government revenue source, driving Qatar's high economic growth and per capita income levels, robust state spending on public entitlements, and booming construction spending, particularly as Qatar prepares to host the World Cup in 2022. Although the government has maintained high capital spending levels for ongoing infrastructure projects, low oil and natural gas prices in recent years have led the Qatari Government to tighten some spending to help stem its budget deficit.

Qatar's reliance on oil and natural gas is likely to persist for the foreseeable future. Proved natural gas reserves exceed 25 trillion cubic meters—13% of the world total and, among countries, third largest in the world. Proved oil reserves exceed 25 billion barrels, allowing production to continue at current levels for about 56 years. Despite the dominance of oil and natural gas, Qatar has made significant gains in strengthening non-oil sectors, such as manufacturing, construction, and financial services, leading non-oil GDP to steadily rise in recent years to just over half the total.

Following trade restriction imposed by Saudi Arabia, the UAE, Bahrain, and Egypt in 2017, Qatar established new trade routes with other countries to maintain access to imports.

Trafficking in persons: current situation: Qatar is a destination country for men, women, and children subjected to forced labor, and, to a much lesser extent, forced prostitution; the predominantly foreign workforce migrates to Qatar legally for low- and semi-skilled work but often experiences situations of forced labor, including debt bondage, delayed or nonpayment of salaries, confiscation of passports, abuse, hazardous working conditions, and squalid living arrangements; foreign female domestic workers are particularly vulnerable to trafficking because of their isolation in private homes and lack of protection under Qatari labor laws; some women who migrate for work are also forced into prostitution

tier rating: Tier 2 Watch List—Qatar does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government investigated 11 trafficking cases but did not prosecute or convict any offenders, including exploitative employers and recruitment agencies; the primary solution for resolving labor violations was to transfer a worker's sponsorship to a new employer with minimal effort to investigate whether a forced labor violation had occurred; authorities increased their efforts to protect some trafficking victims, although many victims of forced labor, particularly domestic workers, remained unidentified and unprotected and were sometimes punished for immigration violations or running away from an employer or sponsor; authorities visited worksites throughout the country to meet and educate workers and employers on trafficking regulations, but the government failed to abolish or reform the sponsorship system, perpetuating Qatar's forced labor problem (2015)

ROMANIA

INTRODUCTION

Background: The principalities of Wallachia and Moldavia—for centuries under the suzerainty of the Turkish Ottoman Empire—secured their autonomy in 1856; they were de facto linked in 1859 and formally united in 1862 under the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and acquired new territories—most notably Transylvania—following the conflict. In 1940, Romania allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a communist “people’s republic” in 1947 and the abdication of the king. The decades-long rule of

dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former communists dominated the government until 1996 when they were swept from power. Romania joined NATO in 2004 and the EU in 2007.

Flag description: three equal vertical bands of cobalt blue (hoist side), chrome yellow, and vermilion red; modeled after the flag of France, the colors are those of the principalities of Walachia (red and yellow) and Moldavia (red and blue), which united in 1862 to form Romania; the national coat of arms that used to be centered in the yellow band has been removed

note: now similar to the flag of Chad, whose blue band is darker; also resembles the flags of Andorra and Moldova

National symbol(s): golden eagle; national colors: blue, yellow, red

National anthem: *name:* “Desteapta-te romane!” (Wake up, Romanian!)

lyrics/music: Andrei MURESIANU/Anton PANN

note: adopted 1990; the anthem was written during the 1848 Revolution

ECONOMY

Economy—overview: Romania, which joined the EU on 1 January 2007, began the transition from communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. Romania's macroeconomic gains have only recently started to spur creation of a middle class and to address Romania's widespread poverty. Corruption and red tape continue to permeate the business environment.

In the aftermath of the global financial crisis, Romania signed a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders, but GDP contracted until 2011. In March 2011, Romania and the IMF/EU/World Bank signed a 24-month precautionary standby agreement, worth \$6.6 billion, to promote fiscal discipline, encourage progress on structural reforms, and strengthen financial sector stability; no funds were drawn. In September 2013, Romanian authorities and the IMF/EU agreed to a follow-on standby agreement, worth \$5.4 billion, to continue with reforms. This agreement expired in September 2015, and no funds were drawn. Progress on structural reforms has been uneven, and the economy still is vulnerable to external shocks.

Economic growth rebounded in the 2013-17 period, driven by strong industrial exports, excellent agricultural harvests, and, more recently, expansionary fiscal policies in 2016-2017 that nearly quadrupled Bucharest's annual fiscal deficit, from +0.8% of GDP in 2015 to -3% of GDP in 2016 and an estimated -3.4% in 2017. Industry outperformed other sectors of the economy in 2017. Exports remained an engine of economic growth, led by trade with the EU, which accounts for roughly 70% of Romania trade. Domestic demand was the major driver, due to tax cuts and large wage increases that began last year and are set to continue in 2018.

An aging population, emigration of skilled labor, significant tax evasion, insufficient health care, and an aggressive loosening of the fiscal package compromise Romania's long-term growth and economic stability and are the economy's top vulnerabilities.

RUSSIA

INTRODUCTION

Background: Founded in the 12th century, the Principality of Muscovy was able to emerge from over 200 years of Mongol domination (13th-15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th century, a new ROMANOV Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682-1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Defeat in the Russo-Japanese War of 1904-05 contributed to the Revolution of 1905, which resulted in the formation of a parliament and other reforms. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Iosif STALIN (1928-53) strengthened communist rule and Russian dominance of the Soviet Union at a cost of tens of millions of lives. After defeating Germany in World War II as part of an alliance with the US (1939-1945), the USSR expanded its territory and influence in Eastern Europe and emerged as a global power. The USSR was the principal adversary of the US during the Cold War (1947-1991). The Soviet economy and society stagnated in the decades following Stalin's rule, until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize communism, but his initiatives inadvertently released

forces that by December 1991 splintered the USSR into Russia and 14 other independent republics.

Following economic and political turmoil during President Boris YELTSIN's term (1991-99), Russia shifted toward a centralized authoritarian state under the leadership of President Vladimir PUTIN (2000-2008, 2012-present) in which the regime seeks to legitimize its rule through managed elections, populist appeals, a foreign policy focused on enhancing the country's geopolitical influence, and commodity-based economic growth. Russia faces a largely subdued rebel movement in Chechnya and some other surrounding regions, although violence still occurs throughout the North Caucasus.

GEOGRAPHY

Location: North Asia bordering the Arctic Ocean, extending from Europe (the portion west of the Urals) to the North Pacific Ocean

Geographic coordinates: 60 00 N, 100 00 E

Map references: Asia

Area: *total:* 17,098,242 sq km

land: 16,377,742 sq km

water: 720,500 sq km

country comparison to the world: 1

Area—comparative: approximately 1.8 times the size of the US

Land boundaries: *total:* 22,408 km

border countries (14): Azerbaijan 338 km, Belarus 1,312 km, China (southeast) 4,133 km, China (south) 46 km, Estonia 324 km, Finland 1,309 km, Georgia 894 km, Kazakhstan 7,644 km, North Korea 18 km, Latvia 332 km, Lithuania (Kaliningrad Oblast) 261 km, Mongolia 3,452 km, Norway 191 km, Poland (Kaliningrad Oblast) 210 km, Ukraine 1,944 km

Coastline: 37,653 km

Maritime claims: *territorial sea:* 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: 200-m depth or to the depth of exploitation

Climate: ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to

tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Terrain: broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Elevation: *mean elevation:* 600 m

elevation extremes: *lowest point:* Caspian Sea -28 m

highest point: Gora El'brus 5,642 m (highest point in Europe)

Natural resources: wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, reserves of rare earth elements, timber

note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Land use: *agricultural land:* 13.1%

arable land: 7.3%;

permanent crops: 0.1%;

permanent pasture: 5.7%

forest: 49.4%

other: 37.5% (2011 est.)

Irrigated land: 43,000 sq km (2012)

Population—distribution: population is heavily concentrated in the westernmost fifth of the country extending from the Baltic Sea, south to the Caspian Sea, and eastward parallel to the Kazakh border; elsewhere, sizeable pockets are isolated and generally found in the south

Natural hazards: permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia

volcanism: significant volcanic activity on the Kamchatka Peninsula and Kuril Islands; the peninsula alone is home to some 29 historically active volcanoes, with dozens more in the Kuril Islands; Kliuchevskoi (4,835 m), which erupted in 2007 and 2010, is Kamchatka's most active volcano; Avachinsky and Koryaksky volcanoes, which pose a threat to the city of Petropavlovsk-

Kamchatsky, have been deemed Decade Volcanoes by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Bezymianny, Chikurachki, Ebeko, Gorely, Grozny, Karymsky, Ketoi, Kronotsky, Ksudach, Medvezhia, Mutnovsky, Sarychev Peak, Shiveluch, Tiatia, Tolbachik, and Zheltovsky

Environment—current issues: air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and seacoasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; groundwater contamination from toxic waste; urban solid waste management; abandoned stocks of obsolete pesticides

Environment—international agreements: *party to:* Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 85, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Wetlands, Whaling
signed, but not ratified: Air Pollution-Sulfur 94

Geography—note: largest country in the world in terms of area but unfavorably located in relation to major sea lanes of the world; despite its size, much of the country lacks proper soils and climates (either too cold or too dry) for agriculture; Mount El'brus is Europe's tallest peak; Lake Baikal, the deepest lake in the world, is estimated to hold one fifth of the world's fresh water

GOVERNMENT

Country name: *conventional long form*: Russian Federation

conventional short form: Russia

local long form: Rossiyskaya Federatsiya

local short form: Rossiya

former: Russian Empire, Russian Soviet Federative Socialist Republic

etymology: Russian lands were generally referred to as Muscovy until PETER I officially declared the Russian Empire in 1721; the new name sought to invoke the patrimony of the medieval eastern European Rus state centered on Kyiv in present-day Ukraine; the Rus were a Varangian (eastern Viking) elite that imposed their rule and eventually their name on their Slavic subjects

Government type: semi-presidential federation

Capital: *name*: Moscow

geographic coordinates: 55 45 N, 37 36 E

time difference: UTC + 3 (8 hours ahead of Washington, DC, during Standard Time)

note: Russia has 11 time zones, the largest number of contiguous time zones of any country in the world; in 2014, two time zones were added and DST was dropped

Administrative divisions: 46 provinces (oblasti, singular—oblast), 21 republics (respubliki, singular—respublika), 4 autonomous okrugs (avtonomnyye okrugi, singular—avtonomnyy okrug), 9 krays (kraya, singular—kray), 2 federal cities (goroda, singular—gorod), and 1 autonomous oblast (avtonomnaya oblast')

Flag description: three equal horizontal bands of white (top), blue, and red

note: the colors may have been based on those of the Dutch flag; despite many popular interpretations, there is no official meaning assigned to the colors of the Russian flag; this flag inspired several other Slav countries to adopt horizontal tricolors of the same colors but in different arrangements, and so red, blue, and white became the Pan-Slav colors

National symbol(s): bear, double-headed eagle; national colors: white, blue, red

National anthem: *name:* "Gimn Rossiyskoy Federatsii" (National Anthem of the Russian Federation)

lyrics/music: Sergey Vladimirovich MIKHALKOV/Aleksandr Vasilyevich ALEKSANDROV

note: in 2000, Russia adopted the tune of the anthem of the former Soviet Union (composed in 1939); the lyrics, also adopted in 2000, were written by the same person who authored the Soviet lyrics in 1943

ECONOMY

Economy—overview: Russia has undergone significant changes since the collapse of the Soviet Union, moving from a centrally planned economy towards a more market-based system. Both economic growth and reform have stalled in recent years, however, and Russia remains a predominantly statist economy with a high concentration of wealth in officials' hands. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy, transportation, banking, and defense-related sectors. The protection of property rights is still weak, and the state continues to interfere in the free operation of the private sector.

Russia is one of the world's leading producers of oil and natural gas, and is also a top exporter of metals such as steel and primary aluminum. Russia is heavily dependent on the movement of world commodity prices as reliance on commodity exports makes it vulnerable to boom and bust cycles that follow the volatile swings in global prices. The economy, which had averaged 7% growth during the 1998-2008 period as oil prices rose rapidly, has seen diminishing growth rates since then due to the exhaustion of Russia's commodity-based growth model.

A combination of falling oil prices, international sanctions, and structural limitations pushed Russia into a deep recession in 2015, with GDP falling by close by 2.8%. The downturn continued through 2016, with GDP contracting another 0.2%, but was reversed in 2017 as world demand picked up. Government support for import substitution has increased recently in an effort to diversify the economy away from extractive industries.

note: the chief of the General Staff Mobilization Directorate announced in March 2015 that for health reasons, only 76% of draftees called up during the spring 2015 draft campaign were fit for military service (2015)

TERRORISM

Terrorist groups—foreign based: Aum Shinrikyo (AUM): aim(s): attract new members seeking religious outlets and a willingness to commit an increasing amount of their assets to AUM

area(s) of operation: current membership is comprised largely of Russian nationals living in Russia, where the majority of members have lived since the group formed circa 1984, even during the group’s peak in the 1990s of tens of thousands of members spread across the globe; according to Russian officials in 2016, there are between 1,500 and 30,000 Russian followers living in Russia; recruitment efforts have intensified in recent years; on 20 September 2016, the Russian Supreme Court declared the group to be a terrorist organization and outlawed its activity

Islamic State of Iraq and the Levant (ISIL): aim(s): implement its strict

interpretation of Sharia in Dagestan, Chechnya, Ingushetia, and Kabardino-Balkariya

area(s) of operation: operational in the northern Caucasus's Dagestan, Chechnya, Ingushetia, and Kabardino-Balkariya (ISIL's Wilayat Kavkaz) regions, where the branch has been known as ISIL-Caucasus (ISIL-C) since 23 June 2015; ISIL-C claimed responsibility for attacking a Russian military base on 2 September 2015 in Magaramkent in southern Dagestan, killing and injuring several Russian citizens; ISIL-C was placed in the US Department of State's designated global terror category under Executive Order 13224 on 29 September 2015; overall leader Aslan Avgazarovich BYUTUKAEV (a.k.a. Emir Khamzat) commanded suicide battalions before assuming his current role in June 2015; BYUTUKAEV continues to direct suicide operations and is responsible for numerous lethal suicide bombings over the years, including the 24 January 2011 attack at Moscow's Domodedovo Airport that killed at least 37 people and injured over 100; comprises fighters from four Caucasus regions: Dagestan, Chechnya, Ingushetia, and Kabardino-Balkariya; as of early 2017, an estimated 2,400 Russian nationals were fighting alongside ISIL as foreign fighters

TRANSNATIONAL ISSUES

Disputes—international: Russia remains concerned about the smuggling of poppy derivatives from Afghanistan through Central Asian countries; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with the 2004 Agreement, ending their centuries-long border disputes; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kurils,” occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia's military support and subsequent recognition of Abkhazia and South Ossetia independence in 2008 continue to sour relations with Georgia; Azerbaijan, Kazakhstan, and Russia ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on a one-fifth slice of the sea; Norway and Russia signed a comprehensive maritime boundary agreement in 2010; various groups in Finland advocate restoration of Karelia

(Kareliya) and other areas ceded to the Soviet Union following World War II but the Finnish Government asserts no territorial demands; Russia and Estonia signed a technical border agreement in May 2005, but Russia recalled its signature in June 2005 after the Estonian parliament added to its domestic ratification act a historical preamble referencing the Soviet occupation and Estonia's pre-war borders under the 1920 Treaty of Tartu; Russia contends that the preamble allows Estonia to make territorial claims on Russia in the future, while Estonian officials deny that the preamble has any legal impact on the treaty text; Russia demands better treatment of the Russian-speaking population in Estonia and Latvia; Russia remains involved in the conflict in eastern Ukraine while also occupying Ukraine's territory of Crimea

Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as an EU member state with an EU external border, where strict Schengen border rules apply; preparations for the demarcation delimitation of land boundary with Ukraine have commenced; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov is suspended due to the occupation of Crimea by Russia; Kazakhstan and Russia boundary delimitation was ratified on November 2005 and field demarcation should commence in 2007; Russian Duma has not yet ratified 1990 Bering Sea Maritime Boundary Agreement with the US; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental Shelf (CLCS) and Russia is collecting additional data to augment its 2001 CLCS submission

Refugees and internally displaced persons: refugees (country of origin): 427,240 (Ukraine) (2017)

IDPs: 19,000 (armed conflict, human rights violations, generalized violence in North Caucasus, particularly Chechnya and North Ossetia) (2016)

stateless persons: 90,771 (2016); note—Russia's stateless population consists of Roma, Meskhetian Turks, and ex-Soviet citizens from the former republics; between 2003 and 2010 more than 600,000 stateless people were naturalized; most Meskhetian Turks, followers of Islam with origins in Georgia, fled or were evacuated from

Uzbekistan after a 1989 pogrom and have lived in Russia for more than the required five-year residency period; they continue to be denied registration for citizenship and basic rights by local Krasnodar Krai authorities on the grounds that they are temporary illegal migrants

Trafficking in persons: current situation: Russia is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; with millions of foreign workers, forced labor is Russia's predominant human trafficking problem and sometimes involves organized crime syndicates; workers from Russia, other European countries, Central Asia, and East and Southeast Asia, including North Korea and Vietnam, are subjected to forced labor in the construction, manufacturing, agricultural, textile, grocery store, maritime, and domestic service industries, as well as in forced begging, waste sorting, and street sweeping; women and children from Europe, Southeast Asia, Africa, and Central Asia are subject to sex trafficking in Russia; Russian women and children are victims of sex trafficking domestically and in Northeast Asia, Europe, Central Asia, Africa, the US, and the Middle East

tier rating: Tier 3—Russia does not fully comply with the minimum standards for the elimination of trafficking and is not making a significant effort to do so; prosecutions of trafficking offenders remained low in comparison to the scope of Russia's trafficking problem; the government did not develop or employ a formal system for identifying trafficking victims or referring them to protective services, although authorities reportedly assisted a limited number of victims on an ad hoc basis; foreign victims, the largest group in Russia, were not entitled to state-provided rehabilitative services and were routinely detained and deported; the government has not reported investigating reports of slave-like conditions among North Korean workers in Russia; authorities have made no effort to reduce the demand for forced labor or to develop public awareness of forced labor or sex trafficking (2015)

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption; government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets,

to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; major consumer of opiates

RWANDA

INTRODUCTION

Background: In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in a state-orchestrated genocide, in which Rwandans killed up to a million of their fellow citizens, including approximately three-quarters of the Tutsi population. The genocide ended later that same year when the predominantly Tutsi RPF, operating out of Uganda and northern

Rwanda, defeated the national army and Hutu militias, and established an RPF-led government of national unity. Approximately 2 million Hutu refugees—many fearing Tutsi retribution—fled to neighboring Burundi, Tanzania, Uganda, and former Zaire. Since then, most of the refugees have returned to Rwanda, but several thousand remained in the neighboring Democratic Republic of the Congo (DRC, the former Zaire) and formed an extremist insurgency bent on retaking Rwanda, much as the RPF did in 1990. Rwanda held its first local elections in 1999 and its first post-genocide presidential and legislative elections in 2003. Rwanda in 2009 staged a joint military operation with the Congolese Army in DRC to rout out the Hutu extremist insurgency there, and Kigali and Kinshasa restored diplomatic relations. Rwanda also joined the Commonwealth in late 2009. President Paul KAGAME won the presidential election in August 2017 after changing the constitution in 2016 to allow him to run for a third term.

Nationality: *noun:* Rwandan(s)

adjective: Rwandan

Ethnic groups: Hutu (Bantu), Tutsi (Hamitic), Twa (Pygmy)

Languages: Kinyarwanda (official, universal Bantu vernacular) 93.2%, French (official) <.1, English (official) <.1, Swahili (or Kiswahili, used in commercial centers) <.1, more than one language, other 6.3%, unspecified 0.3% (2002 est.)

Religions: Protestant 50.2% (includes Adventist 12% and other Protestant 38.2%), Roman Catholic 44.3%, Muslim 2%, other 0.9% (includes traditionalist/animist), none 2.5%, unspecified <.1 (2002 est.)

Demographic profile: Rwanda's fertility rate declined sharply during the last decade, as a result of the government's commitment to family planning, the increased use of contraceptives, and a downward trend in ideal family size. Increases in educational attainment, particularly among girls, and exposure to social media also contributed to the reduction in the birth rate. The average number of births per woman decreased from a 5.6 in 2005 to 4.5 in 2016. Despite these significant strides in reducing fertility, Rwanda's birth rate remains very high and will continue to for an extended period of time because of its large population entering reproductive age. Because Rwanda is one of the most densely populated countries in Africa, its persistent high population growth and increasingly small agricultural landholdings will put additional strain on families' ability to raise foodstuffs and access potable water. These conditions will also hinder the government's efforts to reduce poverty and prevent environmental degradation.

The UNHCR recommended that effective 30 June 2013 countries invoke a cessation of refugee status for those Rwandans who fled their homeland between 1959 and 1998, including the 1994 genocide, on the grounds that the conditions that drove them to seek protection abroad no longer exist. The UNHCR's decision is controversial because many Rwandan refugees still fear persecution if they return home, concerns that are supported by the number of

Rwandans granted asylum since 1998 and by the number exempted from the cessation. Rwandan refugees can still seek an exemption or local integration, but host countries are anxious to send the refugees back to Rwanda and are likely to avoid options that enable them to stay. Conversely, Rwanda itself hosts almost 160,000 refugees as of 2017; virtually all of them fleeing conflict in neighboring Burundi and the Democratic Republic of the Congo.

ECONOMY

Economy—overview: Rwanda is a rural, agrarian country with about 35% of the population engaged in subsistence agriculture, and with some mineral and agro-processing. Population density is high but not concentrated in large metropolises – its 13 million people are spread out on a small amount of land (about the size of Vermont and New Hampshire combined). Tourism, minerals, coffee, and tea are Rwanda’s main sources of foreign exchange. Despite Rwanda’s fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap private sector growth.

The 1994 genocide decimated Rwanda’s fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country’s ability to attract private and

external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy beyond pre-1994 levels. GDP has rebounded with an average annual growth of 6%-8% since 2003 and inflation has been reduced to single digits. In 2015, 39% of the population lived below the poverty line, according to government statistics, compared to 57% in 2006. Mining profits in 2015 were reduced by almost half, owing to the drop in global demand for minerals.

Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade; Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners. The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment. In recognition of Rwanda's successful management of its macro economy, the IMF graduated Rwanda to a Policy Support Instrument in 2010.

The Rwandan Government is seeking to become a regional leader in information and communication technologies. In 2012, Rwanda completed the first modern Special Economic Zone (SEZ) in Kigali. The SEZ seeks to attract investment in all sectors, but specifically in agribusiness, information and communications, trade and logistics, mining, and construction. In 2016, the government launched an online system to give investors information about public land and its suitability for agricultural development.

**SAINT HELENA, ASCENSION, AND TRISTAN DA
CUNHA**

INTRODUCTION

Background: Saint Helena is a British Overseas Territory consisting

of Saint Helena and Ascension Islands, and the island group of Tristan da Cunha.

Saint Helena: Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. During the Anglo-Boer War in South Africa, several thousand Boer prisoners were confined on the island between 1900 and 1903.

Saint Helena is one of the most remote populated places in the world. The British Government committed to building an airport on Saint Helena in 2005. After more than a decade of delays and construction, a commercial air service to South Africa via Namibia was inaugurated in October of 2017. The weekly service to Saint Helena from Johannesburg via Windhoek in Namibia takes just over six hours (including the refueling stop in Windhoek) and replaces the mail ship that had made a five-day journey to the island every three weeks.

Ascension Island: This barren and uninhabited island was discovered and named by the Portuguese in 1503. The British garrisoned the island in 1815 to prevent a rescue of Napoleon from Saint Helena. It served as a provisioning station for the Royal Navy's West Africa Squadron on anti-slavery patrol. The island remained under Admiralty control until 1922, when it became a dependency of Saint Helena. During World War II, the UK permitted the US to construct an airfield on Ascension in support of transatlantic flights to Africa and anti-submarine operations in the South Atlantic. In the 1960s the island became an important space tracking station for the US. In 1982, Ascension was an essential staging area for British forces during the Falklands War. It remains a critical refueling point in the air-bridge from the UK to the South Atlantic.

The island hosts one of four dedicated ground antennas (the others are on Diego Garcia (British Indian Ocean Territory), Kwajalein (Marshall Islands), and at Cape Canaveral, Florida (US)) that assist in the operation of the Global Positioning System (GPS) navigation system. NASA and the US Air Force also operate a Meter-Class Autonomous Telescope (MCAT) on Ascension as part of the deep space surveillance system for tracking orbital debris, which can be a hazard to spacecraft and astronauts.

Tristan da Cunha: The island group consists of Tristan da Cunha,

Nightingale, Inaccessible, and Gough Islands. Tristan da Cunha, named after its Portuguese discoverer (1506), was garrisoned by the British in 1816 to prevent any attempt to rescue Napoleon from Saint Helena. Gough and Inaccessible Islands have been designated World Heritage Sites. South Africa leases a site for a meteorological station on Gough Island.

GEOGRAPHY

Location: islands in the South Atlantic Ocean, about midway between South America and Africa; Ascension Island lies 1,300 km (800 mi) northwest of Saint Helena; Tristan da Cunha lies 4,300 km (2,700 mi) southwest of Saint Helena

Geographic coordinates: Saint Helena: 15 57 S, 5 42 W

Ascension Island: 7 57 S, 14 22 W

Terrain: the islands of this group are of volcanic origin associated with the Atlantic Mid-Ocean Ridge

Saint Helena: rugged, volcanic; small scattered plateaus and plains

Ascension: surface covered by lava flows and cinder cones of 44 dormant volcanoes; terrain rises to the east

Tristan da Cunha: sheer cliffs line the coastline of the nearly circular island; the flanks of the central volcanic peak are deeply dissected; narrow coastal plain lies between The Peak and the coastal cliffs

Elevation: *mean elevation*: NA

elevation extremes: *lowest point*: Atlantic Ocean 0 m

highest point: Queen Mary's Peak on Tristan da Cunha 2,060 m; Green Mountain on Ascension Island 859 m; Mount Actaeon on Saint Helena Island 818 m

Natural hazards: active volcanism on Tristan da Cunha

volcanism: the island volcanoes of Tristan da Cunha (2,060 m) and Nightingale Island (365 m) experience volcanic activity; Tristan da Cunha erupted in 1962 and Nightingale in 2004

Environment—current issues: development threatens unique biota on Saint Helena

Geography—note: Saint Helena harbors at least 40 species of plants unknown elsewhere in the world; Ascension is a breeding ground for sea turtles and sooty terns; Queen Mary's Peak on Tristan da Cunha is the highest island mountain in the South Atlantic and a prominent landmark on the sea lanes around southern Africa

PEOPLE AND SOCIETY

Population: 7,828

note: Saint Helena's statistical agency estimated the enumerated national population (including Ascension Island and Tristan da Cunha) to be 5,901 in 2016, according to the 2016 census; only Saint Helena, Ascension, and Tristan da Cunha islands are inhabited, none of the other nearby islands/islets (July 2017 est.)

Demographic profile: The vast majority of the population of Saint Helena, Ascension, and Tristan da Cunha live on Saint Helena. Ascension has no indigenous or permanent residents and is inhabited only by persons contracted to work on the island (mainly with the UK and US military or in the space and communications industries) or their dependents, while Tristan da Cunha—the main island in a small archipelago—has fewer than 300 residents. The population of Saint Helena consists of the descendants of 17th century British sailors and settlers from the East India Company, African slaves, and indentured servants and laborers from India, Indonesia, and China. Most of the population of Ascension are Saint Helenians, Britons, and Americans, while that of Tristan da Cunha descends from shipwrecked sailors and Saint Helenians.

Change in Saint Helena's population size is driven by net outward migration. Since the 1980s, Saint Helena's population steadily has shrunk and aged as the birth rate has decreased and many working-age residents left for better opportunities elsewhere. The restoration of British citizenship in 2002 accelerated family emigration; from 1998 to 2008 alone, population declined by about 20%.

In the last few years, population has experienced some temporary

growth, as foreigners and returning Saint Helenians, have come to build an international airport, but numbers are beginning to fade as the project reaches completion and workers depart. In the long term, once the airport is fully operational, increased access to the remote island has the potential to boost tourism and fishing, provide more jobs for Saint Helenians domestically, and could encourage some ex-patriots to return home. In the meantime, however, Saint Helena, Ascension, and Tristan da Cunha have to contend with the needs of an aging population. The elderly population of the islands has risen from an estimated 9.4% in 1998 to 20.4% in 2016.

ECONOMY

Economy—overview: The economy depends largely on financial assistance from the UK, which amounted to about \$27 million in FY06/07 or more than twice the level of annual budgetary revenues. The local population earns income from fishing, raising livestock, and sales of handicrafts. Because there are few jobs, 25% of the work force has left to seek employment on Ascension Island, on the Falklands, and in the UK.

SAINT KITTS AND NEVIS

INTRODUCTION

Background: Carib Indians occupied the islands of the West Indies for hundreds of years before the British began settlement in 1623. In 1967, the island territory of Saint Christopher-Nevis-Anguilla became an associated state of the UK with full internal autonomy. The island of Anguilla rebelled and was allowed to secede in 1971. The remaining islands achieved independence in 1983 as Saint Kitts and Nevis. In 1998, a referendum on Nevis to separate from Saint Kitts fell short of the two-thirds majority vote needed. Nevis continues in its efforts to separate from Saint Kitts.

GEOGRAPHY

GOVERNMENT

Country name: *conventional long form*: Federation of Saint Kitts and Nevis

conventional short form: Saint Kitts and Nevis

former: Federation of Saint Christopher and Nevis

etymology: Saint Kitts was, and still is, referred to as Saint Christopher and this name was well established by the 17th century (although who first applied the name is unclear); in the 17th century a common nickname for Christopher was Kit or Kitt, so the island began to be referred to as "Saint Kitt's Island" or just "Saint Kitts"; Nevis is derived from the original Spanish name "Nuestra Senora de las Nieves" (Our Lady of the Snows) and refers to the white halo of clouds that generally wreathes Nevis Peak

ECONOMY

Economy—overview: The economy of Saint Kitts and Nevis depends on tourism; since the 1970s, tourism has replaced sugar as the economy’s traditional mainstay. Roughly 200,000 tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in the 2009-2013 period, and the economy returned to growth only in 2014. Like other tourist destinations in the Caribbean, Saint Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism demand.

Following the 2005 harvest, the government closed the sugar industry after several decades of losses. To compensate for lost jobs, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as export-oriented manufacturing and offshore banking. The government has made notable progress in reducing its public debt, from 154% of GDP in 2011 to 83% in 2013, although it still faces one of the highest levels in the world, largely attributable to public enterprise losses. Saint Kitts and Nevis is among other countries in the Caribbean that supplement their economic activity through economic citizenship programs, whereby foreigners can obtain citizenship from Saint Kitts and Nevis by investing there.

SAINT LUCIA

INTRODUCTION

Background: The island, with its fine natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Even after the abolition of slavery on its plantations in 1834, Saint Lucia remained an agricultural island, dedicated to producing tropical commodity crops. Self-government was granted in 1967 and independence in 1979.

ECONOMY

Economy—overview: The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries. Tourism is Saint Lucia's main source of jobs and income—accounting for 65% of GDP—and the island's main source of foreign exchange earnings. The manufacturing sector is the most diverse in the Eastern Caribbean area. Crops such as bananas, mangos, and avocados continue to be grown for export, but St. Lucia's once solid banana industry has been devastated by strong competition.

Saint Lucia is vulnerable to a variety of external shocks, including volatile tourism receipts, natural disasters, and dependence on foreign oil. Furthermore, high public debt—77% of GDP in 2012—and high debt servicing obligations constrain the CHASTANET administration's ability to respond to adverse external shocks.

St. Lucia has experienced anemic growth since the onset of the global financial crisis in 2008, largely because of a slowdown in tourism—airlines cut back on their routes to St. Lucia in 2012. Also, St. Lucia introduced a value added tax in 2012 of 15%, becoming the last country in the Eastern Caribbean to do so. In 2013, the government introduced a National Competitiveness and Productivity Council to address St. Lucia's high public wages and lack of productivity.

SAINT MARTIN

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished Saint Martin to the French and Dutch, who divided it between themselves in 1648. Friction between the two sides caused the border to frequently fluctuate over the next two centuries, with the French eventually holding the greater portion of the island (about 57%). The cultivation of sugar cane introduced African slavery to the island in the late 18th century; the practice was not abolished until 1848. The island became a free port in 1939; the tourism industry was dramatically expanded during the 1970s and 1980s. In 2003, the populace of Saint Martin voted to secede from Guadeloupe and in 2007, the northern portion of the island became a French overseas collectivity. In 2010, the southern Dutch portion of the island became the independent nation of Sint Maarten within the Kingdom of the Netherlands. On 6 September 2017, Hurricane Irma passed over the island of Saint Martin causing extensive damage to roads, communications,

electrical power, and housing; the UN estimated that 90% of the buildings were damaged or destroyed.

ECONOMY

Economy—overview: The economy of Saint Martin centers on tourism with 85% of the labor force engaged in this sector. Over one million visitors come to the island each year with most arriving through the Princess Juliana International Airport in Sint Maarten. The financial sector is also important to Saint Martin’s economy as it facilitates financial mediation for its thriving tourism sector. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported, primarily from Mexico and the US. Saint Martin is reported to have one of the highest per capita income in the Caribbean. As with the rest of the Caribbean, Saint Martin’s financial sector is having to deal with losing correspondent banking relationships.

SAINT VINCENT AND THE GRENADINES

INTRODUCTION

Background: Resistance by native Caribs prevented colonization on Saint Vincent until 1719. Disputed between France and the UK for most of the 18th century, the island was ceded to the latter in 1783. Between 1960 and 1962, Saint Vincent and the Grenadines was a separate administrative unit of the Federation of the West Indies. Autonomy was granted in 1969 and independence in 1979.

ECONOMY

Economy—overview: Success of the economy hinges upon seasonal variations in agriculture, tourism, and construction activity, as well as remittances. Much of the workforce is employed in banana production and tourism. Saint Vincent and the Grenadines is home to a small offshore banking sector and continues to fully adopt international regulatory standards.

This lower-middle-income country remains vulnerable to natural

and external shocks. The economy has shown some signs of recovery due to increased tourist arrivals, falling oil prices and renewed growth in the construction sector. The much anticipated international airport opened in early 2017 with hopes for increased airlift and tourism activity. The government's ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was 67% of GDP at the end of 2013.

MILITARY AND SECURITY

Military branches: no regular military forces; Royal Saint Vincent and the Grenadines Police Force (RSVPF) (2013)

TRANSNATIONAL ISSUES

Disputes—international: joins other Caribbean states to counter Venezuela's claim that Aves Island sustains human habitation, a criterion under UN Convention on the Law of the Sea, which permits Venezuela to extend its EEZ/continental shelf over a large portion of the eastern Caribbean Sea

Trafficking in persons: current situation: Saint Vincent and the Grenadines is a source, transit, and destination country for men, women, and children subjected to forced labor and sex trafficking; some children under 18 are pressured to engage in sex acts in exchange for money or gifts; foreign workers may experience forced labor and are particularly vulnerable when employed by small, foreign-owned companies; adults and children are vulnerable to forced labor domestically, especially in the agriculture sector

tier rating: Tier 2 Watch List—Saint Vincent and the Grenadines does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government for the first time acknowledged a trafficking problem, launched an anti-trafficking public awareness campaign, and conducted anti-trafficking training for law enforcement, immigration, and labor officials; in 2014, authorities initiated three trafficking investigations, two of which were ultimately determined not to be trafficking cases, and did not

prosecute or convict any trafficking offenders; the government did not identify or refer any potential trafficking victims to care (2015)

Illicit drugs: transshipment point for South American drugs destined for the US and Europe; small-scale cannabis cultivation

SAMOA

INTRODUCTION

Background: New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the “Western” from its name in 1997.

ECONOMY

Economy—overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, tourism, agriculture, and fishing. It has a nominal GDP of \$830 million. Agriculture, including fishing, employs roughly two-thirds of the labor force and furnishes 90% of exports, featuring fish, coconut oil, nonu products, and taro. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs over 700 people to make automobile electrical harnesses for an assembly plant in Australia, and accounts for 65% of total exports, but it is set to close by yearend 2017. Industry accounts for nearly 24% of GDP while employing less than 6% of the work force. The service sector accounts for nearly three-quarters of GDP and employs approximately 50% of the labor force. Tourism is an expanding sector accounting for 25% of GDP; 132,000 tourists visited the islands in 2013.

The country is vulnerable to devastating storms. In September 2009, an earthquake and the resulting tsunami severely damaged Samoa and nearby American Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. In December 2012, extensive flooding and wind damage from Tropical Cyclone Evan killed four people, displaced over 6,000, and damaged or destroyed an estimated 1,500 homes on Samoa’s Upolu Island.

The Samoan Government has called for deregulation of the country’s financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Foreign reserves are relatively healthy and inflation is low, but external debt is approximately 45% of GDP. Samoa became the 155th member of the WTO in May 2012, and graduated from least developed country status in January 2014.

SAO TOME AND PRINCIPE

INTRODUCTION

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century—all grown with African plantation slave labor, a form of which lingered into the 20th century. While independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The country held its first free elections in 1991, but frequent internal wrangling between the various political parties precipitated repeated changes in leadership and four failed, non-violent coup attempts in 1995, 1998, 2003, and 2009. In 2012, three opposition parties combined in a no confidence vote to bring down the majority government of former Prime Minister Patrice TROVOADA, but in 2014, legislative elections returned him to the office. President Evaristo CARVALHO, of the same political party as Prime Minister TROVOADA, was elected in September 2016, marking a rare instance in which the positions of president and prime minister are held by the same party. New oil discoveries in the Gulf of Guinea may attract increased attention to the small island nation.

Demographic profile: Sao Tome and Principe's youthful age structure—more than 60% of the population is under the age of 25—and high fertility rate ensure future population growth. Although Sao Tome has a net negative international migration rate, emigration is not a sufficient safety valve to reduce already high levels of unemployment and poverty. While literacy and primary school attendance have improved in recent years, Sao Tome still struggles to improve its educational quality and to increase its secondary school completion rate. Despite some improvements in education and access to healthcare, Sao Tome and Principe has

much to do to decrease its high poverty rate, create jobs, and increase its economic growth.

The population of Sao Tome and Principe descends primarily from the islands' colonial Portuguese settlers, who first arrived in the late 15th century, and the much larger number of African slaves brought in for sugar production and the slave trade. For about 100 years after the abolition of slavery in 1876, the population was further shaped by the widespread use of imported unskilled contract laborers from Portugal's other African colonies, who worked on coffee and cocoa plantations. In the first decades after abolition, most workers were brought from Angola under a system similar to slavery. While Angolan laborers were technically free, they were forced or coerced into long contracts that were automatically renewed and extended to their children. Other contract workers from Mozambique and famine-stricken Cape Verde first arrived in the early 20th century under short-term contracts and had the option of repatriation, although some chose to remain in Sao Tome and Principe.

Today's Sao Tomean population consists of mesticos (creole descendants of the European immigrants and African slaves that first inhabited the islands), forros (descendants of freed African slaves), angolares (descendants of runaway African slaves that formed a community in the south of Sao Tome Island and today are fishermen), servicais (contract laborers from Angola, Mozambique, and Cape Verde), tongas (locally born children of contract laborers), and lesser numbers of Europeans and Asians.

ECONOMY

Economy—overview: This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import fuels, most manufactured goods, consumer goods, and food, making it vulnerable to fluctuations in global commodity prices. Maintaining control of inflation, fiscal discipline, and increasing

flows of foreign direct investment into the nascent oil sector are major economic problems facing the country. The government also has attempted to reduce price controls and subsidies.

Over the years, Sao Tome and Principe has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. It benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries program, which helped bring down the country's \$300 million debt burden. In April 2011, the country completed a Threshold Country Program with The Millennium Challenge Corporation to help increase tax revenues, reform customs, and improve the business environment. In 2016, Sao Tome and Portugal signed a five-year cooperation agreement worth approximately \$64 million, some of which will be provided as loans.

Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. Potential also exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60-40 split with Nigeria, but any actual production is at least several years off. Volatile aid and investment inflows, even with a growing tourism sector, have kept growth moderate at around 4% annually, which is insufficient to alleviate poverty. The IMF in late 2016 expressed concern about the country's banking sector vulnerabilities.

Military—note: Sao Tome and Principe's army is a tiny force with almost no resources at its disposal and would be wholly ineffective operating unilaterally; infantry equipment is considered simple to operate and maintain but may require refurbishment or replacement after 25 years in tropical climates; poor pay, working conditions, and alleged nepotism in the promotion of officers have been problems in the past, as reflected in the 1995 and 2003 coups; these issues are being addressed with foreign assistance aimed at improving the army and its focus on realistic security concerns; command is exercised from the president, through the Minister of Defense, to the Chief of the Armed Forces (infantry, technical issues) and the Chief of the General Staff (logistics, administration, finances) (2012)

SAUDI ARABIA

INTRODUCTION

Background: Saudi Arabia is the birthplace of Islam and home to Islam's two holiest shrines in Mecca and Medina. The king's official title is the Custodian of the Two Holy Mosques. The modern Saudi state was founded in 1932 by ABD AL-AZIZ bin Abd al-Rahman Al SAUD (Ibn Saud) after a 30-year campaign to unify most of the Arabian Peninsula. One of his male descendants rules the country today, as required by the country's 1992 Basic Law. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after the liberation of Kuwait became a source of tension between the royal family and the public until all operational US troops left the country in 2003. Major terrorist attacks in May and November 2003 spurred a strong ongoing campaign against domestic terrorism and extremism.

From 2005 to 2015, King ABDALLAH incrementally modernized the Kingdom. Driven by personal ideology and political pragmatism, he introduced a series of social and economic initiatives, including expanding employment and social opportunities for women, attracting foreign investment, increasing the role of the private sector in the economy, and discouraging businesses from hiring foreign workers. Saudi Arabia saw protests during the 2011 Arab Spring but not the level of bloodshed seen in protests elsewhere in the region. Shia Muslims in the Eastern Province protested primarily against the detention of political prisoners, endemic discrimination, and Bahraini and Saudi Government actions in Bahrain. Riyadh took a cautious but firm approach by arresting some protesters but releasing most of them quickly and by using its state-sponsored clerics to counter political and Islamist activism.

The government held its first-ever elections in 2005 and 2011, when Saudis went to the polls to elect municipal councilors. In December 2015, women were allowed to vote and stand as candidates for the first time in municipal council elections, with 19 women winning seats. King SALMAN bin Abd al-Aziz Al Saud ascended to the throne in 2015 and placed the first next-generation prince, MUHAMMAD BIN NAIF bin Abd al-Aziz Al Saud, in the line of succession as Crown Prince. He designated his son, MUHAMMAD

BIN SALMAN bin Abd al-Aziz Al Saud, as the Deputy Crown Prince. In March 2015, Saudi Arabia led a coalition of 10 countries in a military campaign to restore the government of Yemen, which had been ousted by Huthi forces allied with former president ALI ABDULLAH al-Salih. The war in Yemen has led to civilian casualties and shortages of basic supplies, which has drawn considerable international criticism. In December 2015, Deputy Crown Prince MUHAMMAD BIN SALMAN announced Saudi Arabia would lead a 34-nation Islamic Coalition to fight terrorism (it has since grown to 41 nations). In January 2016, Saudi Arabia executed 47 people on charges of terrorism, including Shia Muslim cleric NIMR al-Nimr. Iranian protesters overran Saudi diplomatic facilities in Iran to protest al-NIMR's execution and the Saudi government responded by cutting off diplomatic ties with Iran.

The country remains a leading producer of oil and natural gas and holds about 16% of the world's proven oil reserves as of 2015. The government continues to pursue economic reform and diversification, particularly since Saudi Arabia's accession to the WTO in 2005, and promotes foreign investment in the Kingdom. In April 2016, the Saudi government announced a broad set of socio-economic reforms, known as Vision 2030. Low global oil prices throughout 2015 and 2016 significantly lowered Saudi Arabia's governmental revenue. In response, the government cut subsidies on water, electricity, and gasoline; reduced government employee compensation packages; and announced limited new land taxes. In coordination with OPEC and some key non-OPEC countries, Saudi Arabia agreed cut oil output in early 2017 to regulate supply and help elevate global prices.

ECONOMY

Economy—overview: Saudi Arabia has an oil-based economy with strong government controls over major economic activities. It possesses about 16% of the world’s proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 87% of budget revenues, 42% of GDP, and 90% of export earnings.

Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and to employ more Saudi nationals. Over 6 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors; at the same

time, however, Riyadh is struggling to reduce unemployment among its own nationals. Saudi officials are particularly focused on employing its large youth population, which generally lacks the education and technical skills the private sector needs.

In 2017, the Kingdom incurred a budget deficit estimated at 8.3% of GDP, which was financed by bond sales and drawing down reserves. Although the Kingdom can finance high deficits for several years by drawing down its considerable foreign assets or by borrowing, it has cut capital spending and reduced subsidies on electricity, water, and petroleum products and plans to introduce a value-added tax. In January 2016, Crown Prince and Deputy Prime Minister MUHAMMAD BIN SALMAN announced that Saudi Arabia intends to list shares of its state-owned petroleum company, ARAMCO—another move to increase revenue and outside investment. The government has also looked at privatization and diversification of the economy more closely in the wake of a diminished oil market. Historically, Saudi Arabia has focused diversification efforts on power generation, telecommunications, natural gas exploration, and petrochemical sectors. More recently, the government has approached investors about expanding the role of the private sector in the health care, education and tourism industries. While Saudi Arabia has emphasized their goals of diversification for some time, current low oil prices may force the government to make more drastic changes ahead of their long-run timeline.

TERRORISM

Terrorist groups—foreign based: al-Qa'ida in the Arabian Peninsula (AQAP): aim(s): overthrow the Saudi Islamic monarchy and, ultimately, establish a regional Islamic caliphate; eradicate Western influence and presence from Saudi Arabia and the rest of the Arabian Peninsula

area(s) of operation: maintains a limited operational presence, targeting Saudi and Western interests; AQAP's senior bombmaker, Ibrahim Hassan Tali al-ASIRI, is among Saudi Arabia's most wanted for arrest

Islamic State of Iraq and the Levant (ISIL): aim(s): replace the Saudi Islamic monarchy with an Islamic state applying ISIL's strict interpretation of Sharia; target minority Shia Muslims, Saudi security personnel, and their interests

area(s) of operation: maintains a robust recruitment presence; conducts deadly strikes against Saudi security personnel and bombs Shia Muslim mosques, markets, and other places where Shia Muslims gather; suicide bombers conducted three bombings on 4 July 2016 in Jiddah, Medina, and al-Qatif, killing at least four Saudi security personnel and wounding several civilians; one bombing was close to Islam's second holiest site, the Prophet's Mosque in Medina where Muhammad is buried; ISIL's bombing and gunfire attacks in Saudi Arabia have killed dozens of people since 2014, primarily in Ash Sharquiyah Province, home to the majority of Shia Muslims living in Saudi Arabia; ISIL refers to Saudi Arabia as its Wilayat Haramayn; ISIL-Saudi Arabia was placed in the US State Department's designated global terror category under Executive Order 13224 on 19 May 2016

TRANSNATIONAL ISSUES

Disputes—international: Saudi Arabia has reinforced its concrete-

filled security barrier along sections of the now fully demarcated border with Yemen to stem illegal cross-border activities; Kuwait and Saudi Arabia continue discussions on a maritime boundary with Iran; Saudi Arabia claims Egyptian-administered islands of Tiran and Sanafir

Refugees and internally displaced persons: refugees (country of origin): 30,000 (Yemen) (2017)

stateless persons: 70,000 (2016); note—thousands of biduns (stateless Arabs) are descendants of nomadic tribes who were not officially registered when national borders were established, while others migrated to Saudi Arabia in search of jobs; some have temporary identification cards that must be renewed every five years, but their rights remain restricted; most Palestinians have only legal resident status; some naturalized Yemenis were made stateless after being stripped of their passports when Yemen backed Iraq in its invasion of Kuwait in 1990; Saudi women cannot pass their citizenship on to their children, so if they marry a non-national, their children risk statelessness

Trafficking in persons: current situation: Saudi Arabia is a destination country for men and women subjected to forced labor and, to a lesser extent, forced prostitution; men and women from South and East Asia, the Middle East, and Africa who voluntarily travel to Saudi Arabia as domestic servants or low-skilled laborers subsequently face conditions of involuntary servitude, including nonpayment and withholding of passports; some migrant workers are forced to work indefinitely beyond the term of their contract because their employers will not grant them a required exit visa; female domestic workers are particularly vulnerable because of their isolation in private homes; women, primarily from Asian and African countries, are believed to be forced into prostitution in Saudi Arabia, while other foreign women were reportedly kidnapped and forced into prostitution after running away from abusive employers; children from South Asia, East Africa, and Yemen are subjected to forced labor as beggars and street vendors in Saudi Arabia, facilitated by criminal gangs

tier rating: Tier 2 Watch List—Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; government officials and high-level religious leaders demonstrated greater

political will to combat trafficking and publically acknowledged the problem—specifically forced labor; the government reported increased numbers of prosecutions and convictions of trafficking offenders; however, it did not proactively investigate and prosecute employers for potential labor trafficking crimes following their withholding of workers' wages and passports, which are illegal; authorities did not systematically use formal criteria to proactively identify victims, resulting in some unidentified victims being arrested, detained, deported, and sometimes prosecuted; more victims were identified and referred to protective services in 2014 than the previous year, but victims of sex trafficking and male trafficking victims were not provided with shelter and remained vulnerable to punishment (2015)

Illicit drugs: regularly enforces the death penalty for drug traffickers, with foreigners being convicted and executed disproportionately; improving anti-money-laundering legislation and enforcement

SENEGAL

INTRODUCTION

Background: The French colonies of Senegal and French Sudan were merged in 1959 and granted independence in 1960 as the Mali Federation. The union broke up after only a few months. Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. The envisaged integration of the two countries was never implemented, and the union was dissolved in 1989. The Movement of Democratic Forces in the Casamance has led a low-level separatist insurgency in southern Senegal since the 1980s. Several peace deals have failed to resolve the conflict, but an unofficial cease-fire has remained largely in effect since 2012. Senegal remains one of the most stable democracies in Africa and has a long history of participating in international peacekeeping and regional mediation. Senegal was ruled by a Socialist Party for 40 years until Abdoulaye WADE was elected president in 2000. He was reelected in 2007 and during his two terms amended Senegal's constitution over a dozen times to increase executive power and weaken the opposition. His decision to run for a third presidential term sparked a large public backlash that led to his defeat in a March 2012 runoff with Macky SALL, whose term runs until 2019. A 2016 constitutional referendum reduced the term to five years with a maximum of two consecutive terms for future presidents.

Demographic profile: Senegal has a large and growing youth population but has not been successful in developing its potential human capital. Senegal's high total fertility rate of almost 4.5 children per woman continues to bolster the country's large youth cohort—more than 60% of the population is under the age of 25. Fertility remains high because of the continued desire for large families, the low use of family planning, and early childbearing. Because of the country's high illiteracy rate (more than 40%), high unemployment (even among university graduates), and widespread poverty, Senegalese youths face dim prospects; women are especially disadvantaged.

Senegal historically was a destination country for economic migrants, but in recent years West African migrants more often use Senegal as a transit point to North Africa—and sometimes illegally onward to Europe. The country also has been host to several thousand black Mauritanian refugees since they were expelled from their homeland during its 1989 border conflict with Senegal. The country's economic crisis in the 1970s stimulated emigration; departures accelerated in the 1990s. Destinations shifted from neighboring countries, which were experiencing economic decline, civil wars, and increasing xenophobia, to Libya and Mauritania because of their booming oil industries and to developed countries (most notably former colonial ruler France, as well as Italy and Spain). The latter became attractive in the 1990s because of job opportunities and their periodic regularization programs (legalizing the status of illegal migrants).

Additionally, about 16,000 Senegalese refugees still remain in

The Gambia and Guinea-Bissau as a result of more than 30 years of fighting between government forces and rebel separatists in southern Senegal's Casamance region.

ECONOMY

Economy—overview: Senegal’s economy is driven by mining, construction, tourism, fisheries and agriculture, which are the primary sources of employment in rural areas. The country’s key export industries include phosphate mining, fertilizer production, agricultural products and commercial fishing and it is also working on oil exploration projects. Senegal relies heavily on donor assistance, remittances and foreign direct investment. Senegal reached a growth rate of 6.5% in 2015 and surpassed that in 2016-17, due in part to a buoyant performance in agriculture because of higher rainfall and productivity in the sector.

President Macky SALL, who was elected in March 2012 under a reformist policy agenda, inherited an economy with high energy costs, a challenging business environment, and a culture of overspending. President SALL unveiled an ambitious economic plan, the Emerging Senegal Plan (ESP), which aims to implement priority economic reforms and investment projects to increase economic growth while preserving macroeconomic stability and debt sustainability. Bureaucratic bottlenecks and a challenging business

climate are among the perennial challenges that may slow the implementation of this plan.

Senegal is receiving technical support from the IMF during 2015-17 under a Policy Support Instrument (PSI) to assist with implementation of the ESP. The PSI implementation continues to be satisfactory as concluded by the IMF's second review mission in March 2016. Investors have signaled confidence in the country through Senegal's successful Eurobond issuances in recent years, including in 2014.

The government is focusing on 19 projects under the ESP to continue the structural transformation of the economy. These 19 projects include the Thies-Touba Highway, including the new airport- Mbour-Thies Highway. Senegal increased the national family allowances program and the community development emergency program in 2016. Electricity supply is a chief constraint for Senegal's development. Electricity prices in Senegal are among the highest in the world. Power Africa, a program led by USAID and OPIC, plans to increase the current 500 MW of generating capacity to over 1,000 mW in the next three to five years. Recent gas discoveries on the Senegal-Mauritanian border, as well as just south of Dakar, will help alleviate some of the energy shortages.

SERBIA

INTRODUCTION

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Communist Partisans resisted the Axis occupation and division of Yugoslavia from 1941 to 1945 and fought nationalist opponents and collaborators as well. The military and political movement headed by Josip Broz “TITO” (Partisans) took full control of Yugoslavia when their domestic rivals and the occupiers were defeated in 1945. Although communists, TITO and his successors (Tito died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In 1989, Slobodan MILOSEVIC became president of the Republic of Serbia and his ultranationalist calls for Serbian domination led to the violent breakup of Yugoslavia along ethnic lines. In 1991, Croatia, Slovenia, and Macedonia declared independence, followed by Bosnia in 1992. The remaining republics of Serbia and Montenegro declared a new Federal Republic of Yugoslavia (FRY) in April 1992 and under MILOSEVIC’s leadership, Serbia led various military campaigns to unite ethnic Serbs in neighboring republics into a “Greater Serbia.” These actions ultimately failed and, after

international intervention, led to the signing of the Dayton Peace Accords in 1995.

MILOSEVIC retained control over Serbia and eventually became president of the FRY in 1997. In 1998, an ethnic Albanian insurgency in the formerly autonomous Serbian province of Kosovo provoked a Serbian counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians living in Kosovo. The MILOSEVIC government's rejection of a proposed international settlement led to NATO's bombing of Serbia in the spring of 1999. Serbian military and police forces withdrew from Kosovo in June 1999, and the UN Security Council authorized an interim UN administration and a NATO-led security force in Kosovo. FRY elections in late 2000 led to the ouster of MILOSEVIC and the installation of democratic government. In 2003, the FRY became the State Union of Serbia and Montenegro, a loose federation of the two republics. Widespread violence predominantly targeting ethnic Serbs in Kosovo in March 2004 led to more intense calls to address Kosovo's status, and the UN began facilitating status talks in 2006. In June 2006, Montenegro seceded from the federation and declared itself an independent nation. Serbia subsequently gave notice that it was the successor state to the union of Serbia and Montenegro.

In February 2008, after nearly two years of inconclusive negotiations, Kosovo declared itself independent of Serbia—an action Serbia refuses to recognize. At Serbia's request, the UN General Assembly (UNGA) in October 2008 sought an advisory opinion from the International Court of Justice (ICJ) on whether Kosovo's unilateral declaration of independence was in accordance with international law. In a ruling considered unfavorable to Serbia, the ICJ issued an advisory opinion in July 2010 stating that international law did not prohibit declarations of independence. In late 2010, Serbia agreed to an EU-drafted UNGA Resolution acknowledging the ICJ's decision and calling for a new round of talks between Serbia and Kosovo, this time on practical issues rather than Kosovo's status. Serbia and Kosovo signed the first agreement of principles governing the normalization of relations between the two countries in April 2013 and are in the process of implementing its provisions. In 2015, Serbia and Kosovo reached four additional agreements within the Brussels Dialogue framework. These included agreements on the Community of Serb-Majority

Municipalities; telecommunications; energy production and distribution; and freedom of movement. President Aleksandar VUCIC has promoted an ambitious goal of Serbia joining the EU by 2020. Under his leadership as prime minister, in January 2014 Serbia opened formal negotiations for accession.

lyrics/music: Jovan DORDEVIC/Davorin JENKO

note: adopted 1904; song originally written as part of a play in 1872 and has been used as an anthem by the Serbian people throughout the 20th and 21st centuries

ECONOMY

Economy—overview: Serbia has a transitional economy largely dominated by market forces, but the state sector remains significant in certain areas. The economy relies on manufacturing and exports, driven largely by foreign investment. MILOSEVIC-era mismanagement of the economy, an extended period of international economic sanctions, civil war, and the damage to Yugoslavia’s infrastructure and industry during the NATO airstrikes in 1999 left the economy worse off than it was in 1990. In 2015, Serbia’s GDP was 27.5% below where it was in 1989.

After former Federal Yugoslav President MILOSEVIC was ousted in September 2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on a market reform program. Serbia renewed its membership in the IMF in December 2000 and rejoined the World Bank and the European Bank for Reconstruction and Development. Serbia has made progress in trade liberalization and enterprise restructuring and privatization, but many large enterprises—including the power utilities, telecommunications company, natural gas company, and others—remain state-owned. Serbia has made some progress towards EU membership, gaining candidate status in March 2012. In January 2014, Serbia’s EU accession talks officially opened and, as of December 2017, Serbia had opened 12 negotiating chapters including one on foreign trade. Serbia’s negotiations with the WTO are advanced, with the country’s complete ban on the trade and cultivation of agricultural biotechnology products representing the primary remaining obstacle to accession. Serbia maintains a three-year Stand-by Arrangement with the IMF worth approximately \$1.3 billion that is scheduled to end in February 2018. The government has shown progress implementing economic reforms, such as fiscal

consolidation, privatization, and reducing public spending.

Unemployment in Serbia, while relatively low (16% in 2017) compared with its Balkan neighbors, remains significantly above the European average. Serbia is slowly implementing structural economic reforms needed to ensure the country's long-term prosperity. Serbia reduced its budget deficit to 1.7% of GDP and its public debt to 71% of GDP in 2017. Public debt had more than doubled between 2008 and 2015. Serbia's concerns about inflation and exchange-rate stability preclude the use of expansionary monetary policy.

Major economic challenges ahead include: stagnant household incomes; the need for private sector job creation; structural reforms of state-owned companies; strategic public sector reforms; and the need for new foreign direct investment. Other serious longer-term challenges include an inefficient judicial system, high levels of corruption, and an aging population. Factors favorable to Serbia's economic growth include the economic reforms it is undergoing as part of its EU accession process and IMF agreement, its strategic location, a relatively inexpensive and skilled labor force, and free trade agreements with the EU, Russia, Turkey, and countries that are members of the Central European Free Trade Agreement.

SEYCHELLES

INTRODUCTION

Background: A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. During colonial rule, a plantation-based economy developed that relied on imported labor, primarily from European colonies in Africa. Independence came in 1976. Single-party rule was brought to a close with a new constitution and free elections in 1993. President France-Albert RENE, who had served since 1977, was reelected in 2001, but stepped down in 2004. Vice President James Alix MICHEL took over the presidency and in 2006 was elected to a

new five-year term; he was reelected in 2011 and again in 2015. In 2016, James MICHEL resigned and handed over the presidency to his Vice-President Danny FAURE.

PEOPLE AND SOCIETY

Population: 93,920 (July 2017 est.)

country comparison to the world: 198

Nationality: *noun:* Seychellois (singular and plural)

adjective: Seychellois

Ethnic groups: mixed French, African, Indian, Chinese, and Arab

Languages: Seychellois Creole (official) 89.1%, English (official) 5.1%, French (official) 0.7%, other 3.8%, unspecified 1.4% (2010 est.)

Religions: Roman Catholic 76.2%, Protestant 10.5% (Anglican 6.1%, Pentecostal Assembly 1.5%, Seventh Day Adventist 1.2%, other Protestant 1.7%), other Christian 2.4%, Hindu 2.4%, Muslim 1.6%, other non-Christian 1.1%, unspecified 4.8%, none 0.9% (2010 est.)

Demographic profile: Seychelles has no indigenous population and was first permanently settled by a small group of French planters, African slaves, and South Indians in 1770. Seychelles' modern population is composed of the descendants of French and later British settlers, Africans, and Indian, Chinese, and Middle Eastern traders and is concentrated on three of its 155 islands—the vast

majority on Mahe and lesser numbers on Praslin and La Digue. Seychelles' population grew rapidly during the second half of the 20th century, largely due to natural increase, but the pace has slowed because of fertility decline. The total fertility rate dropped sharply from 4.0 children per woman in 1980 to 1.9 in 2015, mainly as a result of a family planning program, free education and health care, and increased female labor force participation. Life expectancy has increased steadily, but women on average live 9 years longer than men, a difference that is higher than that typical of developed countries.

The combination of reduced fertility and increased longevity has resulted in an aging population, which will put pressure on the government's provision of pensions and health care. Seychelles' sustained investment in social welfare services, such as free primary health care and education up to the post-secondary level, have enabled the country to achieve a high human development index score—among the highest in Africa. Despite some of its health and education indicators being nearly on par with Western countries, Seychelles has a high level of income inequality.

An increasing number of migrant workers—mainly young men—have been coming to Seychelles in recent years to work in the construction and tourism industries. As of 2011, foreign workers made up nearly a quarter of the workforce. Indians are the largest non-Seychellois population—representing half of the country's foreigners—followed by Malagasy.

Economy—overview: Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle-income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing.

In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing.

In 2008, having depleted its foreign exchange reserves, Seychelles defaulted on interest payments due on a \$230 million Eurobond, requested assistance from the IMF, and immediately enacted a number of significant structural reforms, including liberalization of the exchange rate, reform of the public sector to include layoffs, and the sale of some state assets. In December 2013, the IMF declared that Seychelles had successfully transitioned to a market-based economy with full employment and a fiscal surplus. Effective 1 January 2017, Seychelles was no longer be eligible for trade benefits under the US African Growth and Opportunities Act after having gained developed country status. Seychelles grew at 4.1% in 2017 because of a strong tourist sector and low commodity prices. The Seychellois Government met the IMF's performance criteria for 2017 but recognizes a need to make additional progress to combat high poverty levels, estimated at 39% in 2013.

SIERRA LEONE

INTRODUCTION

Background: The British set up a trading post near present-day Freetown in the 17th century. Originally the trade involved timber and ivory, but later it expanded into slaves. Following the American Revolution, a colony was established in 1787 and Sierra Leone became a destination for resettling black loyalists who had originally been resettled in Nova Scotia. After the abolition of the slave trade in 1807, British crews delivered thousands of Africans liberated from illegal slave ships to Sierra Leone, particularly

Freetown. The colony gradually expanded inland during the course of the 19th century; independence was attained in 1961. Democracy is slowly being reestablished after the civil war (1991-2002) that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about one third of the population). The military, which took over full responsibility for security following the departure of UN peacekeepers at the end of 2005, has developed as a guarantor of the country's stability; the armed forces remained on the sideline during the 2007 and 2012 national elections. In March 2014, the closure of the UN Integrated Peacebuilding Office in Sierra Leone marked the end of more than 15 years of peacekeeping and political operations in Sierra Leone. The government's stated priorities include furthering development—including recovering from the Ebola epidemic—creating jobs, and stamping out endemic corruption.

country comparison to the world: 109

Nationality: *noun:* Sierra Leonean(s)

adjective: Sierra Leonean

Ethnic groups: Temne 35.5%, Mende 33.2%, Limba 6.4%, Kono

Languages: English (official, regular use limited to literate minority), Mende (principal vernacular in the south), Temne (principal vernacular in the north), Krio (English-based Creole, spoken by the descendants of freed Jamaican slaves who were settled in the Freetown area, a lingua franca and a first language for 10% of the population but understood by 95%)

Religions: Muslim 78.6%, Christian 20.8%, other 0.3%, unspecified 0.2% (2013 est.)

Demographic profile: Sierra Leone's youthful and growing population is driven by its high total fertility rate (TFR) of almost 5 children per woman, which has declined little over the last two decades. Its elevated TFR is sustained by the continued desire for large families, the low level of contraceptive use, and the early start of childbearing. Despite its high TFR, Sierra Leone's population growth is somewhat tempered by high infant, child, and maternal mortality rates that are among the world's highest and are a result of poverty, a lack of potable water and sanitation, poor nutrition, limited access to quality health care services, and the prevalence of female genital cutting.

Sierra Leone's large youth cohort—about 60% of the population is under the age of 25—continues to struggle with high levels of unemployment, which was one of the major causes of the country's 1991-2002 civil war and remains a threat to stability today. Its estimated 60% youth unemployment rate is attributed to high levels of illiteracy and unskilled labor, a lack of private sector jobs, and low pay.

Sierra Leone has been a source of and destination for refugees. Sierra Leone's civil war internally displaced as many as 2 million people, or almost half the population, and forced almost another half million to seek refuge in neighboring countries (370,000 Sierra Leoneans fled to Guinea and 120,000 to Liberia). The UNHCR has helped almost 180,000 Sierra Leoneans to return home, while more

than 90,000 others have repatriated on their own. Of the more than 65,000 Liberians who took refuge in Sierra Leone during their country's civil war (1989-2003), about 50,000 have been voluntarily repatriated by the UNHCR and others have returned home independently. As of 2015, less than 1,000 Liberians still reside in Sierra Leone.

ECONOMY

Economy—overview: Sierra Leone is extremely poor and nearly half of the working-age population engages in subsistence agriculture. The country possesses substantial mineral, agricultural, and fishery resources, but it is still recovering from a civil war that destroyed most institutions before ending in the early 2000s.

In recent years, economic growth has been driven by mining—

particularly iron ore. The country's principal exports are iron ore, diamonds, and rutile, and the economy is vulnerable to fluctuations in international prices. Until 2014, the government had relied on external assistance to support its budget, but it was gradually becoming more independent. The Ebola outbreak of 2014 and 2015, combined with falling global commodities prices, caused a significant contraction of economic activity in all areas. While the World Health Organization declared an end to the Ebola outbreak in Sierra Leone in November 2015, low commodity prices in 2015-2016 contributed to the country's biggest fiscal shortfall since 2001. In 2017, increased iron ore exports, together with the end of the Ebola epidemic, supported a resumption of economic growth.

Continued economic growth will depend on rising commodities prices and increased efforts to diversify the sources of growth. Non-mining activities will remain constrained by inadequate infrastructure, such as power and roads, even though power sector projects may provide some additional electricity capacity in the near term. Pervasive corruption and undeveloped human capital will continue to deter foreign investors. Sustained international donor support in the near future will partially offset these fiscal constraints.

TRANSNATIONAL ISSUES

Disputes—international: Sierra Leone opposes Guinean troops' continued occupation of Yenga, a small village on the Makona River that serves as a border with Guinea; Guinea's forces came to Yenga in the mid-1990s to help the Sierra Leonean military to suppress rebels and to secure their common border but have remained there even after both countries signed a 2005 agreement acknowledging that Yenga belonged to Sierra Leone; in 2012, the two sides signed a declaration to demilitarize the area

SINGAPORE

INTRODUCTION

Background: A Malay trading port known as Temasek existed on the island of Singapore by the 14th century. The settlement changed hands several times in the ensuing centuries and was eventually burned in the 17th century and fell into obscurity. The British founded Singapore as a trading colony on the site in 1819. It joined the Malaysian Federation in 1963 but was ousted two years later and became independent. Singapore subsequently became one of the world's most prosperous countries with strong international trading links (its port is one of the world's busiest in terms of tonnage handled) and with per capita GDP equal to that of the leading nations of Western Europe.

ECONOMY

Economy—overview: Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. Unemployment is very low. The economy depends heavily on exports, particularly of consumer electronics, information technology products, medical and optical devices, pharmaceuticals, and on its vibrant transportation, business, and financial services sectors.

The economy contracted 0.6% in 2009 as a result of the global financial crisis, but has continued to grow since 2010. Growth in 2014-17 was slower than during the previous decade, at under 3% annually, largely a result of soft demand for exports amid a sluggish global economy and weak growth in Singapore's manufacturing sector.

The government is attempting to restructure Singapore's economy by weaning its dependence on foreign labor, addressing weak productivity growth, and increasing Singaporean wages. Singapore has attracted major investments in advanced manufacturing, pharmaceuticals, and medical technology production and will continue efforts to strengthen its position as Southeast Asia's leading financial and technology hub. Singapore is a member of the Regional Comprehensive Economic Partnership negotiations with the nine other ASEAN members plus Australia, China, India, Japan, South Korea, and New Zealand. In 2015, Singapore formed, with the other ASEAN members, the ASEAN Economic Community.

Singapore's authorities have arrested several Bangladeshi members and supporters since 2015, who were subsequently deported to Bangladesh

Jemaah Islamiya (JI): aim(s): enhance its networks in Singapore and, ultimately, overthrow the Singapore Government and establish a pan-Islamic state across Southeast Asia

area(s) of operation: maintains a limited presence, primarily recruitment efforts in large cities; authorities have exercised intense counterterrorism measures against the group since at least 2000

TRANSNATIONAL ISSUES

Disputes—international: disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs: drug abuse limited because of aggressive law enforcement efforts, including carrying out death sentences; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

SINT MAARTEN

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and began exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished the island of Saint Martin to the French and Dutch, who divided it amongst themselves in 1648. The establishment of cotton, tobacco, and sugar plantations dramatically expanded African slavery on the island in the 18th and 19th centuries; the practice was not abolished in the Dutch half until 1863. The island's economy declined until 1939 when it became a free port; the tourism industry was dramatically expanded beginning in the 1950s. In 1954, Sint Maarten and several other Dutch Caribbean possessions became part of the Kingdom of the Netherlands as the Netherlands Antilles. In a 2000 referendum, the citizens of Sint Maarten voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective in October of 2010 with the dissolution of the Netherlands Antilles. On 6 September 2017, Hurricane Irma passed over the island of Saint Martin/Sint Maarten causing extensive damage to roads, communications, electrical power, and housing;

the UN estimated that 90% of the buildings were damaged or destroyed. Princess Juliana International Airport was heavily damaged and forced to close to commercial air traffic for five weeks.

Diplomatic representation from the US: the US does not have an embassy in Sint Maarten; the Consul General to Curacao is

accredited to Sint Maarten

Flag description: two equal horizontal bands of red (top) and blue with a white isosceles triangle based on the hoist side; the center of the triangle displays the Sint Maarten coat of arms; the arms consist of an orange-bordered blue shield prominently displaying the white court house in Philipsburg, as well as a bouquet of yellow sage (the national flower) in the upper left, and the silhouette of a Dutch-French friendship monument in the upper right; the shield is surmounted by a yellow rising sun in front of which is a brown pelican in flight; a yellow scroll below the shield bears the motto: SEMPER PROGREDIENS (Always Progressing); the three main colors are identical to those on the Dutch flag

note: the flag somewhat resembles that of the Philippines, but with the main red and blue bands reversed; the banner more closely evokes the wartime Philippine flag

National symbol(s): brown pelican, yellow sage (flower); national colors: red, white, blue

National anthem: *name:* “O Sweet Saint Martin’s Land”

lyrics/music: Gerard KEMPS

note: the song, written in 1958, is used as an unofficial anthem for the entire island (both French and Dutch sides); as a collectivity of France, in addition to the local anthem, “La Marseillaise” is official on the French side (see France); as a constituent part of the Kingdom of the Netherlands, in addition to the local anthem, “Het Wilhelmus” is official on the Dutch side (see Netherlands)

ECONOMY

Economy—overview: The economy of Sint Maarten centers around tourism with nearly four-fifths of the labor force engaged in this sector. Nearly 1.8 million visitors came to the island by cruise ship and roughly 500,000 visitors arrived through Princess Juliana International Airport in 2013. Cruise ships and yachts also call on Sint Maarten’s numerous ports and harbors. Limited agriculture and local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported. Sint Maarten had the highest per capita income among the five islands that formerly comprised the Netherlands Antilles.

SLOVAKIA

INTRODUCTION

Background: Slovakia traces its roots to the 9th century state of Great Moravia. Subsequently, the Slovaks became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Following the formation of the dual Austro-Hungarian monarchy in 1867, language and education policies favoring the use of Hungarian (Magyarization) resulted in a strengthening of Slovak nationalism and a cultivation of cultural ties with the closely related Czechs, who were under Austrian rule. After the dissolution of the Austro-Hungarian Empire at the close of World War I, the Slovaks joined the Czechs to form Czechoslovakia. During the interwar period, Slovak nationalist leaders pushed for autonomy within Czechoslovakia, and in 1939 Slovakia became an independent state allied with Nazi Germany. Following World War II, Czechoslovakia was reconstituted and came under communist rule within Soviet-dominated Eastern Europe. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize communist rule and create "socialism with a human face," ushering in a period of repression known as "normalization." The peaceful "Velvet Revolution" swept the Communist Party from power at the end of 1989 and inaugurated a return to democratic rule and a market economy. On 1 January 1993, the country underwent a nonviolent "velvet divorce" into its two national components, Slovakia and the Czech Republic. Slovakia joined both

NATO and the EU in the spring of 2004 and the euro zone on 1 January 2009.

ECONOMY

Economy—overview: Slovakia's economy suffered from a slow start in the first years after its separation from the Czech Republic in 1993, due to the country's authoritarian leadership and high levels of corruption, but economic reforms implemented after 1998 have placed Slovakia on a path of strong growth. With a population of 5.4 million, the Slovak Republic has a small, open economy driven mainly by automobile and electronics exports, which account for more than 80% of GDP. Slovakia joined the EU in 2004 and the euro zone in 2009. The country's banking sector is sound and predominantly foreign owned.

Slovakia has been a regional FDI champion for several years, attractive due to a relatively low-cost yet skilled labor force, and a favorable geographic location in the heart of Central Europe. Exports and investment have been key drivers of Slovakia's robust growth in recent years. The unemployment rate fell to historical lows in 2017, and rising wages fueled increased consumption, which played a more prominent role in 2017 GDP growth. A favorable outlook for the Eurozone suggests continued strong growth prospects for Slovakia during the next few years, although inflation is also expected to pick up.

Among the most pressing domestic issues potentially threatening the attractiveness of the Slovak market are shortages in the qualified labor force, persistent corruption issues, and an inadequate judiciary, as well as a slow transition to an innovation-based economy. The energy sector in particular is characterized by unpredictable regulatory oversight and high costs, in part driven by government interference in regulated tariffs. Moreover, the government's attempts to maintain low household energy prices could harm the profitability of domestic energy firms while undercutting energy efficiency initiatives.

SLOVENIA

INTRODUCTION

Background: The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multinational state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. Slovenia acceded to both NATO and the EU in the spring of 2004; it joined the euro zone and the Schengen zone in 2007.

lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic nationalism

ECONOMY

Economy—overview: With excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe, Slovenia has one of the highest per capita GDPs in Central Europe, despite having suffered a protracted recession in the 2008-09 period in the wake of the global financial crisis. Slovenia became the first 2004 EU entrant to adopt the euro (on 1 January 2007) and has experienced a stable political and economic transition.

In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In 2007, Slovenia was invited to begin the process for joining the OECD; it became a member in 2012. However, long-delayed privatizations, particularly within Slovenia's largely state-owned and increasingly indebted banking sector, have fueled investor concerns since 2012 that the country would need EU-IMF financial assistance. In 2013, the European Commission granted Slovenia permission to begin recapitalizing ailing lenders and transferring their nonperforming assets into a "bad bank" established to restore bank balance sheets. From 2014 to 2017, export-led growth, fueled by demand in larger European markets, pushed GDP growth above 2.3% in each year from 2014-2016, and probably reached 4.6% in 2017. What had been stubbornly high unemployment fell below 7%

in 2017, driven by strong exports and increasing consumption that boosted labor demand. Continued fiscal consolidation through increased tax collection and social security contributions is set to have a positive impact in 2018 as the government plans a balanced budget.

Prime Minister CERAR's government took office in September 2014, pledging to press ahead with commitments to privatize a select group of state-run companies, rationalize public spending, and further stabilize the banking sector.

TRANSNATIONAL ISSUES

Disputes—international: since the breakup of Yugoslavia in the early 1990s, Croatia and Slovenia have each claimed sovereignty over Piranski Bay and four villages, and Slovenia has objected to Croatia's claim of an exclusive economic zone in the Adriatic Sea; in 2009, however Croatia and Slovenia signed a binding international arbitration agreement to define their disputed land and maritime borders, which led Slovenia to lift its objections to Croatia joining the EU; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through southeastern Europe while encouraging close cross-border ties with Croatia; Slovenia continues to impose a hard border Schengen regime with Croatia, which joined the EU in 2013 but has not yet fulfilled

Schengen requirements

Refugees and internally displaced persons: note: 477,791 estimated refugee and migrant arrivals (January 2015—December 2016); migration through the Western Balkans has decreased significantly since March 2016; Slovenia is predominantly a transit country and hosts fewer than 250 asylum seekers as of September 2017

Illicit drugs: minor transit point for cocaine and Southwest Asian heroin bound for Western Europe, and for precursor chemicals

SOLOMON ISLANDS

INTRODUCTION

Background: The UK established a protectorate over the Solomon Islands in the 1890s. Some of the bitterest fighting of World War II occurred on this archipelago. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, endemic crime, and a narrow economic base have undermined stability and civil society. In June 2003, then Prime Minister Sir Allan KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian-led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has generally been effective in restoring law and order and rebuilding government institutions.

ECONOMY

Economy—overview: The bulk of the population depends on agriculture, fishing, and forestry for at least part of its livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of The Regional Assistance Mission to the Solomon Islands (RAMSI), severe ethnic violence, the closure of key businesses, and an empty government treasury culminated in economic collapse. RAMSI’s efforts to restore law and order and economic stability have led to modest growth as the economy rebuilds.

MILITARY AND SECURITY

Military branches: no regular military forces; Royal Solomon Islands Police Force (2013)

TRANSNATIONAL ISSUES

Disputes—international: since 2003, the Regional Assistance Mission to Solomon Islands, consisting of police, military, and civilian advisors drawn from 15 countries, has assisted in reestablishing and maintaining civil and political order while reinforcing regional stability and security

Trafficking in persons: current situation: the Solomon Islands is a source and destination country for local adults and children and Southeast Asian men and women subjected to forced labor and forced prostitution; women from China, Indonesia, Malaysia, and the Philippines are recruited for legitimate work and upon arrival are forced into prostitution; men from Indonesia and Malaysia recruited to work in the Solomon Islands' mining and logging industries may be subjected to forced labor; local children are forced into prostitution near foreign logging camps, on fishing vessels, at hotels, and entertainment venues; some local children are also sold by their parents for marriage to foreign workers or put up for "informal adoption" to pay off debts and then find themselves forced into domestic servitude or forced prostitution

tier rating: Tier 2 Watch List—the Solomon Islands does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, the Solomon Islands was granted a waiver from an otherwise

required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; the government gazetted implementing regulations for the 2012 immigration act prohibiting transnational trafficking, but the penalties are not sufficiently stringent because they allow the option of paying a fine; a new draft law to address these weaknesses awaits parliamentary review; no new trafficking investigations were conducted, even after labor inspections at logging and fishing companies, no existing cases led to prosecutions or convictions, and no funding was allocated for national anti-trafficking efforts; authorities did not identify or protect any victims and lack any procedures or shelters to do so; civil society and religious organizations provide most of the limited services available; a lack of understanding of the crime of trafficking remains a serious challenge (2015)

SOMALIA

INTRODUCTION

Background: Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing, and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal, parliamentary, and presidential elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims the regions of Sool and Sanaag, and portions of Togdheer. Beginning in 1993, a two-year UN humanitarian effort (primarily in south-central Somalia) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored.

In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the TNG failed to establish adequate security or governing institutions, the Government of Kenya, under the auspices of the Intergovernmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG) of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while UN-sponsored talks between the TFG and the opposition Alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces,

which had entered Somalia in December 2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was doubled in size to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former ICU and ARS chairman as president in January 2009. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlined a five-year mandate leading to the establishment of a new Somali constitution and a transition to a representative government following national elections. In 2009, the TFP amended the TFC to extend TFG's mandate until 2011 and in 2011 Somali principals agreed to institute political transition by August 2012. The transition process ended in September 2012 when clan elders replaced the TFP by appointing 275 members to a new parliament who subsequently elected a new president.

PEOPLE AND SOCIETY

Population: 11,031,386

note: this estimate was derived from an official census taken in 1975 by the Somali Government; population counting in Somalia is complicated by the large number of nomads and by refugee

movements in response to famine and clan warfare (July 2017 est.)
country comparison to the world: 83

Nationality: *noun:* Somali(s)

adjective: Somali

Ethnic groups: Somali 85%, Bantu and other non-Somali 15% (including 30,000 Arabs)

Languages: Somali (official, according to the 2012 Transitional Federal Charter), Arabic (official, according to the 2012 Transitional Federal Charter), Italian, English

Religions: Sunni Muslim (Islam) (official, according to the 2012 Transitional Federal Charter)

Demographic profile: Somalia scores very low for most humanitarian indicators, suffering from poor governance, protracted internal conflict, underdevelopment, economic decline, poverty, social and gender inequality, and environmental degradation. Despite civil war and famine raising its mortality rate, Somalia's high fertility rate and large proportion of people of reproductive age maintain rapid population growth, with each generation being larger than the prior one. More than 60% of Somalia's population is younger than 25, and the fertility rate is among the world's highest at almost 6 children per woman—a rate that has decreased little since the 1970s.

A lack of educational and job opportunities is a major source of tension for Somalia's large youth cohort, making them vulnerable to recruitment by extremist and pirate groups. Somalia has one of the world's lowest primary school enrollment rates—just over 40% of children are in school—and one of world's highest youth unemployment rates. Life expectancy is low as a result of high infant and maternal mortality rates, the spread of preventable diseases, poor sanitation, chronic malnutrition, and inadequate health services.

During the two decades of conflict that followed the fall of the SIAD regime in 1991, hundreds of thousands of Somalis fled their homes. Today Somalia is the world's third highest source country for refugees, after Syria and Afghanistan. Insecurity, drought, floods, food shortages, and a lack of economic opportunities are the driving factors.

As of 2016, more than 1.1 million Somali refugees were hosted in the region, mainly in Kenya, Yemen, Egypt, Ethiopia, Djibouti, and

Uganda, while more than 1.1 million Somalis were internally displaced. Since the implementation of a tripartite voluntary repatriation agreement among Kenya, Somalia, and the UNHCR in 2013, nearly 40,000 Somali refugees have returned home from Kenya's Dadaab refugee camp—still houses to approximately 260,000 Somalis. The flow sped up rapidly after the Kenyan Government in May 2016 announced its intention to close the camp, worsening security and humanitarian conditions in receiving communities in south-central Somalia. Despite the conflict in Yemen, thousands of Somalis and other refugees and asylum seekers from the Horn of Africa risk their lives crossing the Gulf of Aden to reach Yemen and beyond (often Saudi Arabia). Bossaso in Puntland overtook Obock, Djibouti, as the primary departure point in mid-2014.

election results: Mohamed ABDULLAHI Mohamed “Farmaajo” elected president; Federal Parliament second round vote—Mohamed ABDULLAHI Mohamed “Farmaajo” (TPP) 184, HASSAN SHEIKH Mohamud (PDP) 97, Sheikh SHARIF Sheikh Ahmed (ARS) 46

Legislative branch: *description:* bicameral Federal Parliament to consist of an Upper House (54 seats; senators elected by state assemblies to serve 4-year terms) and the House of the People (275 seats; members elected by regional delegates to serve 4-year terms)

note: the inaugural House of the People was appointed in September 2012 by clan elders; in elections in 2016 and 2017, the Federal Parliament became bicameral with elections scheduled for 10 October 2016 for the Upper House and 23 October to 10 November 2016 for the House of the People; while the elections were delayed, they were eventually held in most regions despite voting irregularities; on 27 December 2016, 41 Upper House senators and 242 House of the People members were sworn in

Judicial branch: *highest court(s):* the provisional constitution stipulates the establishment of the Constitutional Court (consists of 5 judges including the chief judge and deputy chief judge); note—under the terms of the 2004 Transitional National Charter, a Supreme Court based in Mogadishu and an Appeal Court were established; yet most regions have reverted to local forms of conflict resolution, either secular, traditional Somali customary law, or sharia Islamic law

judge selection and term of office: judges appointed by the president upon proposal of the Judicial Service Commission, a 9-member judicial and administrative body; judge tenure NA

subordinate courts: federal courts; federal member state-level courts; military courts; sharia courts

ECONOMY

Economy—overview: Despite the lack of effective national governance, Somalia maintains an informal economy largely based on livestock, remittance/money transfer companies, and telecommunications. Somalia’s government lacks the ability to collect domestic revenue and external debt—mostly in arrears—was estimated at about 77% of GDP in 2017.

Agriculture is the most important sector, with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Economic activity is estimated to have increased by 2.4% in 2017 because of growth in the agriculture, construction and

telecommunications sector. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal.

In recent years, Somalia's capital city, Mogadishu, has witnessed the development of the city's first gas stations, supermarkets, and airline flights to Turkey since the collapse of central authority in 1991. Mogadishu's main market offers a variety of goods from food to electronic gadgets. Hotels continue to operate and are supported with private-security militias. Formalized economic growth has yet to expand outside of Mogadishu and a few regional capitals, and within the city, security concerns dominate business. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually, although international concerns over the money transfers into Somalia continues to threaten these services' ability to operate in Western nations. In 2017, Somalia elected a new president and collected a record amount of foreign aid and investment, a positive sign for economic recovery.

MILITARY AND SECURITY

Military branches: National Security Force (NSF): Somali National Army (2017)

Military service age and obligation: 18 is the legal minimum age for compulsory and voluntary military service (2012)

Maritime threats: despite a dramatic drop in the number of attacks in 2016, the International Maritime Bureau continues to report the territorial and offshore waters in the Gulf of Aden and Indian Ocean as a region of significant risk for piracy and armed robbery against ships; during the first half of 2017, nine vessels were attacked or hijacked compared with two in 2016; Operation Ocean Shield, the NATO naval task force established in 2009 to combat Somali piracy, concluded its operations in December 2016 as a result of the drop in reported incidents over the last few years; additional anti-piracy measures on the part of ship operators, including the use of on-board armed security teams, have reduced piracy incidents in that body of water; Somali pirates tend to be heavily armed with automatic weapons and rocket propelled grenades; the use of “mother ships” from which skiffs can be launched to attack vessels allows these pirates to extend the range of their operations hundreds of nautical miles offshore

TERRORISM

Terrorist groups—home based: al-Shabaab: aim(s): discredit and destabilize the Federal Government of Somalia and target any countries’ interests that supports Somalia’s fight against al-Shabaab; establish Islamic rule in Somalia and Kenya’s border regions

area(s) of operation: a core al-Qa’ida affiliate that maintains strongholds in rural areas in the south, where it controls a large swathe of the Lower and Middle Juba regions, and has increased its attacks in 2017 in the northeast in Puntland State; responsible for numerous high-profile bombings and shootings throughout Somalia targeting African Union Mission for Somalia (AMISOM) troops, Somali military and police personnel, and civilian-populated areas, especially where Westerners and other foreigners are present, such as shopping malls, hotels, and restaurants; AMISOM is a regional peacekeeping force operated by the African Union with the approval of the UN; fighters have increasingly targeted peacekeeping forces since early 2016; assassins have killed scores of

civil society figures, government officials, international aid workers, members of NGOs, and journalists; assessed to have less than 10,000 combatants; The death toll from two truck bombs in Somalia's capital soared to an estimated 280 on 14 October 2017 as the deadliest attack in the country's decade-long war with Islamist extremists. Also, more than 300 people were reported wounded.

Terrorist groups—foreign based: al-Qa'ida (AQ): aim(s): bolster networks and, ultimately, establish a pan-Islamic caliphate under a strict Salafi Muslim interpretation of Sharia

area(s) of operation: operates primarily in the south alongside al-Shabaab, an al-Qa'ida affiliate whose aim is to discredit and destabilize the Federal Government of Somalia

Islamic State of Iraq and the Levant (ISIL): aim(s): replace the Federal Government of Somalia with an Islamic state and implement ISIL's strict interpretation of Sharia

area(s) of operation: increasing its operations, recruitment efforts, and training camps in 2017 in the northeast in Puntland State; uses its growing presence to conduct attacks against African Union Mission for Somalia personnel, a regional peacekeeping force operated by the African Union with the UN's approval; leadership includes former al-Shabaab cleric Abdulkadir MUMIN

TRANSNATIONAL ISSUES

Disputes—international: Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; "Somaliland" secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; "Puntland" and "Somaliland" "governments" seek international support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists

Refugees and internally displaced persons: refugees (country of origin): 10,970 (Yemen) (2018)

IDPs: 2.1 million (civil war since 1988, clan-based competition for resources; 2011 famine; insecurity because of fighting between al-

Shabaab and the Transitional Federal Government's allied forces)
(2017)

SOUTH AFRICA

INTRODUCTION

Background: Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (Afrikaners, called “Boers” (farmers) by the British) trekked north to found their own republics, Transvaal and Orange Free State. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Afrikaners resisted British encroachments but were defeated in the Second South African War (1899-1902); however, the British and the Afrikaners, ruled together beginning in 1910 under the Union of South Africa, which became a republic in 1961 after a whites-only referendum. In

1948, the Afrikaner-dominated National Party was voted into power and instituted a policy of apartheid—the separate development of the races—which favored the white minority at the expense of the black majority. The African National Congress (ANC) led the opposition to apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa’s prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime’s eventual willingness to negotiate a peaceful transition to majority rule.

The first multi-racial elections in 1994 following the end of apartheid ushered in majority rule under an ANC-led government. South Africa has since struggled to address apartheid-era imbalances in decent housing, education, and health care. ANC infighting came to a head in 2008 when President Thabo MBEKI was recalled by Parliament, and Deputy President Kgalema MOTLANTHE, succeeded him as interim president. Jacob ZUMA became president after the ANC won general elections in 2009; he was reelected in 2014. His government has been plagued by numerous scandals, leading to gains by opposition parties at the municipal level in 2016.

Demographic profile: South Africa's youthful population is gradually aging, as the country's total fertility rate (TFR) has declined dramatically from about 6 children per woman in the 1960s to roughly 2.2 in 2014. This pattern is similar to fertility trends in South Asia, the Middle East, and North Africa, and sets South Africa apart from the rest of sub-Saharan Africa, where the

average TFR remains higher than other regions of the world. Today, South Africa's decreasing number of reproductive age women is having fewer children, as women increase their educational attainment, workforce participation, and use of family planning methods; delay marriage; and opt for smaller families.

As the proportion of working-age South Africans has grown relative to children and the elderly, South Africa has been unable to achieve a demographic dividend because persistent high unemployment and the prevalence of HIV/AIDs have created a larger-than-normal dependent population. HIV/AIDS was also responsible for South Africa's average life expectancy plunging to less than 43 years in 2008; it has rebounded to 63 years as of 2017. HIV/AIDS continues to be a serious public health threat, although awareness-raising campaigns and the wider availability of anti-retroviral drugs is stabilizing the number of new cases, enabling infected individuals to live longer, healthier lives, and reducing mother-child transmissions.

Migration to South Africa began in the second half of the 17th century when traders from the Dutch East India Company settled in the Cape and started using slaves from South and southeast Asia (mainly from India but also from present-day Indonesia, Bangladesh, Sri Lanka, and Malaysia) and southeast Africa (Madagascar and Mozambique) as farm laborers and, to a lesser extent, as domestic servants. The Indian subcontinent remained the Cape Colony's main source of slaves in the early 18th century, while slaves were increasingly obtained from southeast Africa in the latter part of the 18th century and into the 19th century under British rule.

After slavery was completely abolished in the British Empire in 1838, South Africa's colonists turned to temporary African migrants and indentured labor through agreements with India and later China, countries that were anxious to export workers to alleviate domestic poverty and overpopulation. Of the more than 150,000 indentured Indian laborers hired to work in Natal's sugar plantations between 1860 and 1911, most exercised the right as British subjects to remain permanently (a small number of Indian immigrants came freely as merchants). Because of growing resentment toward Indian workers, the 63,000 indentured Chinese workers who mined gold in Transvaal between 1904 and 1911 were under more restrictive contracts and generally were forced to return

to their homeland.

In the late 19th century and nearly the entire 20th century, South Africa's then British colonies' and Dutch states' enforced selective immigration policies that welcomed "assimilable" white Europeans as permanent residents but excluded or restricted other immigrants. Following the Union of South Africa's passage of a law in 1913 prohibiting Asian and other non-white immigrants and its elimination of the indenture system in 1917, temporary African contract laborers from neighboring countries became the dominant source of labor in the burgeoning mining industries. Others worked in agriculture and smaller numbers in manufacturing, domestic service, transportation, and construction. Throughout the 20th century, at least 40% of South Africa's miners were foreigners; the numbers peaked at over 80% in the late 1960s. Mozambique, Lesotho, Botswana, and Swaziland were the primary sources of miners, and Malawi and Zimbabwe were periodic suppliers.

Under apartheid, a "two gates" migration policy focused on policing and deporting illegal migrants rather than on managing migration to meet South Africa's development needs. The exclusionary 1991 Aliens Control Act limited labor recruitment to the highly skilled as defined by the ruling white minority, while bilateral labor agreements provided exemptions that enabled the influential mining industry and, to a lesser extent, commercial farms, to hire temporary, low-paid workers from neighboring states. Illegal African migrants were often tacitly allowed to work for low pay in other sectors but were always under threat of deportation.

The abolishment of apartheid in 1994 led to the development of a new inclusive national identity and the strengthening of the country's restrictive immigration policy. Despite South Africa's protectionist approach to immigration, the downsizing and closing of mines, and rising unemployment, migrants from across the continent believed that the country held work opportunities. Fewer African labor migrants were issued temporary work permits and, instead, increasingly entered South Africa with visitors' permits or came illegally, which drove growth in cross-border trade and the informal job market. A new wave of Asian immigrants has also arrived over the last two decades, many operating small retail businesses.

In the post-apartheid period, increasing numbers of highly skilled white workers emigrated, citing dissatisfaction with the political

situation, crime, poor services, and a reduced quality of life. The 2002 Immigration Act and later amendments were intended to facilitate the temporary migration of skilled foreign labor to fill labor shortages, but instead the legislation continues to create regulatory obstacles. Although the education system has improved and brain drain has slowed in the wake of the 2008 global financial crisis, South Africa continues to face skills shortages in several key sectors, such as health care and technology.

South Africa's stability and economic growth has acted as a magnet for refugees and asylum seekers from nearby countries, despite the prevalence of discrimination and xenophobic violence. Refugees have included an estimated 350,000 Mozambicans during its 1980s civil war and, more recently, several thousand Somalis, Congolese, and Ethiopians. Nearly all of the tens of thousands of Zimbabweans who have applied for asylum in South Africa have been categorized as economic migrants and denied refuge.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y stands for the “convergence of diverse elements within South African society, taking the road ahead in unity”; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era

note: the South African flag is one of only two national flags to display six colors as part of its primary design, the other is South Sudan’s

National symbol(s): springbok (antelope), king protea flower; national colors: red, green, blue, yellow, black, white

National anthem: *name:* “National Anthem of South Africa”

lyrics/music: Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/Enoch SONTONGA and Marthinus LOURENS de Villiers

note: adopted 1994; a combination of “N’kosi Sikelel’ iAfrica” (God Bless Africa) and “Die Stem van Suid Afrika” (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English (i.e., the five most widely spoken of South Africa’s 11 official languages); music incorporates the melody used in the Tanzanian and Zambian anthems

ECONOMY

Economy—overview: South Africa is a middle-income emerging market with an abundant supply of natural resources; well-

developed financial, legal, communications, energy, and transport sectors; and a stock exchange that is Africa's largest and among the top 20 in the world.

Economic growth has decelerated in recent years, slowing to an estimated 0.7% in 2017. Unemployment, poverty, and inequality—among the highest in the world—remain a challenge. Official unemployment is roughly 27% of the workforce, and runs significantly higher among black youth. Even though the country's modern infrastructure supports a relatively efficient distribution of goods to major urban centers throughout the region, unstable electricity supplies retard growth. Eskom, the state-run power company, is building three new power stations and is installing new power demand management programs to improve power grid reliability; in late 2016 they issued a request for bids to revamp South Africa's nuclear power generating capabilities. Load shedding and resulting rolling blackouts gripped many parts of South Africa in late 2014 and early 2015 because of electricity supply constraints due to technical problems at some generation units, unavoidable planned maintenance, and an accident at a power station.

South Africa's economic policy has focused on controlling inflation; however, the country faces structural constraints that also limit economic growth, such as skills shortages, declining global competitiveness, and frequent work stoppages due to strike action. The government faces growing pressure from urban constituencies to improve the delivery of basic services to low-income areas, to increase job growth, and to provide university level-education at affordable prices. Political infighting among South Africa's ruling party and the volatility of the rand risks economic growth. International investors are concerned about the country's long-term economic stability; as of December 2016, most major international credit ratings agencies placed South Africa only one level above junk bond status.

TRANSNATIONAL ISSUES

Disputes—international: South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration; the governments of South Africa and Namibia have not signed or ratified the text of the 1994 Surveyor's General agreement placing the boundary in the middle of the Orange River

Illicit drugs: transshipment center for heroin, hashish, and cocaine, as well as a major cultivator of marijuana in its own right; cocaine and heroin consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various east African countries, but increasingly producing its own synthetic drugs for domestic consumption; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region and the size of the South African

SOUTHERN OCEAN

INTRODUCTION

Background: A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border—the Antarctic Convergence—which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which, in turn, allows for a greater abundance of animal life. In 2000, the International Hydrographic Organization delimited the waters within the Convergence as a fifth world ocean—the Southern Ocean—by combining the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which

coincides with the Antarctic Treaty region and which approximates the extent of the Antarctic Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

GEOGRAPHY

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references: Antarctic Region

Area: *total:* 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area—comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is 4,000 to 5,000-m deep over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge

lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area

major surface currents: the cold, clockwise-flowing Antarctic Circumpolar Current (West Wind Drift; 21,000 km long) moves perpetually eastward around the continent and is the world's largest and strongest ocean current, transporting 130 million cubic meters of water per second—100 times the flow of all the world's rivers; it is also the only current that flows all the way around the planet and connects the Atlantic, Pacific, and Indian Oceans; the cold Antarctic Coastal Current (East Wind Drift) is the southernmost current in the world, flowing westward and parallel to the Antarctic coastline

Elevation: mean depth: -3,270 m

elevation extremes: *lowest point:* southern end of the South Sandwich Trench -7,235 m

highest point: sea level 0 m

Natural resources: probable large oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals—none exploited; krill, fish

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May–October; most of region is remote from sources of search and rescue

Environment—current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton), damaging the DNA of some fish, and causing sun damage to some mammals; large amount of mortality of seabirds resulting from long-line fishing for toothfish; ocean acidification

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment—international agreements: the Southern Ocean is

subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the cold polar surface waters to the south and the warmer waters to the north
Geography—*note:* the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

GOVERNMENT

Country name: *etymology:* the International Hydrographic Organization (IHO) included the ocean and its definition as the waters south of 60 degrees south in its year 2000 revision, but this has not formally been adopted; the 2000 IHO definition, however, was circulated in a draft edition in 2002 and has acquired de facto usage by many nations and organizations, including the CIA

ECONOMY

Economy—overview: Fisheries in 2013-14 landed 302,960 metric tons, of which 96% (291,370 tons-the highest reported catch since 1991) was krill and 4% (11,590 tons) Patagonian toothfish (also known as Chilean sea bass), compared to 15,330 tons in 2012-13 (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources, which extends slightly beyond the Southern Ocean area). International agreements

were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2014-15 Antarctic summer, 36,702 tourists visited the Southern Ocean, slightly lower than the 37,405 visitors in 2013-14 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators, and does not include passengers on overflights and those flying directly in and out of Antarctica).

TRANSPORTATION

Ports and terminals: *major seaport(s):* McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation—note: Drake Passage offers alternative to transit through the Panama Canal

TRANSNATIONAL ISSUES

Disputes—international: Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the UN Convention on the Law of the Sea to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

SOUTH SUDAN

Since independence on 9 July 2011, South Sudan has struggled with good governance and nation building and has attempted to control rebel militia groups operating in its territory. Economic conditions have deteriorated since January 2012 when the government decided to shut down oil production following bilateral disagreements with Sudan. In December 2013, conflict between government and opposition forces led to a humanitarian crisis with millions of South Sudanese displaced and food insecure. The warring parties signed a peace agreement in August 2015 that created a transitional government of national unity in April 2016. However, in July 2016, fighting broke out between the two principal signatories plunging the country back into conflict.

Languages: English (official), Arabic (includes Juba and Sudanese variants), regional languages include Dinka, Nuer, Bari, Zande, Shilluk

Religions: animist, Christian

Demographic profile: South Sudan, independent from Sudan since July 2011 after decades of civil war, is one of the world's poorest countries and ranks among the lowest in many socioeconomic categories. Problems are exacerbated by ongoing tensions with Sudan over oil revenues and land borders, fighting between government forces and rebel groups, and inter-communal violence. Most of the population lives off of farming, while smaller numbers rely on animal husbandry; more than 80% of the populace lives in rural areas. The maternal mortality rate is among the world's highest for a variety of reasons, including a shortage of health care workers, facilities, and supplies; poor roads and a lack of transport; and cultural beliefs that prevent women from seeking obstetric care. Most women marry and start having children early, giving birth at home with the assistance of traditional birth attendants, who are unable to handle complications.

Educational attainment is extremely poor due to the lack of schools, qualified teachers, and materials. Less than a third of the population is literate (the rate is even lower among women), and half live below the poverty line. Teachers and students are also struggling with the switch from Arabic to English as the language of instruction. Many adults missed out on schooling because of warfare and displacement.

Almost 2 million South Sudanese have sought refuge in neighboring countries since the current conflict began in December 2013. Another 1.96 million South Sudanese are internally displaced as of August 2017. Despite South Sudan's instability and lack of infrastructure and social services, more than 240,000 people have fled to South Sudan to escape fighting in Sudan.

ECONOMY

Economy—overview: Following several decades of civil war with Sudan, industry and infrastructure in landlocked South Sudan are severely underdeveloped and poverty is widespread. Subsistence agriculture provides a living for the vast majority of the population. Property rights are insecure and price signals are weak, because markets are not well organized. After independence, South Sudan's central bank issued a new currency, the South Sudanese pound, allowing a short grace period for turning in the old currency.

South Sudan has little infrastructure—approximately 200 kilometers of paved roads. Electricity is produced mostly by costly diesel generators, and indoor plumbing and potable water are scarce. South Sudan depends largely on imports of goods, services, and capital—mainly from Uganda, Kenya and Sudan.

Nevertheless, South Sudan does have abundant natural resources. At independence in 2011, South Sudan produced nearly three-fourths of former Sudan's total oil output of nearly a half million barrels per day. The Government of South Sudan used to rely on oil for the vast majority of its budget revenues before oil production fell sharply. Oil is exported through a pipeline that runs to refineries and shipping facilities at Port Sudan on the Red Sea. The economy of South Sudan will remain linked to Sudan for some time, given the long lead time and great expense required to build another pipeline, should the government decide to do so. In January 2012, South Sudan suspended production of oil because of its dispute with Sudan over transshipment fees. This suspension lasted 15 months and had a devastating impact on GDP, which declined by 48% in 2012. With the resumption of oil flows the economy rebounded during the second half of calendar year 2013. GDP grew by nearly 30% for the year. This occurred in spite of the

fact that oil production, at an average level of 222,000 barrels per day, was 40% lower compared with 2011, prior to the shutdown. However, the outbreak of conflict in December 2013 combined with a further reduction of oil production and exports, meant that GDP fell significantly from 2014 to 2017, and poverty and food insecurity rose. South Sudan holds one of the richest agricultural areas in Africa with fertile soils and abundant water supplies. Currently the region supports 10-20 million head of cattle.

South Sudan is currently burdened by considerable debt because of increased military spending and revenue shortfalls due to low oil prices and decreased production. South Sudan has received more than \$4 billion in foreign aid since 2005, largely from the UK, the US, Norway, and the Netherlands. Annual inflation peaked at over 800% in October 2016. The government has relied on borrowing from the central bank to fund budget expenses. The decision in December 2015 by the central bank to abandon a fixed exchange rate and allow the South Sudanese Pound to float has not reduced inflation in the short term. Long-term challenges include diversifying the formal economy, alleviating poverty, maintaining macroeconomic stability, improving tax collection and financial management and improving the business environment.

Military branches: South Sudan Defense Force (SSDF): ground force, navy, air force and air defense units (2017)

Military service age and obligation: 18 is the legal minimum age for compulsory and voluntary military service; the Government of South Sudan signed agreements in March 2012 and August 2015 that included the demobilization of all child soldiers within the armed forces and opposition, but the recruitment of child soldiers by the warring parties continues; as of the end of 2016, UNICEF estimates that more than 17,000 child soldiers had been used in the country's civil war since it began in December 2013 (2016)

TRANSNATIONAL ISSUES

Disputes—international: South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan; periodic violent skirmishes with South Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; the boundary that separates Kenya and South Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

Refugees and internally displaced persons: refugees (country of origin): 264,730 (Sudan) (refugees and asylum seekers); 14,975 (Democratic Republic of the Congo) (refugees and asylum seekers) (2018)

IDPs: 1.87 million (alleged coup attempt and ethnic conflict beginning in December 2013; information is lacking on those displaced in earlier years by: fighting in Abyei between the Sudanese Armed Forces and the Sudan People's Liberation Army (SPLA) in May 2011; clashes between the SPLA and dissident militia groups in South Sudan; inter-ethnic conflicts over resources and

cattle; attacks from the Lord's Resistance Army; floods and drought) (2017)

Trafficking in persons: current situation: South Sudan is a source and destination country for men, women, and children subjected to forced labor and sex trafficking; South Sudanese women and girls, particularly those who are internally displaced, orphaned, refugees, or from rural areas, are vulnerable to forced labor and sexual exploitation, often in urban centers; children may be victims of forced labor in construction, market vending, shoe shining, car washing, rock breaking, brick making, delivery cart pulling, and begging; girls are also forced into marriages and subsequently subjected to sexual slavery or domestic servitude; women and girls migrate willingly from Uganda, Kenya, Ethiopia, Eritrea, and the Democratic Republic of the Congo to South Sudan with the promise of legitimate jobs and are forced into the sex trade; inter-ethnic abductions and abductions by criminal groups continue, with abductees subsequently forced into domestic servitude, herding, or sex trafficking; in 2014, the recruitment and use of child soldiers increased significantly within government security forces and was also prevalent among opposition forces

tier rating: Tier 3—South Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; despite the government's formal recommitment to an action plan to eliminate the recruitment and use of child soldiers by 2016, the practice expanded during 2014, and the government did not hold any officers criminally responsible; government officials reportedly are complicit in trafficking offenses but these activities continue to go uninvestigated; authorities reportedly identified five trafficking victims but did not transfer them to care facilities; law enforcement continued to arrest and imprison individuals for prostitution, including trafficking victims; no known steps were taken to address the exploitation of South Sudanese nationals working abroad or foreign workers in South Sudan (2015)

INTRODUCTION

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World War I and II but suffered through a devastating civil war (1936-39). A peaceful transition to democracy following the death of dictator Francisco FRANCO in 1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain a dynamic and rapidly growing economy and made it a global champion of freedom and human rights. More recently Spain has emerged from a severe economic recession that began in mid-2008, posting three straight years of GDP growth above the EU average. Unemployment has fallen, but remains high especially among youth. Spain is the Eurozone's fourth largest economy.

GOVERNMENT

Country name: *conventional long form:* Kingdom of Spain

conventional short form: Spain

local long form: Reino de Espana

local short form: Espana

etymology: derivation of the name “Espana” is uncertain, but may come from the Phoenician term “span,” related to the word “spy,” meaning “to forge metals,” so, “i-spn-ya” would mean “place where metals are forged”; the ancient Phoenicians long exploited the Iberian Peninsula for its mineral wealth

Government type: parliamentary constitutional monarchy

Capital: *name:* Madrid

geographic coordinates: 40 24 N, 3 41 W

time difference: UTC +1 (6 hours ahead of Washington, DC, during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

note: Spain has two time zones, including the Canary Islands

Administrative divisions: 17 autonomous communities (comunidades autonomas, singular—comunidad autonoma) and 2 autonomous cities* (ciudades autonomas, singular—ciudad autonoma); Andalucia; Aragon; Asturias; Canarias (Canary Islands); Cantabria; Castilla-La Mancha; Castilla-Leon; Cataluna (Castilian), Catalunya (Catalan), Catalonha (Aranese) [Catalonia]; Ceuta*; Comunidad Valenciana (Castilian), Comunitat Valenciana (Valencian) [Valencian Community]; Extremadura; Galicia; Illes

Baleares (Balearic Islands); La Rioja; Madrid; Melilla*; Murcia; Navarra (Castilian), Nafarroa (Basque) [Navarre]; Pais Vasco (Castilian), Euskadi (Basque) [Basque Country]

note: the autonomous cities of Ceuta and Melilla plus three small islands of Islas Chafarinas, Penon de Alhucemas, and Penon de Velez de la Gomera, administered directly by the Spanish central government, are all along the coast of Morocco and are collectively referred to as Places of Sovereignty (Plazas de Soberania)

Independence: 1492; the Iberian peninsula was characterized by a variety of independent kingdoms prior to the Muslim occupation that began in the early 8th century A.D. and lasted nearly seven centuries; the small Christian redoubts of the north began the reconquest almost immediately, culminating in the seizure of Granada in 1492; this event completed the unification of several kingdoms and is traditionally considered the forging of present-day Spain

National holiday: National Day (Hispanic Day), 12 October (1492); *note*—commemorates COLUMBUS' arrival in the Americas

Constitution: *history:* previous 1812; latest approved by the General Courts 31 October 1978, passed by referendum 6 December 1978, signed by the king 27 December 1978, effective 29 December 1978

amendments: proposed by the government, by the General Courts (the Congress or the Senate), or by the self-governing communities submitted through the government; passage requires three-fifths majority vote by both houses and passage by referendum if requested by one-tenth of members of either house; proposals disapproved by both houses are submitted to a joint committee, which submits an agreed upon text for another vote; passage requires two-thirds vote in Congress and simple majority vote in the Senate; amended 1992, 2007, 2011 (2016)

Legal system: civil law system with regional variations

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICCT jurisdiction

Citizenship: *citizenship by birth:* no

citizenship by descent only: at least one parent must be a citizen of Spain

dual citizenship recognized: only with select Latin American countries

cabinet: Council of Ministers designated by the president

elections/appointments: the monarchy is hereditary; following legislative elections, the monarch usually proposes at president the leader of the party or coalition with the largest majority of seats, who is then indirectly elected by the Congress of Deputies; election last held on 26 June 2016 (next to be held in June 2020); vice president and Council of Ministers appointed by the president

election results: percent of National Assembly vote—NA

note: there is also a Council of State that is the supreme consultative organ of the government, but its recommendations are non-binding

Legislative branch: *description:* bicameral General Courts or Las Cortes Generales consists of the Senate or Senado (266 seats; 208 members directly elected in multi-seat constituencies by simple majority vote and 58 appointed by the regional legislatures; members serve 4-year terms) and the Congress of Deputies or Congreso de los Diputados (350 seats; 348 members directly elected in 50 multi-seat constituencies by proportional representation vote and 2 directly elected from the North African Ceuta and Melilla enclaves by proportional representation vote; members serve 4-year terms or until the government is dissolved)

elections: Senate—last held on 26 June 2016 (next to be held no later than June 2020); Congress of Deputies—last held on 26 June 2016 (next to be held no later than June 2020)

Flag description: three horizontal bands of red (top), yellow (double width), and red with the national coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of “Plus Ultra” (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century

note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National symbol(s): Pillars of Hercules; national colors: red, yellow

National anthem: *name:* “Himno Nacional Espanol” (National Anthem of Spain)

lyrics/music: no lyrics/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem is the first anthem to be officially adopted, but it has no lyrics; in the years prior to 1931 it became known as “Marcha Real” (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by “Himno de Riego” in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

ECONOMY

Economy—overview: After experiencing a prolonged recession in the wake of the global financial crisis that began in 2008, in 2017 Spain marked the fourth full year of positive economic growth in ten years, largely due to increased private consumption. At the onset of the financial crisis, Spain's GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and continued contracting through most of 2013. In that year, the government successfully shored up struggling banks—exposed to the collapse of Spain's depressed real estate and construction sectors—and in January 2014 completed an EU-funded restructuring and recapitalization program for its financial sector.

Until 2014, credit contraction in the private sector, fiscal austerity, and high unemployment weighed on domestic consumption and investment. The unemployment rate rose from a low of about 8% in 2007 to more than 26% in 2013, but labor reforms prompted a modest reduction to 17% in 2017. High unemployment has strained Spain's public finances, as spending on social benefits increased while tax revenues fell. Spain's budget deficit peaked at 11.4% of GDP in 2010, but Spain gradually reduced the deficit to about 3.3% of GDP in 2017. Public debt has increased substantially—from 60.1% of GDP in 2010 to nearly 96.7% in 2017.

Exports were resilient throughout the economic downturn and helped to bring Spain's current account into surplus in 2013 for the first time since 1986, where it remained through 2016. Rising labor productivity and an internal devaluation resulting from moderating labor costs and lower inflation have helped to improve foreign investor interest in the economy and positive FDI flows have been restored.

Political gridlock after the national elections in December 2015 and June 2016 and ensuing government formation process constrained the caretaker government's ability to implement needed labor, pension, health care, tax, and education reforms—in 2016. The European Commission criticized Spain's 2016 budget for easing austerity measures and for its alleged overly optimistic growth and deficit projections. Spain's borrowing costs are dramatically lower since their peak in mid-2012, and with the recent uptick in economic activity, inflation has reappeared, at 2% per year.

TERRORISM

Terrorist groups—home based: Basque Fatherland and Liberty (ETA): aim(s): establish an independent Basque homeland based on Marxist principles in what is now northern Spain and southwestern

France

area(s) of operation: headquartered in northern Spain, where the Spanish and French Governments collaborate to arrest members and demand disarmament before engaging in negotiations; ETA has refrained from conducting attacks since its 20 October 2011 communique declaring a permanent cessation of violence, but had neither formally disbanded nor given up its weapons arsenal by early 2017; 279 members are currently in Spain's prisons, with an unknown number present in the country; on 14 January 2017, tens of thousands of supporters gathered in Bilbao in northern Spain at the annual ETA prisoner amnesty rally to demand at a minimum that members be released who have served their court-imposed sentences and for others to be transferred to jails close to their families; the group marked its 50th anniversary in 2009 with a series of high-profile and lethal car bombings, including the 29-30 July 2009 attacks on Civil Guard Barracks in Burgos and Calvia that killed two guards and injured more than 65 civilians; responsible for hundreds of deaths in Spain since its inception in 1959; outlawed in Spain

TRANSNATIONAL ISSUES

Disputes—international: in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any “shared sovereignty” arrangement; the Government of Gibraltar insists on equal participation in talks between the UK and Spain; Spain disapproves of UK plans to grant Gibraltar greater autonomy; after voters in the UK chose to leave the EU in a June 2016 referendum, Spain again proposed shared sovereignty of Gibraltar; UK officials rejected Spain's joint sovereignty proposal; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and the islands of Penon de Velez de la Gomera, Penon de Alhucemas, and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); Morocco serves as the primary launching site of illegal migration into Spain from North Africa; Portugal does not recognize Spanish sovereignty over the territory of Olivenza based on a difference of interpretation of the 1815 Congress of Vienna and the 1801 Treaty of Badajoz

SPRATLY ISLANDS

INTRODUCTION

Background: The Spratly Islands consist of more than 100 small

islands or reefs surrounded by rich fishing grounds—and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Since 1985 Brunei has claimed a continental shelf that overlaps a southern reef but has not made any formal claim to the reef. Brunei claims an exclusive economic zone over this area.

GEOGRAPHY

Location: Southeastern Asia, group of reefs and islands in the South China Sea, about two-thirds of the way from southern Vietnam to the southern Philippines

Geographic coordinates: 8 38 N, 111 55 E

Map references: Southeast Asia

Area: *total:* less than 5 sq km

land: less than 5 sq km

water: 0 sq km

note: includes 100 or so islets, coral reefs, and sea mounts scattered over an area of nearly 410,000 sq km (158,000 sq mi) of the central South China Sea

country comparison to the world: 250

Area—comparative: land area is about seven times the size of the National Mall in Washington, DC

Land boundaries: 0 km

Coastline: 926 km

Maritime claims: NA

Climate: tropical

Terrain: small, flat islands, islets, cays, and reefs

Elevation: *mean elevation:* NA

elevation extremes: *lowest point:* South China Sea 0 m

highest point: unnamed location on Southwest Cay 6 m

Natural resources: fish, guano, undetermined oil and natural gas potential

Land use: *agricultural land:* 0%

arable land: 0%;
permanent crops: 0%;
permanent pasture: 0%
forest: 0%
other: 100% (2011 est.)

Natural hazards: typhoons; numerous reefs and shoals pose a serious maritime hazard

Environment—current issues: China's use of dredged sand and coral to build artificial islands harms reef systems; illegal fishing practices indiscriminately harvest endangered species, including sea turtles and giant clams
Geography—note: strategically located near several primary shipping lanes in the central South China Sea; includes numerous small islands, atolls, shoals, and coral reefs

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: there are scattered garrisons occupied by military personnel of several claimant states

GOVERNMENT

Country name: *conventional long form*: none

conventional short form: Spratly Islands

etymology: named after a British whaling captain Richard SPRATLY, who sighted Spratly Island in 1843; the name of the island eventually passed to the entire archipelago

ECONOMY

Economy—overview: Economic activity is limited to commercial fishing. The proximity to nearby oil- and gas-producing sedimentary basins indicate potential oil and gas deposits, but the region is largely unexplored. No reliable estimates of potential reserves are available. Commercial exploitation has yet to be developed.

MILITARY AND SECURITY

Military—note: Spratly Islands consist of more than 100 small islands or reefs of which about 45 are claimed and occupied by China, Malaysia, the Philippines, Taiwan, and Vietnam

TRANSNATIONAL ISSUES

Disputes—international: all of the Spratly Islands are claimed by China (including Taiwan) and Vietnam; parts of them are claimed by Brunei, Malaysia and the Philippines; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural prolongation of its continental shelf and basis for a seabed median with Vietnam; claimants in November 2002 signed the “Declaration on the Conduct of Parties in the South China Sea,” which has eased tensions but falls short of a legally binding “code of conduct”; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

SRI LANKA

INTRODUCTION

Background: The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced circa 250 B.C., and the first kingdoms developed at the cities of Anuradhapura (from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The Portuguese controlled the coastal areas of the island in the 16th century and the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Prevailing tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Both the LTTE and the government unofficially abrogated the ceasefire and violence between the LTTE and government forces intensified in 2006, but the government regained control of the Eastern Province in 2007. The government officially

withdrew from the cease-fire agreement in January 2008 and by May 2009, the remnants of the LTTE had been defeated.

Since the end of the conflict, the government has enacted an ambitious program of economic development projects, many of which are financed by loans from the Government of China. In addition to efforts at reconstructing its economy, the government has resettled more than 95% of those civilians displaced during the final phase of the conflict and released the vast majority of former LTTE combatants captured by Government Security Forces. Slow progress continues on more contentious and politically difficult issues such as reaching a political settlement with Tamil elected representatives and holding accountable those alleged to have been involved in human rights violations and other abuses during the conflict.

Economy—overview: Sri Lanka is attempting to sustain economic growth while maintaining macroeconomic stability under its IMF program that it began in 2016. The government's high debt payments and bloated civil service cadre, which have contributed to historically high budget deficits and low tax revenues, remain a concern. Government debt is about 75% of GDP and remains among the highest of the emerging markets. Sri Lanka will need to balance its elevated debt repayment schedule with its requirement to maintain adequate foreign exchange reserve levels in the coming years.

In May 2016, Sri Lanka regained its preferential trade preferences under the European Union's Generalized System of Preferences Plus (GSP+), enabling many of its firms to export products, including its top export garments, tax free to the EU. Also in 2016, the government reformed elements of the country's tax regime to increase some tax rates and broaden the tax net in response to recommendations made under its IMF program.

Tourism has experienced strong growth during recent years following the resolution of the government's 26-year conflict with the Liberation Tigers of Tamil Eelam. The government has been pursuing large-scale reconstruction and development projects in its efforts to spur growth.

TERRORISM

Terrorist groups—home based: Liberation Tigers of Tamil Eelam (LTTE): aim(s): revive the movement to establish a Tamil homeland
area(s) of operation: sustains efforts primarily in the east to revive

the movement and, occasionally, to plot attacks; despite LTTE's military defeat at the hands of the Sri Lankan Government in 2009, LTTE remains capable of raising funds, mostly from the global Tamil diaspora; members remain operational, such as the LTTE operatives who were arrested in India in 2014 for plotting imminent attacks; authorities continue in 2017 to pursue leaders, operatives, and supporters for arrest; prior to its 2009 defeat, LTTE employed an integrated battlefield insurgent strategy targeting Sri Lanka's key installations and senior political and military leaders; since LTTE began its armed campaign in Sri Lanka in 1983, clashes between government forces and LTTE have resulted in an estimated 300,000 internally displaced persons, a million Tamils leaving the country, and 100,000 deaths, including an estimated 200 Tamil political leaders that LTTE has assassinated over the years

TRANSNATIONAL ISSUES

Disputes—international: none

Refugees and internally displaced persons: IDPs: 44,000 (civil war; more than half displaced prior to 2008; many of the more than 480,000 IDPs registered as returnees have not reached durable solutions) (2016)

Trafficking in persons: current situation: Sri Lanka is primarily a source and, to a lesser extent, a destination country for men, women, and children subjected to forced labor and sex trafficking; some Sri Lankan adults and children who migrate willingly to the Middle East, Southeast Asia, and Afghanistan to work in the construction, garment, and domestic service sectors are subsequently subjected to forced labor or debt bondage (incurred through high recruitment fees or money advances); some Sri Lankan women are forced into prostitution in Jordan, Maldives, Malaysia, Singapore, and other countries; within Sri Lanka, women and children are subjected to sex trafficking, and children are also forced to beg and work in the agriculture, fireworks, and fish-drying industries; a small number of women from Asia, Central Asia, Europe, and the Middle East have been forced into prostitution in Sri Lanka in recent years

tier rating: Tier 2 Watch List—Sri Lanka does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Sri Lanka was

granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; law enforcement continues to demonstrate a lack of understanding of trafficking crimes and inadequate investigations, relying on trafficking cases to be prosecuted under the procurement statute rather than the trafficking statute, which carries more stringent penalties; authorities convicted only one offender under the procurement statute, a decrease from 2013; the government approved guidelines for the identification of victims and their referral to protective services but failed to ensure that victims were not jailed and charged for crimes committed as a direct result of being trafficked; no government employees were investigated or prosecuted, despite allegations of complicity (2015)

SUDAN

INTRODUCTION

Background: Military regimes favoring Islamic-oriented governments have dominated national politics since independence from Anglo-Egyptian co-rule in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of largely non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972 but another broke out in 1983. Peace talks gained momentum in 2002-04 with the signing of several accords. The final North/South Comprehensive Peace Agreement (CPA), signed in January 2005, granted the southern rebels autonomy for six years followed by a referendum on independence for Southern Sudan. The referendum was held in January 2011 and indicated overwhelming support for independence. South Sudan became independent on 9 July 2011. Sudan and South Sudan have yet to fully implement security and economic agreements signed in September 2012 relating to the normalization of relations between the two countries. The final disposition of the contested Abyei region has also to be decided.

Following South Sudan's independence, conflict broke out between the government and the Sudan People's Liberation Movement-North in Southern Kordofan and Blue Nile states (together known as the Two Areas), and has resulted in 1.1 million internally displaced persons or severely affected persons needing humanitarian assistance. A separate conflict broke out in the western region of Darfur in 2003, displacing nearly 2 million people and causing thousands of deaths. Fighting in both the Two Areas and Darfur between government forces and opposition has largely subsided, however the civilian populations are affected by low-level violence including inter-tribal conflict and banditry, largely a result of weak rule of law. The UN and the African Union have jointly commanded a Darfur peacekeeping operation (UNAMID) since 2007. Peacekeeping troops have struggled to address insecurity in Darfur and have increasingly become targets for attacks by armed groups. Sudan also has faced refugee influxes from neighboring countries, primarily Ethiopia, Eritrea, Chad, Central African Republic, and South Sudan. Armed conflict, poor transport infrastructure, and denial of access by both the government and armed opposition have impeded the provision of humanitarian assistance to affected populations.

ECONOMY

Economy—overview: Sudan has experienced protracted social conflict, civil war, and, in July 2011, the loss of three-quarters of its oil production due to the secession of South Sudan. The oil sector had driven much of Sudan’s GDP growth since 1999. For nearly a decade, the economy boomed on the back of rising oil production, high oil prices, and significant inflows of foreign direct investment. Since the economic shock of South Sudan’s secession, Sudan has struggled to stabilize its economy and make up for the loss of

foreign exchange earnings. The interruption of oil production in South Sudan in 2012 for over a year and the consequent loss of oil transit fees further exacerbated the fragile state of Sudan's economy. Ongoing conflicts in Southern Kordofan, Darfur, and the Blue Nile states, lack of basic infrastructure in large areas, and reliance by much of the population on subsistence agriculture, keep close to half of the population at or below the poverty line.

Sudan was subject to comprehensive US sanctions, which were lifted in October 2017. Sudan is attempting to develop non-oil sources of revenues, such as gold mining and agriculture, while carrying out an austerity program to reduce expenditures. The world's largest exporter of gum Arabic, Sudan produces 75-80% of the world's total output. Agriculture continues to employ 80% of the work force.

Sudan introduced a new currency, still called the Sudanese pound, following South Sudan's secession, but the value of the currency has fallen since its introduction. Khartoum formally devalued the currency in June 2012, when it passed austerity measures that included gradually repealing fuel subsidies. Sudan also faces high inflation, which reached 47% on an annual basis in November 2012 but fell to about 35% per year in 2017.

TRANSNATIONAL ISSUES

Disputes—international: the effects of Sudan's ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; Chad wishes to be a helpful mediator in resolving the Darfur conflict, and in 2010 established a joint border monitoring force with Sudan, which has helped to reduce cross-border banditry and violence; as of April 2017, more than 610,000 Sudanese refugees are being hosted in the Central African Republic, Chad, Egypt, Ethiopia, Kenya, and South Sudan; Sudan, in turn, is hosting about 507,000 refugees, including more than 375,000 from South Sudan; Sudan accuses South Sudan of supporting Sudanese rebel groups; Sudan claims but Egypt de facto administers security and economic development of the Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan

Refugees and internally displaced persons: refugees (country of origin): 103,176 (Eritrea); 8,502 (Chad); 6,997 (Syria) (2016); 770,110 (South Sudan) (refugees and asylum seekers) (2018)

IDPs: 3.3 million (civil war 1983-2005; ongoing conflict in Darfur region; government and rebel fighting along South Sudan border; inter-tribal clashes) (2016)

Trafficking in persons: current situation: Sudan is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; Sudanese women and girls, particularly those from rural areas or who are internally displaced, or refugees are vulnerable to domestic servitude in country, as well as domestic servitude and sex trafficking abroad; migrants from East and West Africa, South Sudan, Syria, and Nigeria smuggled into or through Sudan are vulnerable to exploitation; Ethiopian, Eritrean, and Filipina women are subjected to domestic servitude in Sudanese homes, and East African and possibly Thai women are forced into prostitution in Sudan; Sudanese children continue to be recruited and used as combatants by government forces and armed groups

tier rating: Tier 2 Watch List—Sudan does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government increased its efforts to publically address and prevent trafficking, established a national anti-trafficking council, and began drafting a national action plan against trafficking; the government acknowledges cross-border trafficking but still denies the existence of forced labor, sex trafficking, and the recruitment of child soldiers domestically; law enforcement and judicial officials struggled to apply the national anti-trafficking law, often relying on other statutes with lesser penalties; authorities did not use systematic procedure to identify victims or refer them to care and relied on international organizations and domestic groups to provide protective services; some foreign victims were penalized for unlawful acts committed as a direct result of being trafficked, such as immigration or prostitution violations (2015)

SURINAME

INTRODUCTION

Background: First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of African slavery in 1863, workers were brought in from India and Java. The Netherlands granted the colony independence in 1975. Five years later the civilian government was replaced by a military regime that soon declared Suriname a socialist republic. It continued to exert control through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government—a four-party coalition—returned to power in 1991. The coalition expanded to eight parties in 2005 and ruled until August 2010, when voters returned former military leader Desire BOUTERSE and his opposition coalition to power. President BOUTERSE was reelected unopposed in 2015.

PEOPLE AND SOCIETY

Population: 591,919 (July 2017 est.)

country comparison to the world: 172

Nationality: *noun:* Surinamer(s)

adjective: Surinamese

Ethnic groups: Hindustani (also known locally as “East Indians”; their ancestors emigrated from northern India in the latter part of the 19th century) 27.4%, “Maroon” (their African ancestors were brought to the country in the 17th and 18th centuries as slaves and escaped to the interior) 21.7%, Creole (mixed white and black) 15.7%, Javanese 13.7%, mixed 13.4%, other 7.6%, unspecified 0.6% (2012 est.)

Languages: Dutch (official), English (widely spoken), Sranang Tongo (Surinamese, sometimes called Taki-Taki, is the native language of Creoles and much of the younger population and is lingua franca among others), Caribbean Hindustani (a dialect of Hindi), Javanese

Religions: Protestant 23.6% (includes Evangelical 11.2%, Moravian 11.2%, Reformed .7%, Lutheran .5%), Hindu 22.3%, Roman Catholic 21.6%, Muslim 13.8%, other Christian 3.2%, Winti 1.8%, Jehovah’s Witness 1.2%, other 1.7%, none 7.5%, unspecified 3.2% (2012 est.)

Demographic profile: Suriname is a pluralistic society consisting primarily of Creoles (persons of mixed African and European heritage), the descendants of escaped African slaves known as Maroons, and the descendants of Indian and Javanese (Indonesian) contract workers. The country overall is in full, post-industrial

demographic transition, with a low fertility rate, a moderate mortality rate, and a rising life expectancy. However, the Maroon population of the rural interior lags behind because of lower educational attainment and contraceptive use, higher malnutrition, and significantly less access to electricity, potable water, sanitation, infrastructure, and health care.

Some 350,000 people of Surinamese descent live in the Netherlands, Suriname's former colonial ruler. In the 19th century, better-educated, largely Dutch-speaking Surinamese began emigrating to the Netherlands. World War II interrupted the outflow, but it resumed after the war when Dutch labor demands grew—emigrants included all segments of the Creole population. Suriname still is strongly influenced by the Netherlands because most Surinamese have relatives living there and it is the largest supplier of development aid. Other emigration destinations include French Guiana and the United States. Suriname's immigration rules are flexible, and the country is easy to enter illegally because rainforests obscure its borders. Since the mid-1980s, Brazilians have settled in Suriname's capital, Paramaribo, or eastern Suriname, where they mine gold. This immigration is likely to slowly re-orient Suriname toward its Latin American roots.

ECONOMY

Economy—overview: Suriname’s economy is dominated by the mining industry, with exports of oil and gold accounting for approximately 85% of exports and 27% of government revenues. This makes the economy highly vulnerable to mineral price volatility. The worldwide drop in international commodity prices and the cessation of alumina mining in Suriname significantly reduced government revenue and national income during the past few years. After 99 years of operations, a major US aluminum company recently discontinued its activities in Suriname. Public

sector revenues fell, together with exports, international reserves, employment, and private sector investment.

Economic growth declined annually from just under 5% in 2012 to -10.4% in 2016. In January 2011, the government devalued the currency by 20% and raised taxes to reduce the budget deficit. Suriname began instituting macro adjustments between September 2015 and 2016; these included another 20% currency devaluation in November 2015 and foreign currency interventions by the Central Bank until March 2016, after which time the Bank allowed the Surinamese dollar (SRD) to float. By December 2016, the SRD had lost 46% of its value against the dollar. High import price pass-through from depreciation and electricity tariff increases caused inflation to increase 55.5% year-over-year in December 2016.

Suriname's economic prospects for the medium-term will depend on continued commitment to responsible monetary and fiscal policies and on the introduction of structural reforms to liberalize markets and promote competition. The government's over-reliance on revenue from the extractive sector colors Suriname's economic outlook. One credit bureau forecasted that the economy would contract 2% in 2017. Rising international oil prices and higher production by Suriname's oil company, Staatsolie's, will lift oil exports. Two new offshore oil exploration wells will draw 100 million dollars in foreign direct investment inflows. Higher gold prices and increased production from the Merian gold mine also will lift exports. However, investment overall is slowing and unemployment is rising, reflecting government spending cuts, weak business confidence, and the completion of large mining infrastructure projects. Fiscal problems, such as a failure to secure sufficient external financing, could result in additional pressure on the exchange rate and inflation.

Military service age and obligation: 18 is the legal minimum age for voluntary military service; no conscription; personnel drawn almost exclusively from the Creole community (2012)

TRANSNATIONAL ISSUES

Disputes—international: area claimed by French Guiana between Riviere Litani and Riviere Marouini (both headwaters of the Lawa); Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks UN Convention on the Law of the Sea arbitration to resolve the longstanding dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons: current situation: Suriname is a source, transit, and destination country for women and children subjected to sex trafficking and men, women, and children subjected to forced labor; women and girls from Suriname, Guyana, Brazil, and the Dominican Republic are subjected to sex trafficking in the country, sometimes in interior mining camps; migrant workers in agriculture and on fishing boats and children working in informal urban sectors and gold mines are vulnerable to forced labor; traffickers from Suriname exploit victims in the Netherlands

tier rating: Tier 2 Watch List—Suriname does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; in 2014, Suriname was granted a waiver from an otherwise required downgrade to Tier 3 because its government has a written plan that, if implemented, would constitute making significant efforts to bring itself into compliance with the minimum standards for the elimination of trafficking; authorities increased the number of trafficking investigations, prosecutions, and convictions as compared to 2013, but resources were insufficient to conduct investigations in the country's interior; more trafficking victims were identified in 2014 than in 2013, but protective services for adults and children were inadequate, with a proposed government shelter for women and child trafficking victims remaining unopened (2015)

Illicit drugs: growing transshipment point for South American drugs

destined for Europe via the Netherlands and Brazil; transshipment point for arms-for-drugs dealing

SVALBARD

INTRODUCTION

Background: The archipelago may have been first discovered by Norse explorers in the 12th century; the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was internationally recognized by treaty in 1920, and five years later it officially took over the territory. In the 20th century coal mining started and today a Norwegian and a Russian company are still functioning. Travel between the settlements is accomplished with snowmobiles, aircraft, and boats.

Population—distribution: the small population is primarily concentrated on the island of Spitsbergen in a handful of settlements on the south side of the Isfjorden, with Longyearbyen being the largest

Natural hazards: ice floes often block the entrance to Bellsund (a transit point for coal export) on the west coast and occasionally make parts of the northeastern coast inaccessible to maritime traffic

Environment—current issues: ice floes are a maritime hazard; past exploitation of mammal species (whale, seal, walrus, and polar bear) severely depleted the populations, but a gradual recovery seems to be occurring
Geography—note: northernmost part of the Kingdom of Norway; consists of nine main islands; glaciers and snowfields cover 60% of the total area; Spitsbergen Island is the site of the Svalbard Global Seed Vault, a seed repository established by the Global Crop Diversity Trust and the Norwegian Government

GOVERNMENT

Country name: *conventional long form:* none

conventional short form: Svalbard (sometimes referred to as Spitsbergen, the largest island in the archipelago)

etymology: 12th century Norse accounts speak of the discovery of a “Svalbard”—literally “cold shores”—but they may have referred to Jan Mayen Island or eastern Greenland; the archipelago was traditionally known as Spitsbergen, but Norway renamed it Svalbard in the 1920s when it assumed sovereignty of the islands

Dependency status: territory of Norway; administered by the Polar Department of the Ministry of Justice, through a governor (sysselmann) residing in Longyearbyen, Spitsbergen; by treaty (9 February 1920), sovereignty was awarded to Norway

Government type: non-self-governing territory of Norway

Capital: *name*: Longyearbyen

geographic coordinates: 78 13 N, 15 38 E

time difference: UTC +1 (6 hours ahead of Washington, DC, during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

Independence: none (territory of Norway)

Legal system: the laws of Norway where applicable apply; only the laws of Norway made explicitly applicable to Svalbard have effect there; the Svalbard Act and the Svalbard Environmental Protection Act, and certain regulations, apply only to Svalbard; the Spitsbergen Treaty and the Svalbard Treaty grant certain rights to citizens and corporations of signatory nations; as of June 2017, 45 nations had ratified the Svalbard Treaty

Citizenship: see Norway

Executive branch: *chief of state*: King HARALD V of Norway (since 17 January 1991); Heir Apparent Crown Prince Haakon MAGNUS, son of the king (born 20 July 1973)

head of government: Governor Kjerstin ASKHOLT (since 1 October 2015); Assistant Governor Berit SAGFOSSEN (since 1 April 2016)

elections/appointments: none; the monarchy is hereditary; governor and assistant governor responsible to the Polar Department of the Ministry of Justice

Legislative branch: *description*: unicameral Longyearbyen Community Council (15 seats; members elected by direct vote to serve 4-year-terms); note—the Council acts very much like a Norwegian municipality, responsible for infrastructure and utilities, including power, land-use and community planning, education, and

child welfare; however, healthcare services are provided by the state

elections: last held on 6 October 2015 (next to be held in October 2019)

election results: seats by party—Conservatives 5, Labor Party 5, Liberals 3, Green Party 2

Judicial branch: *highest court(s)*: none; note—Svalbard is subordinate to Norway's Nord-Troms District Court and Halogaland Court of Appeal, both located in Tromsø

Political parties and leaders: Svalbard Conservative Party [Kjetil FIGENSCHOU]

Svalbard Green Party [Helga Bardsdatter KRISTIANSEN and Espen Klungseth ROTEVATN]

Svalbard Labor Party [Arild OLSEN]

Svalbard Liberal Party [Erik BERGER]

Political pressure groups and leaders: NA

International organization participation: none

Flag description: the flag of Norway is used

National anthem: note: as a territory of Norway, "Ja, vi elsker dette landet" is official (see Norway)

ECONOMY

Economy—overview: Coal mining, tourism, and international research are Svalbard's major industries. Coal mining has historically been the dominant economic activity, and the Treaty of 9 February 1920 gives the 45 countries that so far have ratified the treaty equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. Low coal prices have forced the Norwegian coal company, Store Norske Spitsbergen Kulkompani, to close one of its two mines and to considerably reduce the activity of the other. Since the 1990s, the tourism and hospitality industry has grown rapidly, and Svalbard now receives 60,000 visitors annually.

The settlements on Svalbard were established as company towns, and at their height in the 1950s, the Norwegian state-owned coal company supported nearly 1,000 jobs. Today, only about 300 people work in the mining industry.

Goods such as alcohol, tobacco, and vehicles, normally highly taxed on mainland Norway, are considerably cheaper in Svalbard in an effort by the Norwegian government to entice more people to live on the Arctic archipelago. By law, Norway collects only enough taxes to pay for the needs of the local government; none of tax proceeds go to the central government.

SWAZILAND

INTRODUCTION

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s

pressured King MSWATI III, Africa's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but the legal status of political parties was not defined and their status remains unclear. Swaziland has surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

Environment—current issues: limited supplies of potable water; wildlife populations being depleted because of excessive hunting; overgrazing; soil degradation; soil erosion

Environment—international agreements: *party to:* Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Hazardous Wastes, Ozone Layer Protection
signed, but not ratified: Law of the Sea
Geography—note: landlocked; almost completely surrounded by South Africa

PEOPLE AND SOCIETY

Population: 1,467,152

note: estimates for this country explicitly take into account the effects of excess mortality due to AIDS; this can result in lower life expectancy, higher infant mortality, higher death rates, lower population growth rates, and changes in the distribution of population by age and sex than would otherwise be expected (July 2017 est.)

Nationality: *noun:* Swazi(s)

adjective: Swazi

Ethnic groups: African 97%, European 3%

Demographic profile: Swaziland, a small, predominantly rural, landlocked country surrounded by South Africa and Mozambique, suffers from severe poverty and the world's highest HIV/AIDS prevalence rate. A weak and deteriorating economy, high unemployment, rapid population growth, and an uneven distribution of resources all combine to worsen already persistent

poverty and food insecurity, especially in rural areas. Erratic weather (frequent droughts and intermittent heavy rains and flooding), overuse of small plots, the overgrazing of cattle, and outdated agricultural practices reduce crop yields and further degrade the environment, exacerbating Swaziland's poverty and subsistence problems. Swaziland's extremely high HIV/AIDS prevalence rate—more than 28% of adults have the disease—compounds these issues. Agricultural production has declined due to HIV/AIDS, as the illness causes households to lose manpower and to sell livestock and other assets to pay for medicine and funerals.

Swazis, mainly men from the country's rural south, have been migrating to South Africa to work in coal, and later gold, mines since the late 19th century. Although the number of miners abroad has never been high in absolute terms because of Swaziland's small population, the outflow has had important social and economic repercussions. The peak of mining employment in South Africa occurred during the 1980s. Cross-border movement has accelerated since the 1990s, as increasing unemployment has pushed more Swazis to look for work in South Africa (creating a "brain drain" in the health and educational sectors); southern Swazi men have continued to pursue mining, although the industry has downsized. Women now make up an increasing share of migrants and dominate cross-border trading in handicrafts, using the proceeds to purchase goods back in Swaziland. Much of today's migration, however, is not work-related but focuses on visits to family and friends, tourism, and shopping.

ECONOMY

Economy—overview: A small, landlocked kingdom, Swaziland is bordered in the north, west and south by the Republic of South Africa and by Mozambique in the east. Swaziland depends on South Africa for 60% of its exports and for more than 90% of its imports. Swaziland's currency is pegged to the South African rand, effectively relinquishing Swaziland's monetary policy to South Africa. The government is dependent on customs duties from the

Southern African Customs Union (SACU) for 49% of revenue; income tax accounts for 27% and a valued added tax for 19% of revenues. Swaziland is a lower middle income country, but its income distribution is highly skewed, with an estimated 20% of the population controlling 80% of the nation's wealth. As of 2017, more than one-quarter of the adult population was infected by HIV/AIDS; Swaziland has the world's highest HIV prevalence rate.

Subsistence agriculture employs approximately 70% of the population. The manufacturing sector diversified in the 1980s and 1990s, but manufacturing has grown little in the last decade. Sugar and soft drink concentrate are the largest foreign exchange earners. Mining has declined in importance in recent years. Coal, gold, diamond, and quarry stone mines are small scale, and the only iron ore mine closed in 2014.

With an estimated 28% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and to attract foreign direct investment is acute. On 1 January 2015, Swaziland lost its eligibility for benefits under the US African Growth and Opportunity Act after failing to meet benchmarks relating to workers' rights.

The IMF forecasted that Swaziland's economy will grow at a slower pace in 2017 because of a region-wide drought, which is likely to hurt Swaziland's revenue from sugar exports and other agricultural products; tourism and transport sectors will also decline. Overgrazing, soil depletion, drought, and floods are persistent problems. Swaziland's revenue from SACU receipts also are projected to decline in 2017, making it harder for the government to maintain fiscal balance.

SWEDEN

INTRODUCTION

Background: A military power during the 17th century, Sweden has not participated in any war for two centuries. An armed neutrality was preserved in both world wars. Sweden's long-successful economic formula of a capitalist system intermixed with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000-02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public rejected the introduction of the euro in a 2003 referendum.

ECONOMY

Economy—overview: Sweden has achieved an enviable standard of living with its combination of free-market capitalism and extensive welfare benefits. Sweden remains outside the euro zone largely out of concern that joining the European Economic and Monetary Union would diminish the country’s sovereignty over its welfare system. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade.

Sweden’s economy experienced modest growth in 2014-17, with real GDP growth above 3%, but continues to struggle with deflationary pressure.

SWITZERLAND

INTRODUCTION

Background: The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two world wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international organizations but retains a strong commitment to neutrality.
